RELATIONALITY AND GEOAESTHETICS IN THE TWENTY-FIRST CENTURY

Springer Science & Business Media

Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, lolololol, mode of critique, mode of production, means of politicisation, even of subjectivation -- memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. Post-Memes: Seizing the Memes of Production takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon.

The Transition to College Writing HarperCollins

A bold and unabashed guide to finding your voice, harnessing your true desires, and leading the life you really want. Women are tired of worrying that they are being "too loud" if they speak up and say what they believe, want, or need, and are ready to feel their power and make themselves heard. A certified life coach and author of the bestseller *How to Stop Feeling Like Shit*, Andrea Owen knows that this is absolutely attainable if women can channel their righteous anger and desire. But she also knows that they'll need to disrupt a status quo in which women have been conditioned and socialized to remain on the sidelines and to put others before themselves. With all of the expertise of a veteran feminist and hell-raiser, and the relatability of a dear friend, *Make Some Noise* will push women to step outside of rigid societal expectations and show them how to take back control of their lives, and make them all their own. In *Make Some Noise*, Owen deconstructs common behavior patterns that sabotage our power as women, and instead suggests new behaviors for creating a life that truly serves our desires and needs. From unlearning the notion that women should stay quiet and take up little space to trusting your inner wisdom, *Make Some Noise* is a raw and honest guidebook, and, ultimately, a call to arms.

About this Book / Bristol born Banksy is usually categorized as a Street Artist, although his art, in content and form, transcends a narrow understanding of this term. This publication primarily deals with Banksy as a contemporary Urban Artist and his relationship with consumer culture. It examines Banksy not only in light of his illicit work on the street, but also in regard to his gallery exhibitions. The study highlights representative works of his art, pieces which demonstrate his versatility, but also stand for different periods of his oeuvre. This book presents the first academic study of Banksy's art in English; with a history and discussion of the terms Graffiti, Street Art and Urban Art and a rich array of biographical information. It will be of interest to academics and the general public as well. About this Edition / Street Artist Banksy and former Young British artist Damien Hirst are two of the most popular representatives of British contemporary art. Situated in a triangle of art, consumerism and pop culture their work is among the most well-known. A systematic academic study of their artistic viewpoints and references to consumer culture has long been missing, and Ulrich Blanché is finally closing this gap: He examines Hirst's and Banksy's art against the background of the London art scene since 1980. Blanché points out connections to Duchamp, Warhol and Koons, and reflects on the role of the observer, the meaning of location and, especially, the references between art, consumer culture and marketing in their pieces. This two volume edition is the translated and expanded version of the authors dissertational thesis.

A groundbreaking essay collection that pursues the rise of geoculture as an essential framework for arts criticism, *The Planetary Turn* shows how the planet--as a territory, a sociopolitical arena, a natural space of interaction for all earthly life, and an artistic theme--is increasingly the conceptual and political dimension in which twenty-first-century writers and artists picture themselves and their work. In an introduction that comprehensively defines the planetary model of art, culture, and

cultural-aesthetic interpretation, the editors explain how the living planet is emerging as distinct from older concepts of globalization, cosmopolitanism, and environmentalism and is becoming a new ground for exciting work in contemporary literature, visual and media arts, and social humanities. Written by internationally recognized scholars, the twelve essays that follow illustrate the unfolding of a new vision of potential planetary community that retools earlier models based on the nation-state or political "blobs" and reimagines cultural, political, aesthetic, and ethical relationships for the post-Cold War era.

"Students today are writing more than ever. Everyone's an Author bridges the gap between the writing students already do - online, at home, in their communities - and the writing they'll do in college and beyond. It builds student confidence by showing that they already know how to think rhetorically and offers advice for applying those skills as students, professionals, and citizens. Because students are also reading more than ever, the third edition includes NEW advice for reading critically, engaging respectfully with others, and distinguishing facts from misinformation"--

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A

singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

This book identifies the 'cognitive humanities' with new approaches to literature and culture that engage with recent theories of the embodied mind in cognitive science. If cognition should be approached less as a matter of internal representation—a Cartesian inner theatre—than as a form of embodied action, how might cultural representation be rethought? What can literature and culture reveal or challenge about embodied minds? The essays in this book ask what new directions in the humanities open up when the thinking self is understood as a participant in contexts of action, even as extended beyond the skin. Building on cognitive literary studies, but engaging much more extensively with '4E' cognitive science (embodied, embedded, enactive, extended) than previously, the book uses case studies from many different historical settings (such as early modern theatre and digital technologies) and in different media (narrative, art, performance) to explore the embodied mind through culture.
