An integrated approach to investigate, create, and propose a model for the value creation of cultural products is essential in maintaining its connection with e-relationship marketing; this examination is important in recognizing a common perspective. The Handbook of Research on Management of Cultural Products: E-Relationship Marketing and Accessibility Perspectives examines the potential value of cultural products and how the support of new technologies can enable non-conventional and social-media marketing relationships. This book aims to highlight an emerging subject area in the field of financial management, management of value creation, and marketing that will be essential for scientists, researchers, and practitioners.

The book describes significant multidisciplinary research findings at the Università Politecnica delle Marche and the expected future advances. It addresses some of the most dramatic challenges posed by today's fast-growing, global society and the changes it has caused, while also discussing solutions to improve the wellbeing of human beings. The book covers the main research achievements made in the social sciences and humanities, and includes chapters that focus on understanding mechanisms that are relevant to all aspects of economic and social interactions among individuals. In line with Giorgio Fuà's contribution, the interdisciplinary research being pursued at the Faculty of Economics of Università Politecnica delle Marche is aimed at interpreting the process of economic development in all of its facets, both at the national and local level, with a particular focus on profit and non-profit organizations. Various disciplines are covered, from economics to sociology, history, statistics, mathematics, law, accounting, finance and management.

Accounting systems and sustainability management are vital for company management and performance. This is particularly difficult for small businesses. As such, it is necessary to understand the features and issues of sustainable accounting systems, with a particular focus on small business. Maintaining Sustainable Accounting Systems in Small Business is a critical scholarly resource that explores sustainability accounting systems with small businesses and how the economic, social, and environmental aspects are related to each other in the company's management and performance. Featuring coverage on a broad range of topics such as management control system, integrated reporting, and small and medium enterprises, this book is geared towards entrepreneurs, business managers, academicians, business professionals, and graduate-level students seeking practical information about the different sustainable accounting systems from strategic, organizational, and accounting perspectives.

A NOVEL

Princeton University Press
Written by and for preteens, this uplifting collection of stories touches on the emotions and situations they experience every day: making and losing friends, fitting in while keeping their personal identity, discovering the opposite sex, dealing with pressures at school including violence, and coping with family issues such as divorce.

2019 DEVELOPMENT EFFECTIVENESS REVIEW

Peter Lang Incorporated, International Academic Publishers
This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 13th in a series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness over the years, and identifies areas where the institution's performance needs to be further strengthened.

The Social Organization sheds light on how social media usage is transforming the way organizations make sense of their identity and processes. By adopting a human capital perspective and merging research from communication studies and management, it argues that social media could be fruitfully exploited by organizations as a competitive advantage.

Population growth, dynamics, and blooms of bacterial, unicellular eukaryotes, and toxic algae are described in this book. Microbes are used to illustrate both exponential and logistic population growth. Microbes are also used to illustrate dynamics in other aspects of ecological systems, including nutrient cycling. The movement of nitrogen in ecological systems is largely affected by microbes, some of which have symbiotic relationships with legumes. The effects of the environment on the growth of microbes and the effects of the microbes on ecological systems are described in reference to nutrient cycles and harmful algal blooms. Populations of harmful algal can quickly grow and exceed

carrying capacity, with resulting negative effects on other species, including humans.

A GUIDE TO COMMUNITY VISIONING

Niccolò Machiavelli (1469-1527) is the father of modern political thought, but he is also one of the greatest writers of the Renaissance and his wisdom and style extend far beyond politics to encompass a compelling philosophy of life as well. In [The Quotable Machiavelli](#), Maurizio Viroli, one of the world's leading Machiavelli scholars, offers a rich collection of the Florentine's most memorable words on a wide range of subjects, including politics, the human condition, religion, love and happiness, antiquity and history, patriotism, and virtue. Drawing on Machiavelli's entire body of writings, and including little-known quotations as well as famous passages, the book shows the full scope of his thought and belies the cliché that he was a "Machiavellian" cynic. In addition to Machiavelli's own words on dozens of subjects of perennial interest, the book includes some almost unknown texts in which his contemporaries describe him. Complete with a biographical introduction, the book serves as a handy reference and a smart and lively introduction to a masterly thinker and writer. Includes a rich collection of Machiavelli's most memorable words on a wide range of subjects, from politics to the human condition—almost 700 quotations in all Edited and introduced by one of the world's leading Machiavelli scholars Serves as a smart and lively introduction to Machiavelli's life and works Draws on the complete body of Machiavelli's writings Features a brief biography of Machiavelli, a chronology of his life, suggestions for further reading, and an index

Lucrezia Borgia is one of the most vilified women in modern history. The daughter of a notorious pope, she was twice betrothed before the age of eleven and thrice married—one husband was forced to declare himself impotent and thereby unfit and another was murdered by Lucrezia's own brother, Cesar Borgia. She is cast in the role of murderess, temptress, incestuous lover, loose woman, femme fatale par excellence. But there are two sides to every story. Lucrezia Borgia is the only woman in history to have served as the head of the Catholic Church. She successfully administered several of Renaissance Italy's most thriving cities, founded one of the world's first credit unions, and was a generous patron of the arts. She was mother to a prince and to a cardinal. She was a devoted wife to the Prince of Ferrara, and the lover of the poet Pietro Bembo. She was a child of the renaissance and, in many ways, the world's first modern woman. In this richly imagined novel, Nobel laureate Dario Fo reveals Lucrezia's humanity, her passion for life, her compassion for others, and her skill at navigating around her family's evildoings. The Borgias are unrivalled for the range and magnitude of their political machinations and opportunism. Fo's brilliance rests in his rendering their story as a shocking mirror image of the uses and abuses of power in our own time. Lucrezia herself becomes a model for how to survive and rise above those abuses. Part Wolf Hall, part House of Cards, The Pope's Daughter will appeal to readers of historical fiction and of contemporary fiction alike and will delight anyone fascinated by Renaissance Italy.

Technological pedagogical content knowledge (TPCK) reflects a new direction in understanding the complex interactions among content, pedagogy, learners and technology that can result in successful integration of multiple technologies in teaching and learning. The purpose of this edited volume is to introduce TPCK as a conceptual framework for grounding research in the area of teachers' cognitive understanding of the interactions of technology with content, pedagogy and learner conceptions. Accordingly, the contributions will constitute systematic research efforts that use TPCK to develop lines of educational technology research exemplifying current theoretical conceptions of TPCK and methodological and pedagogical approaches of how to develop and assess TPCK.

This book aims to improve the design and organization of innovative laboratory practices and to provide tools and exemplary results for the evaluation of their effectiveness, adequate for labwork in order to promote students' scientific understanding in a variety of countries. The papers are based on research and developmental work carried out in the context of the European Project "Labwork in Science Education" (LSE). This substantial and significant body of research is now made available in English.

The Quotable Machiavelli Olschki

An absolute must-read for anyone who loves books In Closing

Time, Joe Queenan shared how he became a voracious reader to escape a joyless childhood. Now, like many bibliophiles, he fears for the books that once saved him. In *One for the Books*, Queenan examines the entire culture of reading and what books really mean in people's lives today. What does it suggest if a person has no books displayed in his living room? Can an obsession with reading prove detrimental to one's well being? How useful are covers in selling books? Queenan's many fans—as well as anyone who loves books and reading—will want to join him on his unforgettably funny and moving journey.

"Swiss architects Marianne Burkhalter and Christian Sumi are dedicated to an exploration of the nature of materials and construction. In the last fifteen years, they have built a series of remarkable buildings in wood and stone in Germany, Austria, and Switzerland. Their work is a thoughtful pursuit of the fundamentals of architectural construction—a style that, like that of Zumthor's buildings, might be called Alpine minimalism. Their interest in simple forms and shapes, in luminous color, in the natural grain patterns of wood, and in the opportunities afforded by joinery and other forms of craftsmanship are evident in every aspect of their built work. This comprehensive monograph includes an in-depth look at 25 of Burkhalter and Sumi's projects, including their most famous built work, the Hotel Zurichberg. Essays by Eugene Asse, Detlef Mertins, Steven Spier, and Lynnette Widder, based respectively in Moscow, Toronto, London, and New York, explore their unique style and demonstrate the growing international acknowledgement of their practice." -- Publisher description.

This comprehensive characteristics of the book makes it an excellent reference for the solution of complex problems of engineering management. The authors of the chapters are well-known researchers with their previous works in the area of engineering management.

The Pope's Daughter IGI Global

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.
