Provides guidance on controlling asbestos-containing materials (ACM) found in buildings. Provides a current summary of data on exposure to airborne asbestos; gives survey procedures for determining if ACM is present in buildings; explains how to establish a special operations and maintenance program in a building found to contain asbestos; reviews technical issues confronted when assessing the potential for exposure to airborne asbestos, in particular indoor settings; suggests a structured process for selecting a particular course of action, and much more. Commonly referred to as the Blue Book.

JCPenney [catalog]. Crocodile Books  
A sweeping story about obsession, mysticism, art, earthly desire, and the construction of a Cathedral in medieval Germany. At the center of this story is the Cathedral. Its design and construction in the thirteenth and fourteenth centuries in the Rhineland town of Hagenburg unites a vast array of unforgettable characters whose fortunes are inseparable from the shifting political factions and economic interests vying for supremacy. From the bishop to his treasurer to local merchants and lowly stonecutters, everyone, even the town's Jewish denizens, is implicated and affected by the slow rise of Hagenburg's Cathedral, which in no way enforces morality or charity. Around this narrative center, Ben Hopkins has constructed his own monumental edifice, a novel that is rich with the vicissitudes of mercantilism, politics, religion, and human enterprise. Fans of Umberto Eco, Hilary Mantel, and Ken Follett will delight at the atmosphere, the beautiful prose, and the vivid characters of Ben Hopkins's Cathedral. "Cathedral is a brilliantly organized mess of great, great characters. It is fascinating, fun, and gripping to the very end." —Roddy Doyle, Booker Prize-winning author of Paddy Clarke Ha Ha Ha "A varied cast of hugely engaging characters jostle for status, rising and falling according to the whims of pirates and Popes. An immersive, old-fashioned read that rattles along at a cracking pace." —Richard Beard, author of Lazarus is Dead and The Day That Went Missing "Six hundred pages sounds long, but this deeply human take on a medieval city and its commerce and aspirations, its violent battles and small intimacies, never feels that way. This sweeping work is as impressive as the cathedral at its center." —Publishers Weekly,

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.
