Designation: D4169 - 16. Standard Practice for Performance Testing of Shipping Containers and Systems 1 This standard is issued under the fixed designation D4169; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reappraisal. ASTM D4169-16.pdf | Cargo | Consumer Goods ASTM D 4169 Performance Testing of Shipping Containers and Systems. The scope of ASTM D4169 package testing is to provide the ability to evaluate shipping units to withstand the distribution environment. To accomplish this, the ASTM standard package test outlines a test plan of anticipated transportation hazards. ASTM D4169 • Keystone Package Testing - ISTA

Test Lab ASTM D4169 is perhaps the industry's most well-known standard, with good reason. The standard provides a uniform basis by which we can evaluate how well shipping units hold up during product distribution. To perform ASTM D4169 lab simulations, samples packed in their shipping configuration undergo a sequence of simulated hazard elements. ASTM D4169 DC13: To Include or Not To Include? About ASTM International. Over 12,800 ASTM Standards operate globally. Defined and set by us, they improve the lives of millions every day. Combined with our innovative business services, they enhance performance and help everyone have confidence in the things they buy and use. ASTM International - Standards Worldwide The ASTM D-4169 protocol tests packages sequentially in the same containers listed in the order given. For use as a performance test, this practice requires that the shipping unit tested remain unopened until the sequence of tests are completed. ASTM D-4169 | Keystone Compliance ASTM D4169 involves the development of a testing plan for packaging and containers relative to the actual distribution environment that it will experience.
