Innovative Approaches for Difficult-to-Treat Populations makes recommendations for developing and disseminating innovative mental health services. It is geared toward clinicians, administrators, and policy-makers struggling to develop both clinically effective and cost-effective mental health and substance abuse services, and it focuses on services for individuals who use the highest proportion of mental health resources and for whom traditional services have not been effective. These target populations include youth with serious behavioral and emotional disturbances and adults with severe and persistent mental illnesses. The innovative approaches reviewed include diverse treatment methods for differing clinical populations. These varied approaches have several common elements: * Social-ecological theory frameworks* An emphasis on delivering flexible, comprehensive, pragmatic, and goal-oriented interventions in persons' natural environments* Increased accountability on the part of service providers* The transition from centralized to community-based care is discussed, and normalizing a patient's daily routine as an important factor in the success of state-of-the-art community support programs is emphasized Innovative Approaches for Difficult-to-Treat Populations offers mental health professionals and students a firsthand look at the future direction of clinical services. Policy issues necessary to developing and disseminating progressive treatments are addressed, including the downsizing of state psychiatric hospitals, strategies for reforming state mental hospital systems, and ethical issues in research on child and adolescent mental disorders.

`An important contribution to the development of cognitive therapy that synthesizes the best of traditional cognitive therapy with important new developments emerging from a range of different areas. Combining practical accessibility with theoretical

sophistication, this book will be invaluable reading for both beginning therapists and experienced clinicians' - Jeremy D. Safran, Ph.D., Professor and Director of Clinical Psychology, New School for Social Research, New York `Like a powerful river with many tributaries, this book somehow manages to weave influences from all kinds of diverse sources into an exciting, coherent whole. It is everything you'd want of a new CBT book for students and practitioners - fresh, practical, accessible' - James Bennett-Levy, Oxford Cognitive Therapy Centre Assessment and Case Formulation in Cognitive Behavioural Therapy is a comprehensive guide to key areas of professional knowledge and skill. The successful outcome of therapy depends on the therapist's ability to work collaboratively with clients to create rounded assessments and formulations as a solid basis for therapeutic work. Drawing directly on their own clinical work, the authors describe how assessment and formulation should evolve throughout the process. The case examples chosen include helping individuals with axis I and II problems such as psychosis, depression, borderline personality disorder and family case formulation. The authors also discuss the importance of the therapist taking into account their own beliefs and emotions in formulating each case and present suggested self-practice/self-reflection trajectories to support continuous professional development in this area. Alec Grant is Principal Lecturer and Course Leader MSc in Cognitive Psychotherapy at INAM, University of Brighton. Michael Townend is Reader in Cognitive Behavioural Psychotherapy and Programme Leader for the MSc in Cognitive Behavioural Psychotherapy and Postgraduate Certificate in Clinical Supervision, University of Derby. Jem Mills is Managing Director Aurora CBT Ltd and also Cognitive Psychotherapist in Private Practice. Adrian Cockx is Community Psychiatric Nurse and MSc in Cognitive Psychotherapy student at University of Brighton.

iThis book helps move healthcare forward by recognizing the range of issues across the lifespan that people with ASD may face. . . [and] brings together a wealth of expertise with information and strategies across the lifespan.i From the Foreword by Catherine Rice, PhD National Center on Birth Defects and Developmental Disabilities Center for Disease Control and Prevention Autism Spectrum Disorder (ASD) is a growing health problem and nearly all nurses are likely to care for individuals with ASD. Designed as a textbook and a reference, this volume prepares nurses to recognize the unique challenges of providing evidence-based health care that meets the special needs of ASD patients across the lifespan and in multiple practice settings. Chapters include setting-specific case studies followed by consistently formatted information about key clinical issues, clinical assessment, and best practice nursing plans of care. The book is organized on a social model of disability with a focus on the environmental, cultural, and economic barriers encountered by people with ASD. It highlights the significant role played by nurses in the treatment of ASD patients and helps nurses integrate the specialized information about ASD into their clinical practice. Each section of the book reflects a different life stage and is organized to include learning objectives and developmental

needs at the beginning of a section, with key points, a guide to clinical problem solving, and thought-provoking review questions at the end. Key Features: Provides evidence-based information for nurses about the special treatment needs of individuals with ASD Explains how functional deficits of people with ASD complicate health care delivery and how nurses can use this knowledge to provide quality care Addresses clinical issues across the lifespan and in multiple settings through case studies that illustrate best practice nursing care for a variety of problems Ideal for continuing education programs, post-master's certificate programs, and school nurse certification programs

Bipolar II is a form of bipolar disorder in which a person, when in a manic cycle, is crippled by anxiety, irritability, and highs just intense enough to be embarrassing. Instead of being the life of the party, someone with Bipolar II might be too nervous to go to the party at all. And, unlike the Bipolar I sufferer who may attempt suicide in a depressive cycle, the Bipolar II might be incapacitated by guilt over an imaginary crime. In *Less than Crazy*, health writer and Bipolar II sufferer Karla Dougherty shares her story, presenting the first patient-expert's guide to recognizing and living well with this condition. Covering both adults and children, this accessible, all-in-one resource includes information on diagnosis, conditions that may mimic Bipolar II, and treatments.

Providing a comprehensive framework for the broad subject of human sexuality, this two-volume set offers a context of historical development, scientific discovery, and sociopolitical and sociocultural movements. The broad topic of sex—encompassing subjects as varied as sexuality, sexual and gender identity, abortion, and crimes such as sexual assault—is one of the most

controversial in American society today. The two-volume encyclopedic set provides readers with more than 450 entries on the subject, offering a comprehensive overview of major sexuality issues in American and global culture. Themes that run throughout the volumes include sexual health and reproduction, sexual identity and orientation, sexual behaviors and expression, the history of sex and sexology, and sex and society. Entries cover a breadth of subjects, such as the major contributors to the field of sexology; the biological, psychological, and cultural dimensions of sex and sexuality; and how the modern-day political climate and the government play a major role in determining attitudes and beliefs about sex. Written in clear, jargon-free language, this set is ideal for high school and undergraduate students as well as general readers. Explores the important yet often controversial nature of human sexuality through a carefully curated selection of entries that provide clear yet sensitive coverage of the topic Includes a thorough treatment of the understanding of sexual behaviors in individuals and relationships that contextualizes models of sexuality related to contemporary lifestyles Defines common terms related to sexual and gender identity as well as their application to the modern-day understanding of sexual behavior Further readings sections at the end of each entry guide readers toward additional information

For nearly thirty years, anthropologist and physician Paul Farmer has traveled to some of the most impoverished places on earth to bring comfort and the best possible medical care to the poorest of the poor. Driven by his stated intent to "make human rights substantial," Farmer has treated patients—and worked to address the root causes of their disease—in Haiti, Boston, Peru, Rwanda, and elsewhere in the developing world. In 1987, with several colleagues, he founded Partners In Health to provide a preferential option for the poor in health care. Throughout his career, Farmer has written eloquently and extensively on these efforts. *Partner to the Poor* collects his writings from 1988 to 2009 on anthropology, epidemiology, health care for the global poor, and international public health policy, providing a broad overview of his work. It illuminates the depth and impact of Farmer's contributions and demonstrates how, over time, this unassuming and dedicated doctor has fundamentally changed the way we think about health, international aid, and social justice. A portion of the proceeds from the sale of this book will be donated to Partners In Health.

This textbook is a readily accessible educational tool for all fellows undertaking subspecialty training in interventional cardiology, while also serving as a refresher to early career interventional cardiologists. The key objective is to equip the reader with an evidence-based expert-led resource focussed primarily on pre-procedural planning, peri-procedural decision-making, and the salient technical aspects of performing safe and effective coronary intervention, the intention being to support the therapeutic decision-making process in the emergency room, coronary care unit or cath lab in order to optimize patient outcome. The Interventional Cardiology Training Manual provides readers with a step-by-step guide to the basic principles underpinning coronary intervention and facilitates rapid access to best practice from the experts, presented in a pragmatic, digestible and concise format. Uniquely, each chapter has been written in a heart center-specific manner, affording the reader an opportunity to learn how individual institutions perform a specific procedure, which algorithms and guidelines they follow and what evidence they draw on to instigate the best possible care for their patients.
