The chapters in this collected volume illuminate the dynamic success story of English corpus linguistics over the past few decades. The book is organised in three parts. The chapters in Part I set the scene by addressing fundamental issues such as the balance between automated and manual analyses, and the urgent call for more communication and collaboration across subjects and research areas. The studies in Part II highlight patterns in Present-day English from a cross-linguistic perspective, and identify and analyse stylistic trends in recent English. Part III is devoted to aspects of the rich variation and long-term change characteristic of early English. Two themes cut across the chapters in the book. One of them is the impressive volume and diversity of digitised material available for English corpus linguists today and the issues that arise for researchers wishing to combine different data sources in their analyses. The other theme concerns the benefits that advances made in English corpus linguistics may offer to other disciplines.

European Symposium on Language for Special Purposes ('New Trends in Specialized Discourse', Bergamo 2005). The articles deal with developments from the late medieval period to the present day, and the book encompasses studies in which the long-established tradition of domain-specific English is highlighted. The fields of contributions range from scientific to legal to political and business discourse. Special attention is given to argumentation, in an attempt to assess the time-depth of typical rhetorical strategies. Some methodological innovations are introduced in corpus linguistics. Numerous contributions bring new materials to scholarly discussion, as recently released or in-progress 'second-generation' corpora are used as data. Recent changes in present-day legal and scientific writing are also discussed as they witness fast adaptation to new requirements, due to the advent and growing familiarity of new technologies, international law and changes in academia.
