The rowboat pitched one way and then the other. Then, before his eyes, the Arizona lifted up out of the water. That enormous battleship bounced up in the air like a rubber ball and split apart. Fire burst out of the ship. A geyser of water shot into the air and came crashing down. Adam was almost thrown out of the rowboat. He clung to the seat as it swung around. He saw blue skies and the glittering city. The boat swung back again, and he saw black clouds, and the Arizona, his father's ship, sinking beneath the water. -- from A Boy at War "He kept looking up, afraid the planes would come back. The sky was obscured by black smoke....It was all unreal: the battleships half sunk, the bullet holes in the boat, Davi and Martin in the water." December 7, 1941: On a quiet

Sunday morning, while Adam and his friends are fishing near Honolulu, a surprise attack by Japanese bombers destroys the fleet at Pearl Harbor. Even as Adam struggles to survive the sudden chaos all around him, and as his friends endure the brunt of the attack, a greater concern hangs over his head: Adam's father, a navy lieutenant, was stationed on the USS Arizona when the bombs fell. During the subsequent days Adam -- not yet a man, but no longer a boy -- is caught up in the war as he desperately tries to make sense of what happened to his friends and to find news of his father. Reaching Students & Reinforcing Patriotism Through Teaching History as

Choice Wendy Lamb

American history is ubiquitous, underscoring everything from food to travel to architecture and design. It is also emotionally charged, frequently crossing paths with political and legal issues. In *Remembering America*, Lawrence R. Samuel examines the place that American history has occupied within education and popular culture and how it has continually shaped and reflected our cultural values and national identity. The story of American history, Samuel explains, is not a straight line but rather one filled with twists and turns and ups and downs, its narrative path as winding as that of the United States as a whole. Organized around six distinct eras of American history ranging from the 1920s to the present, Samuel shows that our understanding of American history has often generated struggle and contention as ideologically opposed groups battled over ownership of the past. As women and minorities gained greater power and a louder voice in the national conversation, our perspectives on American history became significantly more multicultural, bringing race, gender, and class issues to the forefront. These new interpretations of our history helped to reshape our identity on both a national and an individual level. Samuel argues that the fight for ownership of our past, combined with how those owners have imparted history to our youth, crucially affects who we are. Our interpretation and expression of our country's past reflects how that self-identity has changed over the last one hundred years and created a strong sense of our collective history—one of the few things Americans all have in common.

New Leaf Publishing Group

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Why was George Washington dismayed by the outcome of the American Revolution? Would slavery still exist if the South had not seceded from the Union in 1861? Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912? History is full of contingencies. People confront problems and debate options for solving them. Then they make a choice and face the

consequences of their choice. Often they wonder if a different choice might have been better. Was the American Revolution a mistake? Was racial segregation inevitable? Was the Cold War necessary? Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices. This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us. It demonstrates a method of teaching history that recreates events as people experienced them, and asks important questions that troubled them but that rarely appear in conventional textbooks. Unlike conventional methods that often reduce history to names, dates and factoids for students to memorize, it is a method that brings past debates to life, the losers' as well as the winners' points of view, and makes the subject exciting. In studying history as choice, students examine the problems people faced, their options for solving them, their decision-making processes, and the choices they made. Then students evaluate the consequences of those choices both for people in the past and us today. They explore what might have happened if different choices had been made. Finally, students relate the consequences of those past choices to problems we face today and the choices we need to make. History as choice is a practical and practicable method. It has been designed to satisfy the curriculum goals of the National Council for the Social Studies, and the book explains how it can be used to satisfy any state or local curriculum standards. The book also identifies and illustrates resources that can be used with this method -- from data bases to popular music -- and explains how teachers can gradually integrate it into their courses. In the first part of the book, the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point. The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice.

The Atlanta Compromise was an address by African-American leader Booker T. Washington on September 18, 1895. Given to a predominantly White audience at the Cotton States and International Exposition in Atlanta, Georgia, the speech has been recognized as one of the most important and influential speeches in American history. The compromise was announced at the Atlanta Exposition Speech. The primary architect of the compromise, on behalf of the African-Americans, was Booker T. Washington, president of the Tuskegee Institute. Supporters of Washington and the Atlanta compromise were termed the "Tuskegee Machine." The agreement was never written down. Essential elements of the agreement were that blacks would not ask for the right to vote, they would not retaliate against racist behavior, they would tolerate segregation and discrimination, that they would receive free basic education, education would be limited to vocational or industrial training (for instance as teachers or nurses), liberal arts education would be prohibited (for instance, college education in the classics, humanities, art, or literature). After the turn of the 20th century, other black leaders, most notably W. E. B. Du Bois and William Monroe Trotter - (a group Du Bois would call The Talented Tenth), took issue with the compromise, instead believing that African-Americans should engage in a

struggle for civil rights. W. E. B. Du Bois coined the term "Atlanta Compromise" to denote the agreement. The term "accommodationism" is also used to denote the essence of the Atlanta compromise. After Washington's death in 1915, supporters of the Atlanta compromise gradually shifted their support to civil rights activism, until the modern Civil rights movement

commenced in the 1950s. Booker Taliaferro Washington (April 5, 1856 - November 14, 1915) was an African-American educator, author, orator, and advisor to presidents of the United States. Between 1890 and 1915, Washington was the dominant leader in the African-American community. Washington was of the last generation of black American leaders born into slavery and became the leading voice of the former slaves and

their descendants, who were newly oppressed by disfranchisement and the Jim Crow discriminatory laws enacted in the post-Reconstruction Southern states in the late 19th and early 20th centuries. In 1895 his Atlanta compromise called for avoiding confrontation over segregation and instead putting more reliance on long-term educational and economic advancement in the black community.
