*Literacy Unbound:  
Multiliterate, Multilingual,  
Multimodal IAP*  
Technology-Enhanced  
Teaching and Learning of  
Chinese as a Foreign  
Language provides new  
and experienced teachers  
of Chinese with a timely  
review and evaluation of  
the use of technology in  
the language classroom.  
The book draws from  
Second Language  
Acquisition theories and  
empirical studies to  
demonstrate the use of  
technologies in facilitating  
language learning. With a  
strong practical and  
pedagogical focus, this is  
an ideal resource for  
current and prospective  
teachers of Chinese as a  
Foreign Language. Key  
features include:  
Demonstration and  
analysis of technologies in  
use Principles and  
methods to evaluate  
instructional technologies  
Summary tables  
presenting the key  
functions of each  
technology tool Online  
resources include up-to-  
date information on new

technologies and tools to  
address the ever-  
changing nature of the  
topic.  
Reading and Writing  
Chinese Taylor & Francis  
Chinese Television and  
Soft Power  
Communication in  
Australia discusses  
China's soft power  
communication approach  
and investigates  
information handling  
between China and its  
targeted audiences in the  
eyes of key influencers -  
intermediate elites (public  
diplomacy policy elites in  
particular) in China and  
Australia. It explores  
CGTN (with staff from  
several professional  
cultures) and conducts a  
systemic test of how  
successful/unsuccessful  
China's soft power  
message projection is in  
terms of congruence  
between projected and  
received frames as a  
pivotal factor of its power  
status. The analysis is  
based on a case study of  
frames in the messaging  
on Chinese international  
TV about China's Belt and  
Road Initiative and in the  
minds of Australian public  
diplomacy policy elites.  
The question raised is  
whether and how

Australia is listening.  
*How to Speak Any  
Language Fluently*  
Routledge  
Popular opinion has long  
assumed that learning a  
foreign language requires  
not only traditional  
classroom instruction but  
also immersion among  
native speakers of the  
language. This opinion is  
so strongly held that  
students who study  
through immersion are  
believed to become more  
proficient than those who  
do not. Study Abroad  
Contexts for Enhanced  
Foreign Language  
Learning is a critical  
scholarly publication that  
explores the importance  
and efficacy of  
international travel in the  
learning of a second or  
additional language.  
Including various topics  
such as auditory-  
orthographic training,  
grammatical ability, and  
learner autonomy, this  
book is geared toward  
academicians, students,  
and professionals seeking  
current and relevant  
research on language  
acquisition through  
immersion and its value.

## INTERNATIONAL HANDBOOK OF LEARNING WITH TECHNOLOGY IN EARLY CHILDHOOD

Lulu.com

Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor. While linguists have been preoccupied with pattern finding and theory building, language teachers often encounter issues that are not readily addressed by theoretical linguistic research. This collection, with eleven papers touching upon a wide range of issues, stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors. Subject matters include tone, stress, word structure, grammatical categories (e.g. classifiers), syntactic structures (including argument structure), discourse particles, implicit and explicit knowledge, conversational repair, and learner corpus. With a diverse range of theoretical orientations, this collection serves to showcase some of the productive ways to create synergy between Chinese

linguistic research and language education. *Remembering Simplified Hanzi 1* Army War College  
The recent rapid growth in China's involvement in Africa is being promoted by both Chinese and African leaders as being conducted in a spirit of cooperation, friendship and equality. In the media and informally, however, a different, less harmonious picture emerges. This book explores how China and Africa really regard each other, how official images are manufactured, and how informal images are nevertheless shaped and put forward. The book covers a wide range of areas where China-Africa exchange exists, including diplomacy, technological cooperation, sport, culture and arts exchange. The book also discusses the historical development of the relationship and how it is likely to develop going forward. *Learn to speak Mandarin: Improve wellbeing* Tuttle Publishing  
The Routledge International Handbook of Learning with Technology in Early Childhood focuses specifically on the most cutting-edge, innovative and international approaches in the study of children's use of and

learning with digital technologies. This edited volume is a comprehensive survey of methods in children's technologies and contains a rich repertoire of studies from diverse fields and research, including both educational and developmental psychology, post-humanist literacy, applied linguistics, language and phenomenology and narrative approaches. For ease of reference, the Handbook's 28 chapters are divided into four thematic sections: introduction and opening reflections; studies answering ontological questions, which theorize how children take on original identities in becoming literate with technologies; studies answering epistemological questions, which focus on how children's knowledge and learning are (co)constructed with a diverse range of technologies; studies answering practice-related questions, which explore the resources and conditions that create the most powerful learning opportunities for children. Expertly edited, this interdisciplinary and international compendium is an ideal introduction to such a diverse, multi-

faceted field.

## TEACHING AND LEARNING CHINESE

Routledge

Technology-Enhanced Teaching and Learning of Chinese as a Foreign Language Routledge

### Chinese Television and Soft Power

Communication in Australia Routledge

This book will give you the skills to learn to speak any language with confidence. It uses techniques that can easily be incorporated into your daily life, while making use of whatever resources you have available.

Whether you are starting out with your first foreign language or wishing to add to your repertoire, you'll find a wealth of easy-to-follow advice and achievable goals.

Discover how to: -Speak with greater confidence and accuracy -Effectively learn vocabulary and grammar -Use time on the internet and social media to learn a language -Read real books, websites and articles in a foreign language -Pass exams that certify your language skills

*Integrating Chinese Linguistic Research and Language Teaching and Learning* IGI Global Explains how to learn

foreign languages, offering practical advice for overcoming the obstacles.

### The Palgrave Handbook of Chinese Language Studies

IGI Global

For years, language teachers have increasingly been using technologies of all kinds, from computers to smartphones, to help their students learn. Current trends in TELTL (technology-enhanced language teaching and learning), such as artificial intelligence, virtual reality, augmented reality, gamification, and social networking, appear to represent major shifts in the digital language learning landscape.

However, various applications of technology to mediate language learning may be informed by reflecting not only on the present but perhaps more importantly on relevant insights from past research and practice. *Emerging Concepts in Technology-Enhanced Language Teaching and Learning* explores the recent development of the new technologies for language teaching and learning to gain insights into and synergy of the theories, pedagogies, technological

design, and evaluation of TELTL environments for comprehending the trends and strategies of the new digital era as well as investigate the possibility of future TELTL research direction. The book includes trends shaped by contemporary issues such as the COVID-19 pandemic. Covering topics such as digital education tools, L2 learnings, and sentiment analysis, this book serves as an essential resource for researchers, language teachers, educational software developers, administrators, IT consultants, technologists, professors, pre-service teachers, academicians, and students.

### Chinese Public Diplomacy

Anthem Press

The fun way to learn to speak Chinese With more than 1.2 billion speakers across the globe — and with nearly 3 million in the U.S. alone — Mandarin Chinese claims the top spot as the world's most common language. If you want to learn this language to get ahead at school or work, or to make your travel to China easier, this is the handy reference you'll want by your side. *Chinese For Dummies* teaches basic grammar, as well as the

necessary vocabulary to make introductions and greetings, use proper etiquette, make small talk, make transportation arrangements, order food and beverages, ask directions, deal with money, shop, access recreation, and handle an emergency. Concentrates on Mandarin Chinese and features new and revised content Includes major updates to all the necessary foundational information needed to speak Chinese Covers grammar, verb conjugations, and pronunciations Offers a refreshed mini-dictionary complete with even more vocabulary Find free conversational audio tracks online As the Chinese economy continues to grow, the importance of Chinese as a trade language will also increase. If you're a student or business professional who has a basic understanding of the language, you'll be poised to surpass your peers when it comes to dealing with international markets. So get started today!

**LEARNING MANDARIN  
CHINESE CHARACTERS  
VOLUME 1**

epubli

This volume promotes a thought-provoking discussion on contemporary issues surrounding the teaching of language and literacy based on first hand experiences and research. Drawing on the authors' experiences as teacher educators, language and literacy teachers, and researchers on literacy issues it brings together the multiple traditions. What makes the proposed volume unique is the common theme that runs through all the chapters: the examination of the term literacy, the complexity of this term and the importance of having a wide understanding of what it is before tackling educational issues of pedagogy, assessment and student engagement. What is more, as the editors argue, it is necessary to join up the dots and explore the commonalities that form the core of the literacy spectrum.

Learning by Doing Tuttle Publishing

In *Contemporary Urban Youth Culture in China: A Multiperspectival Cultural Studies of Internet Subcultures*, Jing Sun explores contemporary Chinese urban youth culture through analyses

of three Chinese Internet subcultural artifacts--A Bloody Case of a Steamed Bun, Cao Ni Ma, and Du Fu Is Busy. Using Douglas Kellner's (1995) multiperspectival cultural studies (i.e., critical theory and critical media literacy) as the theoretical framework, and diagnostic critique and semiotics as the analytical method, Sun examines three general themes-- resistance, power relations, and consumerism. The power of multiperspectival cultural studies, an interdisciplinary inquiry, lies in its potentials to explore contemporary Chinese urban youth culture from multiple perspectives; explore historical backgrounds and complexity of cultural artifacts to understand contradictions and trajectories of contemporary Chinese urban youth culture; recognize alternative medias as a space for contemporary urban Chinese youth to express frustrations and dissatisfactions, to challenge social inequalities and injustices, and to create dreams and hopes for their future; recognize that the intertextuality among cultural artifacts and

subcultures creates possibilities for Chinese urban youth to invent more alternative media cultures that empower them to challenge dominations, perform their identities, and release their imagination for the future; invite Chinese youth to be the change agents for the era but not to be imprisoned by the era; and overcome misunderstanding, misrepresentation, or underrepresentation of contemporary Chinese urban youth cultural texts to promote linguistic and cultural diversity in a multicultural, multilingual, and multiracial world. Sun argues that contemporary urban youth need to obtain critical media literacy to become the change agents in contemporary China. They need to be the medium of cultural exchanges in the multicultural, multilingual, and multiracial world. In order to best assist contemporary Chinese urban youth in expressing their voices, portraying their hopes, and performing their historical responsibilities as change agents, Sun sincerely hopes more research will be done on the contemporary Chinese urban youth culture, especially on its

contradictions and trajectories, with the intent to shed light on more richly textured, nuanced, and inspiring insights into the interconnection between contemporary Chinese urban youth and media power in an increasingly multicultural, multilingual, and multiracial world.

### **EASY PEASY CHINESE**

Innovative Language Learning

The COVID-19 pandemic has affected all aspects of our everyday lives – from the political to the economic to the social. Using a multimodal discourse analysis approach, this dynamic collection examines various discourses, modes and media in circulation during the early stages of the pandemic, and how these have impacted our daily lives in terms of the various meanings they express. Examples include how national and international news organisations communicate important information about the virus and the crisis, the public's reactions to such communications, the resultant (counter-)discourses as manifested in social media posts and memes, as well as the impact social distancing

policies and mobility restrictions have had on people's communication and interaction practices. The book offers a synoptic view of how the pandemic was communicated, represented and (re-)contextualised across different spheres, and ultimately hopes to help account for the significant changes we are continuing to witness in our everyday lives as the pandemic unfolds. This volume will appeal primarily to scholars in the field of (multimodal) discourse analysis. It will also be of interest to researchers and graduate students in other fields whose work focuses on the use of multimodal artefacts for communication and meaning making.

### **VIEWS FROM INSIDE**

Bentham Science Publishers

This book is a detailed reference guide on deep learning and its applications. It aims to provide a basic understanding of deep learning and its different architectures that are applied to process images, speech, and natural language. It explains basic concepts and many modern use cases through fifteen

chapters contributed by computer science academics and researchers. By the end of the book, the reader will become familiar with different deep learning approaches and models, and understand how to implement various deep learning algorithms using multiple frameworks and libraries. This book is divided into three parts. The first part explains the basic operating understanding, history, evolution, and challenges associated with deep learning. The basic concepts of mathematics and the hardware requirements for deep learning implementation, and some of its popular frameworks for medical applications are also covered. The second part is dedicated to sentiment analysis using deep learning and machine learning techniques. This book section covers the experimentation and application of deep learning techniques and architectures in real-world applications. It details the salient approaches, issues, and challenges in building ethically aligned machines. An approach inspired by traditional Eastern thought and wisdom is also presented. The final part covers

artificial intelligence approaches used to explain the machine learning models that enhance transparency for the benefit of users. A review and detailed description of the use of knowledge graphs in generating explanations for black-box recommender systems and a review of ethical system design and a model for sustainable education is included in this section. An additional chapter demonstrates how a semi-supervised machine learning technique can be used for cryptocurrency portfolio management. The book is a timely reference for academicians, professionals, researchers and students at engineering and medical institutions working on artificial intelligence applications.

**Camera** IGI Global Use this technology guide to find descriptions of today's most essential global technologies. Clearly structured and simply explained, the book's reference format invites even the casual reader to explore the stimulating innovative ideas it contains.

## **HOW TO LEARN A FOREIGN LANGUAGE**

Simon and Schuster This new major reference work provides a comprehensive overview of linguistic phenomena in a variety of Sinitic languages in a global context, highlighting the dynamic interaction between these languages and English. This "living reference work" offers a window into the linguistic sphere in China and beyond, and showcases the latest research into diverse and evolving linguistic phenomena that have resulted from intensified interactions between the Sinophone world and other linguaspheres. The Handbook is divided into five sections. The chapters in Section I (New Research Trends in Chinese Linguistic Research) present fast-growing research areas in Chinese linguistics, particularly those undertaken by scholars based in China. Section II (Interactions of Sinitic Languages) focuses on language-contact situations inside and outside China. The chapters in Section III (Meaning, Culture, Translation) explore the meanings of key cultural concepts, and how ideas

move between Chinese and English through translation across various genres. Section IV (New Trends in Teaching Chinese as a Foreign Language) covers new ideas and practices relating to teaching the Chinese language and culture. The final section, Section V (Transference from Chinese to English), explores dynamic interactions between varieties of Chinese and varieties of English, as they play out in multilingual sites and settings

### **TECHNOLOGY- ENHANCED TEACHING AND LEARNING OF CHINESE AS A FOREIGN LANGUAGE**

Routledge  
Learning to speak Chinese Mandarin can have beneficial effects on your health, especially your mental health, hence your overall wellbeing. This book makes learning Chinese Mandarin real easy because it uses an approach that children use to learn their mother tongue. Since one sixth of the world population lives in China, learning Chinese can improve your exchanges with a vast number of people This is of increasing importance

in a world that is more and more intertwined with economic and social networks.

### **Bowker's Complete Video Directory 2001**

Routledge  
Reinforce your written Chinese with this practice book for the best-selling Tuttle Learning Chinese Characters. Learning Mandarin Chinese Characters helps students quickly learn the basic Chinese characters that are fundamental to the language. Intended for self-study and classroom use, this character workbook presents 178 Chinese characters and over 534 common words using these characters. These are the characters and words students need to know if they plan to take the official Chinese government HSK Level 1 Exam or the Advanced Placement (AP) Chinese Language and Culture Exam. Each character is presented in a very simple and clear way. A step-by-step diagram shows how to write the character, and boxes are provided for freehand writing practice. The meaning and pronunciation are given along with the key vocabulary compounds and an example sentence. Review exercises

reinforce the learning process and an index at the back allow you to look up the characters according to their English meanings or romanized Hanyu Pinyin pronunciation. Key features of this Chinese workbook include:  
Designed for HSK Level 1 and AP exam prep  
Learn the 178 most basic Chinese characters  
Example sentences and over 534 vocabulary items  
Step-by-step writing diagrams and practice boxes

### Applying Mobile Technologies to Chinese Language Learning John Wiley & Sons

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be

even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and

help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering  
"This publication is like a bible for anyone serious

about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist  
About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.
