The Alcoholism and Drug Abuse Client Workbook Prentice Hall

Counseling Chemically Dependent People with HIV Illness describes frontline clinical treatment of HIV-infected chemically dependent persons. It provides a realistic view of what the daily work with this population is like. Specific, in-depth case examples and material give readers a solid understanding of how to work more effectively with chemically dependent clients infected with HIV. By concentrating on practical instead of theoretical aspects of treatment, this groundbreaking book helps practitioners better understand problems in treatment and shows different ways treatment can be given. Authors discuss and describe methods they use such as group work, drug and AIDS education, treatment teams, and the harm reduction model. Chapters address work with specific patient populations with the dual diagnosis of HIV and chemical dependency and describe treatment in a variety of modalities, such as outpatient, residential, or hospital setting. This timely book also includes helpful background material which introduces the complexities of work with this population through the story of one man's struggle with AIDS and alcohol and drug addiction.

Counseling Chemically Dependent People with HIV Illness also describes medical symptoms and problems of HIV-positive persons which gives non-medical counselors and therapists a preliminary understanding of what their patients may be undergoing physiologically. Other chapters focus on such topics as work with adolescents, short term group work in hospitals, HIV-infected persons on methadone maintenance, effective AIDS prevention with active drug users, and countertransference in professionals working with chemically dependent HIV clients. One of few books to address specifics of counseling and therapy with this difficult population, Counseling Chemically Dependent People with HIV Illness is an extremely valuable and helpful guide for substance abuse counselors, certified alcoholism counselors, psychiatrists, psychologists, and social workers working in the chemical dependency field.

Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include motivational interviewing, moral theory, developmental theory, cognitive behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention. *Substance Abuse and the Family* Jason Aronson The addiction field has long needed a comprehensive set of exercises counselors could use to guide patients through good treatment. This 12-step treatment plan workbook for those addicted to gambling includes identifying character defects and relapse prevention.

Substance Use Counseling John Wiley & Sons

Here is a valuable book to help professionals provide the most successful treatment for chemically dependent teenagers by examining the special conditions associated with adolescent chemical dependency. Counselors with experience in treating alcoholism and substance abuse need to have an awareness of the distinctive problems of adolescent chemical dependence that are related to their developmental nature. Such complicated problems as sexual abuse, eating disorders, addictive gambling, and membership in cults are discussed in their relationship to the treatment of the adolescent substance abuser. Special cases of the mentally impaired adolescent and the relapsing chemically dependent adolescent are also discussed in this remarkable volume. Treatment professionals will find encouragement for their work with adolescent clients in *Special Problems in Counseling the Chemically Dependent Adolescent*, which approaches counseling from a holistic perspective and perceives the family structure as an agent of change. The comprehensive chapters create a better understanding of the different addictions that affect the adolescent population and the pertinent factors that complicate the treatment of chemical addiction. The correlation between chemical abuse and child abuse in families is examined and strategies for treating adolescents suffering from chemical abuse and gambling addiction are suggested. A study of eating disorders among adolescents demonstrates the similarities in the etiology, treatment, and assessment of anorexia, bulimia, and compulsive eating, and the conditions resulting in chemical dependency. Experienced professionals counseling and working with adolescents will be able to provide more efficient treatment to their clients by utilizing the practical suggestions presented in this important book.
