The present volume examines the relationship between second language practice and what is known about the process of second language

acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources -

native speakers of the language - in real communication.

Dysfunction abounds in America in so many ways, from continuous turbulent change in the business environment, to a US federal government polarized by an inability to compromise and fulfill its historic missions, to personal levels where even deeper and darker levels of dysfunction reside within our colleagues, families,

friends, and ourselves. Can any of us survive and thrive against such a backdrop of unsettledness and anxiety? Deborah Lee James wants to help us try. As the 23rd Secretary and the “CEO” of the male-dominated US Air Force (only the second woman to lead a US military service), Secretary Deborah Lee James led a force of 660,000 people and managed a \$139 billion budget—larger than the GDP of more than 120 countries. In the midst of unprecedented political

dysfunction in Washington, she faced down enormous challenges, including preparing military women and men to fight terror in the Middle East, combatting sexual assault in the military, and responding to a crisis in the nuclear enterprise. In *Aim High: Chart Your Course and Find Success*, Deborah James shares her personal and professional challenges, outcomes, strategies for success, and the problem-solving principles she used to overcome the daunting

pressures, threats, and challenges that come with rising to the top of the US Armed Forces. As a supplement to her storytelling, Bain and Company, a top-tier management consulting firm, offers research and statistics that prove James’ insights have widespread impact. The book offers an insider’s view on how things really work in Washington—and how the author’s five-step, repeatable problem-solving approach can work in any walk of life. As a mother and wife,

Deborah James carried her insights and problem-solving skills home. For women in similar circumstances, her story will provide a powerful guidebook for excelling in both public and private life, and ensuring that their battles can be won and their challenges overcome.

The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness,

and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your

strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and

seemingly trite situations.

The definitive refutation to the argument of *The Bell Curve*. When published in 1981, *The Mismeasure of Man* was immediately hailed as a masterwork, the ringing answer to those who would classify people, rank them according to their supposed genetic gifts and limits. And yet the idea of innate limits—of biology as

destiny—dies hard, as witness the attention devoted to *The Bell Curve*, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through *The Bell Curve*. Further, he has added five essays on questions of *The Bell Curve* in particular and on

race, racism, and biological determinism in general. These additions strengthen the book's

claim to be, as Leo J. Kamin of Princeton University has said, "a

major contribution toward deflating pseudo-biological 'explanations' of our present social woes."
