This work provides a global survey of the methods used to transfer state-owned assets To The private sector. International Privatization gives a comprehensive account of current and planned privatization practice in leading countries throughout the world and provides expert analysis of legal, economic and political implications.

The Life of the Soviet Automobile Harlequin / SB Creative

'Straight Whisky' is the first book ever to chronicle all the music, magic and mayhem of the Sunset Strip. Erik Quisling and Austin Williams have created a unique multi-levelled portrait that is unlike any other rock book on record. With its sweeping historical analysis and down and dirty details, 'Straight Whisky' pulls no punches and leaves no stone unturned. Quisling has drawn upon extensive research to chronicle the ways in which music on the Sunset Strip has both shaped and reflected the American experience since 1964. Williams has chosen sixteen of the most memorable events from the period and developed them into dramatic narratives that offer an intensely intimate view of this incredible story. Together, along with dozens of rare photos and original interviews with the rock stars who were there when it all happened, these perspectives provide a comprehensive look at the most famous stretch of rock 'n' roll real estate on Earth: the famed 'rock block' of Sunset Boulevard. Here are the stories that have been whispered about for decades. Now they can be told out loud for the first time.

The World Encyclopedia of Tractors & Farm Machinery Cornell University Press

Production from tropical agricultural systems will need to increase to satisfy the rising food demand of an increasing population coupled with changes in consumption patterns. At the same time, the agricultural sector is a significant source of greenhouse gases (GHG) in many developing countries, which can be attributed mainly to land-use change and methane emissions from rice and livestock. But how can we reconcile less GHG emissions from tropical agricultural systems while increasing productivity? Due to the interactive nature of these issues, this book is compiled of articles on natural resource management, as well as the socio-economic aspects of GHG mitigation. The scope of mitigation options in tropical agriculture is

discussed for three different activities: (a) agroforestry; (b) rice-based production systems; (c) pasture/animal husbandry. Agronomic solutions alone will not be sufficient, as the institutional and economic frameworks within which farmers operate dictate whether a recommended agronomic management practice is acceptable. The prevention of deforestation, and the re-forestation of degraded land, could become key elements to national climate protection programs of some developing countries. Alternative management practices in rice-based and pasture systems may offer win-win options to reduce emissions and improve resource-use efficiencies.

The Decline of the Centre-Left in Comparative Perspective Springer

Natural processes and human activities alter the properties and quality of soils over time. Nowadays, the growing interest in soil protection prompts abundant research to estimate soil quality in wide-ranging environmental scenarios. The assessment of soil quality entails the evaluation of the capability of a soil to perform its functions in present scenarios but also how those functions can be preserved for future land use. Currently, soil processes, physical, chemical, and biological properties are recognized as indicators to estimate soil quality. Soil processes and current trends in quality assessment provides a wide depiction of current research conducted in soil quality assessment, encompassing general studies on soil processes, evaluation of significant indicators of soil quality such as soil organic matter dynamic and soil-plant interaction, while presenting diverse strategies for soil fitness amelioration.

The impact of climate on human activities and the effect of humans on cli mate are two of the most important areas of inquiry in climatology. These

interactions conducted through physical, chemical and biological processes were described as early as Roman and Greek times. Marcus Vitruvius (75-25 B. C.), a famous Roman engineer and architect, made the following observation about the climatic conditions necessary for founding a city: Land ideal for the health is slightly elevated and there should be neither fog nor frost. The direction of the slope and the distance to the swamps, lakes, and beaches must also be considered. The prevailing wind directions, observed by a wind tower at the center of the city, like Horologium at Athens, should be taken into consideration in city planning. The main and narrow streets should be placed in the middle angle of the two prevailing wind directions. Then the location of the Pantheons and squares should be decided. The influence of humans on climate was a major subject for discussion in the 19th century, inspired in part, by the rapid industrial growth and expanding deforestation of the time. D. L. Howard wrote brilliant pieces on the climate of London in the 1830s, while G. P. Marsh discussed the effects of forests on precipitation in the U. S. A. in the second half of the 19th century.

Fiat's first agricultural tractor was presented to the civil and military authorities of Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia. This book uses original photographic documentation to illustrate the origins and development of the company's agricultural products, tackling the technical and human aspects of a story that has seen the introduction of over 500 models since 1918. This is the first comprehensive study of the Turin-based firm's history in the agricultural sector. This updated edition includes all the new Holland new series presented from 2008 up to 2011.

Rules controlling State aid and subsidies on the EU and the WTO level can have a decisive influence on both regulatory and distributive decision-making. This field of law has grown exponentially in importance and complexity over the past decades. Rules on State aid and subsidies control are one of the key instruments to ensure that public spending and regulatory measures do not lead to discriminatory distortions of competition. As a consequence, hardly any part of national law is free from review under criteria of State aid and subsidy regulation. In turn, State aid and subsidies law is linked to economic, constitutional, administrative law of the EU and the Member States as well as to public international law. This book brings together leading experts from academia, the judiciary, civil servants from the European Commission, and practicing lawyers to provide expert opinion and commentary on the diverse dimensions of the complex and vital area of law. Critically analysing and explaining developments and current approaches in State aid law and subsidies, the chapters take into account not only the legal dimensions but also the economic and political implications. They address the EU law applicable to State aid in the aftermath of the recent State Modernization reform, and coverage includes: an in-depth analysis of the notion of State aid as interpreted by the Court's cases-law and the Commission's practice; the rules on compatibility of State aid with the internal market; the rules governing the procedure before the Commission; the litigation before the Court of Justice of the European Union; and analysis of the other trade defense instruments, including WTO subsidy law and EU anti-subsidy law.

Harlequin Comics Springer Science & Business Media

The automobile and Soviet communism made an odd couple. The quintessential symbol of American economic might and consumerism never achieved iconic status as an engine of Communist progress, in part because it posed an awkward challenge to some basic assumptions of Soviet ideology and practice. In this rich and often witty book, Lewis H. Siegelbaum recounts the life of the Soviet automobile and in the process gives us a fresh perspective on the history and fate of the USSR itself. Based on sources ranging from official state archives to cartoons, car-enthusiast magazines, and popular films, *Cars for Comrades* takes us from the construction of the huge "Soviet Detroits," emblems of the utopian phase of Soviet planning, to present-day Togliatti, where the fate of Russia's last auto plant hangs in the balance. The large role played by American businessmen and engineers in the checkered history of Soviet automobile manufacture is one of the book's surprises, and the author points up the ironic parallels between the Soviet story and the decline of the American Detroit. In the interwar years, automobile clubs, car magazines, and the popularity of rally races were signs of a nascent Soviet car culture, its growth slowed by the policies of the Stalinist state and by Russia's intractable "roadlessness." In the postwar years cars appeared with greater frequency in songs, movies, novels, and in propaganda that promised to do better than car-crazy America. Ultimately, Siegelbaum shows, the automobile epitomized and exacerbated the contradictions between what Soviet communism encouraged and what it provided. To need a car was a mark of support for industrial goals; to want a car for its own sake was something else entirely. Because Soviet cars were both hard to get and chronically unreliable, and such items as gasoline and spare parts so scarce, owning and maintaining them enmeshed citizens in networks of private, semi-illegal, and ideologically heterodox practices that the state was helpless to combat. Deeply researched and engagingly told, this masterful and entertaining biography of the Soviet automobile provides a new perspective on one of the twentieth century's most iconic—and important—technologies and a novel approach to understanding the history of the Soviet Union itself.

Soil Map of the World.... Verlag Barbara Budrich

The re-emerging field of ethnecology offers a promising way to document and analyze human-environment interactions. This collection brings the discipline into sharp focus, conveying local understandings of environments and proposing a way of looking at the relationship between humans and the natural world that emphasizes the importance of cognition in shaping behavior. Case studies by international experts explore the varied views of scholars on the human dimension of conversation and the different views of local peoples regarding their own environments. Filled with peoples' voices from North and South America, Africa, and Asia, these cases cover a range of issues: natural resource conservation and sustainable development, the relationship between local knowledge and biodiversity, the role of the commons in development, and the importance of diversity and equity in environmental management. As the only volume to address the status of this increasingly multidisciplinary field—especially as it relates to the differential power of multiple stakeholders—Ethnecology: Situated Knowledge/Located Lives is intended for a wide range of specialists not only in social and natural sciences but also in agricultural studies. It conveys the overriding importance of this powerful methodological approach in providing insiders' perspectives on their environment and how they manage it. CONTENTS 1. Introduction. A View from a Point: Ethnecology as Situated Knowledge, Virginia D. Nazarea 2. The Value of Subsistence for the Future of the World, Eugene S. Hunn 3. Practical and Religious Meanings of the Navajo Hogan, Lillie Lane 4. The Agronomy of Memory and the Memory of Agronomy: Ritual Conservation of Archaic Cultigens in Contemporary Farming Systems, Michael R. Dove 5. Ethnecology Serving the Community: A Case Study from Zuni Pueblo, New Mexico, Richard I. Ford 6. Lenses and Latitudes in Landscapes and Lifescapes, Virginia D. Nazarea 7. Cultural Landscapes and Biodiversity: The Ethnecology of an Upper Rio Grande Watershed Commons, Devon G. Peña 8. Conserving Folk Crop Varieties: Different Agricultures, Different Goals, Daniela Soleri and Steven E. Smith 9. Plant Constituents and the Nutrition and Health of Indigenous Peoples, Timothy Johns 10. Sustainable Production and Harvest of Medicinal and Aromatic Herbs in the Sierras de Córdoba Region, Argentina, Marta Lagrotteria and James M. Affolter 11. Managing the Maya Commons: The Value of Local Knowledge, Scott Atran 12. Safeguarding Traditional Resource Rights of Indigenous Peoples, Darrell A. Posey 13. A Practical Primer on Intellectual Property Rights in a Contemporary Ethnecological Context, David J. Stephenson, Jr. 14. This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

What Every Small, Medium and Large Business Needs to Know about Paying Federal Business Taxes Oxford University Press

In 1973 Las Vegas a two-bit film producer meets a low-rent hustler peddling a raunchy home movie starring Hollywood's most famous blonde. What looks like easy money, though, sends them running from Vegas to Tinsel Town to Tijuana and ultimately to a dangerous man who will solve their problems one way or another.

OCTOPUSES

Grindhouse director Sheldon Meyer is cultivating an obsession. He has just one hellish week to shoot "Crimson Orgy," seventy-six minutes of mayhem destined to become the world's most notorious cult movie... and just maybe the first true "snuff film" ever made. Struggling to cope with a reluctant starlet, a booze-ravaged leading man, a backwoods cop bent on revenge, a mutinous crew, a devastating hurricane, and his own inner demons, Meyer relentlessly pursues a vision of unrivaled box office horror. He gets what he's after, but at a price no one could imagine!
