Ingot for Die Casting - Mtlexs.comThis  
standard applies to all aluminum alloys  
for casting standardized in JIS H 5202  
and all types of aluminum alloys for  
casting standardized in ISO 3522 with  
the exception of materials for die  
casting. The material codes listed

distinguish between the two. Japanese  
Industrial Standards Data - Aluminum  
alloy ...In RM ALLOYS we offers Indian &  
International customers a wide range of  
aluminum alloys manufactured to  
various standards. Our aluminium alloys  
are produced in ingot form using the  
latest technologies. RML is capable of  
producing aluminium alloys which can  
meet the stringent national &  
international standards like IS, BS, JIS,  
DIN & ASTM and also as per customer  
specifications. Contact Us Various alloys

foils scraps are suitable to produce ingot  
grade ADC 1 by adding Si, grade ADC 3  
by adding Si, Mg, grade ADC 6 by adding  
Mg., grade ADC 10 by adding Si, Cu, Zn,  
grade ADC 12 by adding Si, Cu. However  
aluminium door alloy scraps are not  
suitable to produce aluminium  
ingot. Standard Aluminium Ingot  
Production From Aluminium  
ScrapsAluminium foundry alloys are  
used for aluminium castings. Gravita's  
production is based on Secondary  
aluminium. Consistent high metal quality

is ensured using top-grade raw materials and applying best practices. Our foundry alloys are produced to meet individual customer specifications in the main alloy groups meeting specifications in accordance with BS and JIS standards.

**Aluminium Alloys - Gravita Aluminium**  
This specification covers commercial aluminum alloys in ingot form for remelting and molten form for the manufacture of castings. The material shall be of uniform quality and shall be free from dross, slag, and other harmful contamination. The ingots or molten metal shall conform to the chemical composition limits specified.

**Standard Specification for Aluminum Alloys in Ingot and ...Alba's**  
standard ingots are ideal for downstream users who wish to re-melt this residual form of aluminium in their own furnaces, and then cast it to produce a variety of end products. The current total annual production capacity of our standard ingots stands at approximately 400,000 metric tonnes per annum.

**Standard Ingots - Aluminium Bahrain**  
CMR is the largest producer of Aluminium based Die Cast Alloys and Zinc Alloys in India. It has an annual production capacity of over 218,000 MT for Aluminium Alloys and 6,500 MT for Zinc Alloys.
