For some reason, which may be either arrogance or apathy, the British are very

slow to state their case to the world. At present the reasons for our actions and the methods which we have used are set forth in many Blue-books, tracts, and leaflets, but have never, so far as I know, been collected into one small volume. In view of the persistent slanders to which our politicians and our soldiers have been equally exposed, it becomes a duty which we owe to our national honour to lay the facts before the world. I wish someone more competent, and with some official authority, had undertaken the task, which I have tried to do as best I might from an independent standpoint.

Friendship is usually seen as a vital part of most people's lives in the West. From our friends, we hope to derive emotional support, advice and material help in times of need. In this pioneering book, basic assumptions about friendship are examined from a cross-cultural point of view. Is friendship only a western conception or is it possible to identify friends in such places as Papua New Guinea, Kenya, China, and Brazil? In

seeking to answer this question, contributors also explore what friendship means closer to home, from the bar to the office, and address the following: \* Are friendships voluntary? \* Should friends be distinguished sharply from relatives? \* Do work and friendship mix? \* Does friendship support or subvert the social order? \* How is friendship shaped by the nature of the person, gender, and the relationship between private and public life? \* How is friendship affected when morality is compromised by self-interest? This book represents one of the few major attempts to deal with friendship from a comparative perspective. In achieving this aim, it demonstrates the culture-bound nature of many assumptions concerning one of the most basic building-blocks of western social relationships. More importantly, it signposts the future of social relations in many parts of the world, where older social bonds based on kinship or proximity are being challenged by flexible ties forged when people move within local, national and increasingly global networks of social relations.

Musaicum Books presents to you this meticulously collection of hundreds of life stories, recorded interviews and incredible vivid testimonies of former slaves from the American southern states, including photos of the people being interviewed and their extraordinary narratives. After the end of Civil War in 1865, more than four million slaves were set free. There were several efforts to record the remembrances of the former slaves. The Federal Writers' Project was one such project by the United States federal government to support writers during the Great Depression by asking them to interview and record the myriad stories and experiences of slavery of former slaves. The resulting collection preserved

hundreds of life stories from 17 U.S. states that would otherwise have been lost in din of modernity and America's eagerness to deliberately forget the blot on its recent past.  Wilson's approach can be seen as a

communal romanticism, dealing with ordinary people, language, and problems, giving the priority to the feeling and human dignity over logic, power and money, putting freedom and equity as a pivotal concern, almost presenting women and children as victims, and highlighting the importance of heritage, identity, and culture. As his self-revision message, all those three plays demonstrate scenes of black self-review, showing the blacks' part of responsibility in the situation they live in. It is a project of self-rehabilitation for the blacks. Since American society is a multicultural spectrum, there is not any certain legibly ascribed American identity. That is why Wilson does not submit to the claims of the dominant cultural trend by some white critics like Brustein. Wilson confidently presents the blacks' identity typified with self-fulfilment and contribution to the American culture, as his alternative contributory image of man against the white dominant models, or the violent black ones.

 Shakespeare's Big Men examines five Shakespearean tragedies - Julius Caesar,

Hamlet, Othello, Macbeth, and Coriolanus - through the lens of generative anthropology and the insights of its founder, Eric Gans. Generative anthropology's theory of the origins of human society explains the social function of tragedy: to defer our resentment against the "big men" who dominate society by letting us first identify with the tragic protagonist and his resentment, then allowing us to repudiate the protagonist's resentful rage and achieve theatrical catharsis. Drawing on this hypothesis, Richard van Oort offers inspired readings of Shakespeare's plays and their representations of desire, resentment, guilt, and evil. His analysis revives the universal spirit in Shakespearean criticism, illustrating how the plays can serve as a way to understand the ethical dilemma of resentment and discover within ourselves the nature of the human experience.

An intimate portrait of two men who cherish the slim bond between them and the dream they share in a world marred by petty tyranny, misunderstanding, jealousy, and callousness. Clinging to each other in their loneliness and alienation, George and his simple-minded friend Lennie dream, as drifters will, of a place to call their own—a couple of acres and a few pigs, chickens, and rabbits back in Hill Country where land is cheap. But after they come to work on a ranch in the fertile Salinas Valley of California, their hopes, like “the best laid schemes o’ mice an’ men,” begin to go awry.
