The Autobiography of Nelson Mandela Theatre Communications Group

This book by Lionel Robbins first appeared in 1932 as an outstanding English-language statement of the Misesian view of economic method, namely that economics is a social science and must advance its propositions by means of deductive reasoning and not through the methods used in the natural sciences. The case is argued here with patience and attention to scholarly details. The unfortunate second edition of this book, which is more available today, introduces confusions by departing from Austrian microeconomic theory. Thus does the Mises Institute celebrate the 75th anniversary of the first edition with this reprint. "Reading Robbins," writes Samuel Bostaph of the University of Dallas, "is an excellent way of contrasting his explanation of the basic nature of economics with that of the Austrian School, as found in the work of Mises as an extension of Carl Mengers's foundations. Such a reading wonderfully clarifies one's understanding of the basic conception of economics as a science of human action, rather than one of mere 'economizing.'" *Researching the Philosophies of English Teachers* Abhinav Publications

An Essay on the Nature and Significance of Economic Science London : Macmillan

Isabel Archer, from Albany, New York, is invited by her maternal aunt, Lydia Touchett, to visit Lydia's rich husband, Daniel, at his estate near London, following the death of Isabel's father. There, Isabel meets her uncle, her friendly invalid cousin Ralph Touchett, and the Touchetts' robust neighbor, Lord Warburton.Isabel later declines Warburton's sudden proposal of marriage. She also rejects the hand of Caspar Goodwood, the charismatic son and heir of a wealthy Boston mill owner. Although Isabel is drawn to Caspar, her commitment to her independence precludes such a marriage, which she feels would demand the sacrifice of her freedom.The elder Touchett grows ill and, at the request of his son, Ralph, leaves much of his estate to Isabel upon his death. With her large legacy, Isabel travels the Continent and meets an American expatriate, Gilbert Osmond, in Florence. Although Isabel had previously rejected both Warburton and Goodwood, she accepts Osmond's proposal of marriage, unaware that it has been actively promoted by the accomplished but untrustworthy Madame Merle, another American expatriate, whom Isabel had met at the Touchetts' estate.Isabel and Osmond settle in Rome, but their marriage rapidly sours, owing to Osmond's overwhelming egotism and lack of genuine affection for his wife. Isabel grows fond of Pansy, Osmond's presumed daughter by his first marriage, and wants to grant her wish to marry Edward Rosier, a young art collector.The snobbish Osmond would prefer that Pansy accept the proposal of Warburton, who had previously proposed to Isabel. Isabel suspects, however, that Warburton may just be feigning interest in Pansy to get close to Isabel again, and the conflict creates even more strain within the unhappy marriage.Isabel then learns that Ralph is dying at his estate in England and prepares to go to him for his final hours, but Osmond selfishly opposes this plan. Meanwhile, Isabel learns from her sister-in-law that Pansy is actually the daughter of Madame Merle, who had had an adulterous relationship with Osmond for several years.Isabel pays a final visit to Pansy, who desperately begs her to return someday, which Isabel reluctantly promises to do. She then leaves, without telling her spiteful husband, to comfort the dying Ralph in England, where she remains until his death.Goodwood encounters her at Ralph's estate and begs her to

leave Osmond and come away with him. He passionately embraces and kisses her, but Isabel flees. Goodwood seeks her out the next day but is told she has set off again for Rome.The ending is ambiguous, and the reader is left to imagine whether Isabel returned to Osmond to suffer out her marriage in noble tragedy (perhaps for Pansy's sake), or if she is going to rescue Pansy and leave Osmond.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the

English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English for Academics (E4AC).

H.H. Munro's razor-toothed wit, discerning eye, and taste for the absurd are delightfully evident in this collection of little-known tales. In Saki's world, a despotic dog becomes his owner's master, a rural community is hoodwinked into believing in the predictive powers of a pair of friends, and Eve stubbornly refuses to touch the Forbidden Fruit. Although unquestionably of its time, each story ridicules the follies of society—follies still all too clearly familiar today. Best known to the world as Saki, Scottish writer Hector Hugo Munro won fame by skewering the British upper class in his chronicles of Clovis and Reginald.

"'Will you walk into my parlour,' said the Spider to the Fly..." is easily one of the most recognized and quoted first lines in all of English verse. But do you have any idea how the age-old tale of the Spider and the Fly ends? This enduring verse from Mary Howitt dates back to the nineteenth century, but its warning - to beware the wiles of flattery - remains today as relevant as ever. Now in its tenth year, celebrated artist Tony DiTerlizzi, drawing inspiration from his love of classic Hollywood horror movies of the 1920s and 1930s, shines a cinematic spotlight on Mary Howitt's warning, written to her own children about those who use sweet words to hide their not-so-sweet intentions. Featuring new jacket art and a commemorative poster this special 10th anniversary edition of the quintessential cautionary tale is a must have!

Bethan Marshall traces the competing traditions of English teaching and considers their relevance to the current debate through an analysis of English teachers' views about themselves and their subject. The findings are based on a highly original research method in which teachers were asked to respond to and comment upon five different descriptions of their approaches to English teaching. *English Teachers - The Unofficial Guide*: *contextualises current debates about English teaching within the subject's contested history *provides a vehicle for teachers to reflect on their own practice and locate themselves within the debate *opens up the debate on assessment practices within English teaching.
