

interested scholars. This book takes a new look at the relationship between such currents. It advances a discussion that started with the search for religious essences, archetypes, and universals, from William James to Eranos. The universal categories that resulted from that search were later criticized as essentialist constructions, and questioned by deconstructionists. An alternative explanation was advanced by diffusionists: that there were transfers between different traditions. This book presents empirical case studies of such constructions, and of transfers between Judaism, Christianity, and Islam in the premodern period, and Judaism, Christianity, and Western esotericism in the modern period. It shows that there were indeed transfers that can be clearly documented, and that there were also indeed constructions, often very imaginative. It also shows that there were many cases that were neither transfers nor constructions, but a mixture of the two.

Hyperkinetic movement disorders comprise a range of diseases characterized by unwanted and uncontrollable, or poorly controllable, involuntary movements. The phenomenology of these disorders is quite variable encompassing chorea, tremor, dystonia, myoclonus, tics, other dyskinesias, jerks and shakes. Discerning the underlying condition can be very difficult given the range and variability of symptoms. But recognizing the phenomenology and understanding the pathophysiology are essential to ensure appropriate treatment. Hyperkinetic Movement Disorders provides a clinical pathway for effective diagnosis and management of these disorders. The stellar international cast of authors distills the evidence so you can apply it into your practice. The judicious use of diagnostic criteria algorithms rating scales management guidelines Provides a robust framework for clear patient management. Throughout the text, QR codes* provide smartphone access to case-study videos of hyperkinetic symptoms. Purchase includes an enhanced Wiley Desktop Edition.* This is an interactive digital version featuring: all text and images in fully searchable form integrated videos of presentations View a sample video: www.wiley.com/go/albanese highlighting and note taking facilities book marking linking to additional references Hyperkinetic Movement Disorders provides you with the essential visual and practical tools you need to effectively diagnose and treat your patients. *Full instructions for using QR codes and for downloading your digital Wiley DeskTop Edition are inside the book.

A Historiographical Account Springer

This handbook fully investigates reverse shoulder arthroplasty (RSA), presenting all the recent advances in the field to enable shoulder surgeons to treat patients with complex conditions, such as rotator cuff tears and instability, failed surgery and combined arthritis, or proximal humerus neoplasia. Reverse shoulder arthroplasty is becoming increasingly common because conventional total shoulder replacement may cause pain, loss of strength, simple or complex disabilities as well as limited motion, reducing general quality of life. The goal of a reverse prosthesis is to restore a painless, biomechanically valid joint. Drawing on the results of recent studies, the book covers all relevant aspects of RSA, including basic science, pathogenesis, clinical and instrumental evaluation, surgical techniques and complication management, helping readers to better understand when and how reverse shoulder arthroplasty should be implanted and what to do in cases of poor results. Written by leading shoulder specialists, the book provides surgeons and rehabilitation specialists, as well as residents and shoulder fellows, with a valuable, state-of-the-art guide for clinical practice.

Tornos Amutio-Cazeneuve Springer

The original Handbook of Surface and Interface Analysis: Methods for Problem-Solving was based on the authors' firm belief that characterization and analysis of surfaces should be conducted in the context of problem solving and not be based on the capabilities of any individual technique. Now, a decade later, trends in science and technology appear

A Practical Guide : EU Funding, Other Support, EU Policy and Tourism Springer

This book sheds new light on neurodegenerative disorders as systemic diseases. Classically, neuronal cell death was a hallmark of such disorders. However, it has become evident that neural dysfunction is more important in the pathophysiology of neurodegenerative disorders. More recently, the prionoid-spreading hypothesis of disease-causing molecules has attracted a great deal of attention. Therapeutic strategies thus must be reconsidered in the light that neurodegenerative disorders are indeed systemic diseases. The first part of this book introduces the concept of neurodegeneration in biology and pathophysiology. The second part focuses on clinical evaluation and biomarkers from the perspective of this new concept, while the third summarizes the risk factors of neurodegeneration. The fourth part of this work indicates future

directions of treatment, and the final part discusses health promotion for prevention and quality of life. This book will be of interest to both researchers and medical personnel, and provides a fresh approach to neurodegenerative diseases, paving the way to new research and improved quality of health care for patients.

Esoteric Transfers and Constructions CRC Press

This book deals with the latest developments regarding urban and industrial wastewaters' adapted treatment with various technologies. It focuses, through valuable publications, on the shifting of the wastewater management paradigm from "treatment and disposal" to "the 4Rs principle: Reduce, Recycle, Reuse, and Recover". The adapted wastewater treatment step will allow (i) the disposal of supplementary water amounts that could be safely reused in order to tackle the water-scarcity problem, and (ii) the preservation of the environment against pollution. Finally, this book will contribute to the achievement of the United Nations Sustainable Development Goals and other international related initiatives.

Management in Business Springer Nature

In the decade and a half since the publication of the Second Edition of *A User's Guide to Vacuum Technology* there have been many important advances in the field, including spinning rotor gauges, dry mechanical pumps, magnetically levitated turbo pumps, and ultraclean system designs. These, along with improved cleaning and assembly techniques have made contamination-free manufacturing a reality. Designed to bridge the gap in both knowledge and training between designers and end users of vacuum equipment, the Third Edition offers a practical perspective on today's vacuum technology. With a focus on the operation, understanding, and selection of equipment for industrial processes used in semiconductor, optics, packaging, and related coating technologies, *A User's Guide to Vacuum Technology, Third Edition* provides a detailed treatment of this important field. While emphasizing the fundamentals and touching on significant topics not adequately covered elsewhere, the text avoids topics not relevant to the typical user.

A User's Guide to Vacuum Technology European Commission Directorate-General XVII Energy Summary 'The Economic Security of Business Transactions' covers such aspects as: management in the economic system; commercial risk in domestic and international transactions; an assessment of partners; unofficial economy and the state budget; economic security business; the role and importance of law in business. The book looks at the threats and risks arising from international trade and operating leading businesses, plus the role of the State. It examines the required new forms, methods and approaches for management. This has significant implications for the businesses concerned and the State's role. 'The Economic Security of Business Transactions' includes coverage of internal company factors, tax evasion and tax avoidance; the book also looks at the level of involvement of the State (especially the EU's Common Market). This leads to abuses and distortions in the area of the competitiveness of enterprises and countries' competitiveness; it also changes the perception of contemporary economic security. This book is an attempt to point to the example of single countries, the European Community, and on a global scale - what is the efficiency of national economic systems and how the associated risks impact upon economic trade disorders. Key Features Contains contributions from some of the world's leading researchers. Has an interdisciplinary character - based on economics, management and law. Shows and defines real threats and risks which occur in economic trade. The Authors Konrad Raczkowski is Professor of Management, who specializes in the unofficial economy, public finances and management in the economic system. He is a Director of Economic Institute in University of Social Sciences in Warsaw; he was Head of the Department of the Economic Security Management. Between 2003 and 2013 he worked in the finance department. He was also the advisor and consultant to governmental institutions, entrepreneurs and the European Anti-Fraud Office in Brussels (OLAF). He has qualifications as an internal auditor of integrated management systems. Professor Raczkowski is a member of British Academy of Management and since 2008 he has been an associate of the Institute for Security and Development Policy in Stockholm. Friedrich Schneider is Professor of Economics at the Department of Economics at the Johannes Kepler University of Linz in Austria. He is recognized as a leading authority in the field of studies on the shadow world economy. He has conducted research and lectures, among institutions such as the Universities of Yale, Princeton, Virginia, Stockholm, Zurich, Carnegie Mellon and Aarhus. In the years 1997-1999 he was the President of the Austrian Economic Association and in 2005-2008 the President of the German Economic Association. He has advised many governments, entrepreneurs and the European Commission. He is the author or co-author of hundreds of publications, including 62 books published in many languages. Professor Schneider's research interests focus on the theory

of economic policy, finance and the analysis of economic consequences of government intervention. Readership Scientists and researchers of national economy and unofficial economy; people experienced in the management (public and business); entrepreneurs; and students Contents PART I. SHADOW ECONOMY AND TAX EVASION CHAPTER 1 Size and development of the shadow economy and of tax evasion within Poland and of its neighbouring countries from 2003 to 2013: some new facts (Friedrich Schneider and Konrad Raczkowski) CHAPTER 2 How to curtail Poland's shadow economy: the viewpoints of business and tax authorities (Bogdan Mróz and Mariusz Sokolek) CHAPTER 3 Shadow banking versus the shadow economy in Poland (Jan K. Solarz) CHAPTER 4 Why VAT carousel crime schemes are almost impossible to prosecute in Poland? (Czesław J. Drzejek, Jacek Wi. ckowski, Maciej Nowak and Jarosław Bak) CHAPTER 5 The latest changes in the French tax evasion policy and its influence on economic and financial security (Urszula Zawadzka-Pak) PART II. ECONOMY AND BUSINESS TRANSACTIONS CHAPTER 6 The idea of homo oeconomicus and the role of culture in the economy (Marian Noga) CHAPTER 7 The implications of tax competition and "race to the bottom" for economic growth (Jolanta Szolno-Koguc and Małgorzata Twarowska) CHAPTER 8 Correct planning of budget revenue as an essential condition for secure business transactions (Eugeniusz Ruskowski) CHAPTER 9 The effects of public transfers on an economic system (Marta Postula) CHAPTER 10 The role of marketing information in the assessment of a contractor's credibility in business negotiations (Bogdan Gregor and Magdalena Kalinska-Kula) CHAPTER 11 Implementation of the business counterintelligence branch in enterprise structure (Miroslaw Kwiec_ ski and Krzysztof Passella) CHAPTER 12 Systematization of risk in internal and international markets (Katarzyna Zukrowska) CHAPTER 13 The role of the supreme audit office in tackling corruption and other types of organisational pathologies (Zbysław Dobrowolski) CHAPTER 14 Analysis of state bank guarantees offered to enterprises by national bank holdings and system solutions in selected countries (Dorota Ostrowska) CHAPTER 15 Common banking supervision within the financial safety net (Beata Domanska-Szaruga) CHAPTER 16 Crisis management in the global economy (Robert Dygas) PART III. MANAGEMENT AND ECONOMIC SECURITY CHAPTER 17 Business Process Management as a way to achieve national economic security (Piotr Senkus) CHAPTER 18 Collaborative networks as a basis for internal economic security in sustainable local governance. The case of Poland (Barbara Kozuch and Katarzyna Sienkiewicz-Malyjurek) CHAPTER 19 Changes in European foreign trade in the context of economic security (Agnieszka Głodowska) CHAPTER 20 The impact of non-military threats to economic security (Andrzej Limanski, Zbigniew Grzywna and Ireneusz Drabik)

This is a comprehensive and authoritative presentation of total intravenous anesthesia (TIVA) and target controlled infusion (TCI). The editors' international reputation has enabled them to recruit leading experts from around the world to write single-author chapters in their area of expertise. Total Intravenous Anesthesia and Target Controlled Infusions is the first multi-disciplinary, globally authored volume on the topic. Providing a single source of information on all aspects of TIVA and TCI, from pharmacologic modeling and the pharmacology of intravenous anesthetic drugs to practical considerations in the clinical setting and the requirements of special populations, Total Intravenous Anesthesia and Target Controlled Infusions examines the debate about the risks and advantages of TIVA, analyze outcome studies, and provides guidance on creating a curriculum to teach TIVA and TCI.

Principles, Mechanisms and Practices Springer

This comprehensive book covers the knowledge needed to diagnosis and treat patients with acute

and chronic pain. Sections dedicated to patient evaluation, medication management, treating patients with more complex circumstances and interventional management provide clinically-relevant information on an array of topics relevant to both the generalist and specialist. Some
