There's only one way to solve this problem - a mating. When Emma approaches Zohr to claim him as hers, she realizes just what it means to be a dragon's mate, and how much she's in over her head...And she learns how fiercely possessive a drakoni male can be.

Words of Radiance Macmillan

From #1 New York Times bestselling author Brandon Sanderson, the Mistborn series is a heist story of political intrigue and magical, martial-arts action. For a thousand years the ash fell and no flowers bloomed. For a thousand years the Skaa slaved in misery and lived in fear. For a thousand years the Lord Ruler, the "Sliver of Infinity," reigned with absolute power and ultimate terror, divinely invincible. Then, when hope was so long lost that not even its memory remained, a terribly scarred, heart-broken half-Skaa rediscovered it in the depths of the Lord Ruler's most hellish prison. Kelsier "snapped" and found in himself the powers of a Mistborn. A brilliant thief and natural leader, he turned his talents to the ultimate caper, with the Lord Ruler himself as the mark. Kelsier recruited the underworld's elite, the smartest and most trustworthy allomancers, each of whom shares one of his many powers, and all of whom relish a high-stakes challenge. Only then

does he reveal his ultimate dream, not just the greatest heist in history, but the downfall of the divine despot. But even with the best criminal crew ever assembled, Kel's plan looks more like the ultimate long shot, until luck brings a ragged girl named Vin into his life. Like him, she's a half-Skaa orphan, but she's lived a much harsher life. Vin has learned to expect betrayal from everyone she meets, and gotten it. She will have to learn to trust, if Kel is to help her master powers of which she never dreamed. This saga dares to ask a simple question: What if the hero of prophecy fails? Legion Macmillan

The shocking conclusion to Brandon Sanderson's Legion novella series, on its own for the first time. Stephen Leeds is perfectly sane. It's his hallucinations who are mad. A genius of unrivaled aptitude, Stephen can learn any new skill, vocation, or art in a matter of hours. However, to contain all of this, his mind creates hallucinatory people—Stephen calls them aspects—to hold and manifest the information. Wherever he goes, he is joined by a team of imaginary experts to give advice, interpretation, and explanation. He uses them to solve problems . . . for a price. When Stephen gets an unexpected cry for help from the woman who taught him how to control his aspects—right when one of his aspects suddenly and violently disappears—it will send him on a case the likes of which he could never have imagined. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Final Empire Macmillan

Allie Carmichael has always believed life is simple. You're born. You live. You die.She has no cause

to believe that equation works differently for her, but there has to be a reason the world treats her like a pariah. What happens when the most important man in the world is forced to have dinner with the most important woman in the world? *DARK ONE, BOOK 1* Dragonsteel Entertainment

A novella from #1 New York Times bestselling author Brandon Sanderson, Legion is a fast-paced, witty, and supremely fun thriller with a psychological bent. Stephen Leeds is perfectly sane. It's his hallucinations who are mad. A genius of unrivaled aptitude, Stephen can learn any new skill, vocation, or art in a matter of hours. However, to contain all of this, his mind creates hallucinatory people—Stephen calls them aspects—to hold and manifest the information. Wherever he goes, he is joined by a team of imaginary experts to give advice, interpretation, and explanation. He uses

them to solve problems...for a price. His brain is getting a little crowded, however, and the aspects have a tendency of taking on lives of their own. When a company hires him to recover stolen property—a camera that can allegedly take pictures of the past—Stephen finds himself in an adventure crossing oceans and fighting terrorists. What he discovers may upend the foundation of three major world religions—and, perhaps, give him a vital clue into the true nature of his aspects. ----- A note from the publisher: Brandon will send a free copy of this ebook to anyone who purchased the Subterranean Press hardcover. Shadows for Silence in the Forests of Hell Dragonsteel Entertainment

From #1 bestselling author Brandon Sanderson and Janci Patterson comes the second of three *Skyward* series novellas, set between *Starsight* and *Cytonic*. "Don't trust their lies. Don't trust their false peace." That is the warning that Alanik of the planet ReDawn told the human pilot Spensa after Alanik's ship crash-landed on Detritus. While accepting an invitation to meet with her people's enemy, the Galactic Superiority, Alanik heard Spensa's cry for help across the vastness of space, and she used her cytonic powers to hyperjump her ship to the source of that cry. What she found there was a shock—a whole planet of free humans fighting against the Superiority. Could they be the allies her people desperately needed? When she recovered from her injuries and met the friendly humans Jorgen and FM of *Skyward Flight*, she found that her warning to Spensa had gone unheeded by the government of Detritus, and they were considering a peace overture from the Superiority. Now having returned to ReDawn, Alanik is dismayed to learn that her own people are falling into the exact same trap. The faction in ReDawn's government that wants to appease the Superiority has gained the upper hand. With Alanik's mentor Renakin captured, she has no one to turn to but Jorgen, FM, and their friend Rig. An ancient technology may have the power to save both of their planets from disaster, but can they discover its secrets before it's too late?

Book Two of the Stormlight Archive HarperCollins

"Do yourself a favor and read this book. This story is original and hard-hitting with terrific world building and some of the best characters I've read. Yum." Patricia Briggs, author of the #1 *NYTimes* *Mercy Thompson* series Kit Colbana—half breed, assassin, thief, jack of all trades—has a new job: track down the missing ward of one of the local alpha shapeshifters. It should be a piece of cake. So why is she so nervous? It probably has something to do with the insanity that happens when you deal with shifters—especially sexy ones who come bearing promises of easy jobs and easier money. Or maybe it's all the other missing kids that Kit discovers while working the case, or the way her gut keeps screaming she's gotten in over her head. Or maybe it's because if she fails—she's dead. If she can stay just one step ahead, she should be okay. Maybe she'll even live long to collect her fee...

Infinity Blade Orion Children's Books

From #1 *New York Times* bestselling author Brandon Sanderson, Stephen Leeds is back in a new, double-length novella that *Library Journal* says has "the pulse of a thriller and the hook of a fascinating hero balancing on the edge of psychosis." It's not his own genius that Stephen Leeds gets hired for. Clients want to tap into the imaginary experts that populate his mind—and it's getting a bit crowded in there. Now Stephen and his internal team of "aspects" have been hired to track down a stolen corpse—but it's not the corpse that's important, it's what the corpse knows. The biotechnology company he worked for believes he encoded top-secret information in his DNA before he died, and if it falls into the wrong hands, that will mean disaster. Meanwhile, Stephen's uneasy peace with his own hallucinations is beginning to fray at the edges, as he strives to understand how one of them could possibly have used Stephen's hand to shoot a real gun during the previous case. And some of those hallucinations think they know better than Stephen just how many aspects his mind should make room for. How long will he be able to hold himself together?

Centuries before Spensa looked skyward from the planet *Detritus*—back on Old Earth before it was lost—Jason Write faced a crucial question: was humanity ready to join galactic society? When faster-than-light communications were discovered by a small telephone company in 2071, alien species such as the *Tenasi* and *Varvax* overheard them and came to visit Earth. Because the Phone Company controls all communications with the aliens, their operatives like Jason operate above the law. Now, on the space platform *Evensong*, one of the Phone Company's scientists has gone missing before surfacing in a hospital with amnesia, and Jason is sent to investigate. Right as he arrives, the body of a murdered *Varvax* ambassador is discovered, sure to cause a galactic incident. *Coln Abrams* of the *United Intelligence Bureau* seizes the opportunity to investigate Jason as he deals with the crisis. This could be the *UIB*'s chance to discover the Phone Company's secrets—how does *FTL* communication work, and what is Jason hiding? Winner of Spain's *UPC Award for Science Fiction* in 2007.

A Post-Apocalyptic Dragon Romance Macmillan

A scavenger robot wanders in the wasteland created by a war that has destroyed humanity in this evocative post-apocalyptic "robot western" from the critically acclaimed author, screenwriter, and noted film critic. It's been thirty years since the apocalypse and fifteen years since the murder of the last human being at the hands of robots. Humankind is extinct. Every man, woman, and child has been liquidated by a global uprising devised by the very machines humans designed and built to serve them. Most of the world is controlled by an *OVI*—*One World Intelligence*—the shared consciousness of millions of robots, uploaded into one huge mainframe brain. But not all robots are

willing to cede their individuality—their personality—for the sake of a greater, stronger, higher power. These intrepid resisters are outcasts; solo machines wandering among various underground outposts who have formed into an unruly civilization of rogue *AI*s in the wasteland that was once our world. One of these resisters is *Brittle*, a scavenger robot trying to keep a deteriorating mind and body functional in a world that has lost all meaning. Although unable to experience emotions like a human, *Brittle* is haunted by the terrible crimes the robot population perpetrated on humanity. As *Brittle* roams the *Sea of Rust*, a large swath of territory that was once the Midwest, the loner robot slowly comes to terms with horrifyingly raw and vivid memories—and nearly unbearable guilt. *Sea of Rust* is both a harsh story of survival and an optimistic adventure. A vividly imagined portrayal of ultimate destruction and desperate tenacity, it boldly imagines a future in which no hope remains, yet where a humanlike *AI* strives to find purpose among the ruins.
