An Introduction to Accounting & Financial Management SAGE Publications India

Revised edition of: *Cases in healthcare finance* / Louis C. Gapenski, George H. Pink. Fifth edition. [2014]

APPLIED PROBLEM-SOLVING IN HEALTHCARE MANAGEMENT

Springer Publishing Company

The essential concepts of both accounting and financial management are covered in this best-selling healthcare finance book. Through clear explanations, numerous examples, and realistic practice problems, it arms future managers with the grounding they need to make financially sound decisions for their healthcare organizations. This thoroughly updated edition provides more emphasis on the unique marketplace for healthcare services and additional examples from nonhospital settings, including medical practices, clinics, home health agencies, nursing homes, and managed care organizations.

CASES IN HEALTHCARE FINANCE, SEVENTH EDITION

Jones & Bartlett Learning

As the first title in the Essential Public Health series, *Essentials of Environmental Health* is a clear and comprehensive study of the major topics of environmental health, including: background of the field and "tools of the trade" (environmental epidemiology, environmental toxicology, and environmental policy and regulation); environmental diseases (microbial agents, ionizing and non-ionizing radiation); and applications and domains of environmental health (water and air quality, food safety, waste disposal, and occupational health). Perfect for the beginning student as well as the experienced health professional, each chapter concludes with study questions and exercises to engage the reader in further study. The forthcoming companion website for this edition will provide additional resources and learning aids, including PowerPoints, an instructor's manual, test questions, and flashcards.

Public Health 101: Improving Community Health Stanford University Press

"In orchestrating this book, Dr. Salvendy invited contributions from more than 100 of the foremost authorities around the world. Each of its 60 chapters was reviewed by an international advisory panel comprised of some of today's leading figures in human factors and ergonomics. While each chapter establishes the theoretical and empirical foundations of the subject under discussion, the book's approach is primarily applications-oriented. Hence throughout readers will find case studies, examples, figures, and tables that optimize the usability of the material presented." "It is an indispensable tool for human factors and ergonomics specialists, safety and industrial hygiene professionals and engineers, human resource professionals and managers in manufacturing and service industries, and for educational institutions and government."--BOOK JACKET.

Transforming Health Care Jones & Bartlett Publishers

This book provides a balanced assessment of pay for performance

(P4P), addressing both its promise and its shortcomings. P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators, despite limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy—such as those for capitation and managed care in the 1990s—that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date, and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a "second generation" of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.

Capital investment in European health systems has to take account of an array of challenges and opportunities: the demographic and epidemiological transitions associated with an ageing population; advances in medical technologies and pharmaceuticals; rising public expectations; and persistent health inequalities. This volume presents 11 case studies from across Europe and these offer a variety of perspectives on current issues relating to health capital investment and ways of trying to meet present challenges as well as those of the future. The case studies include the Orbis Medical Centre, Sittard, and the Martini Hospital, Groningen (both in the Netherlands); the St Olav's Hospital in Trondheim (Norway); the New Karolinska Solna Hospital in Stockholm (Sweden); the Coxa Hospital in Tampere (Finland); the Rhön Klinikum Group (Germany); the John Paul II Hospital in Krakow (Poland); the Alzira model in the Valencia region (Spain); regional planning in Northern Ireland and Tuscany (Italy); and the Private Finance Initiative (England).

Healthcare Quality Management Jones & Bartlett Publishers In October 2016, the Council on Education in Public Health (CEPH) released new competencies that all accredited Master of Public Health (MPH) programs must adhere to. *Master of Public Health Competencies: A Case Study Approach* covers each of the 22 required competencies to demonstrate how they can be applied in public health practice. Spanning all five key disciplines of Public Health - biostatistics, epidemiology, health policy and management; social and behavioral sciences; and environmental and occupation health - *Master of Public Health Competencies* covers the full breadth of public health. Each chapter is focused on a single CEPH competency and provides the background of the public health issue, followed by a case study to learn that competency and understand its application. Written by MPH faculty and community practitioners and based on real world public practice, these concise case studies are accompanied by discussion questions that facilitate classroom discussion.
