During the 18th century, visitors would come and attend the British Parliament sessions in order to understand how a representative assembly could technically function, because politics is not only about ideas, but also a lot about practices and techniques. A great deal has been written on the circulation of political ideas during the 19th century, and on the part played by exiles, refugees and military volunteers in this intellectual mobility. However, less is known of what constitutes, in the end, politics: not only ideas, but practices, the material implementation of politics. How does one debate, vote, or demonstrate? What is political representation? How does one “start” a political party, and run it? All the political engineering, of the 19th century, the period of the birth of modern politics, has been the result of an intense circulation of exiles, which, along with bringing in new ideas, borrowed new ways of “making politics”. This is what this book contemplates through a wide range of examples showing how exile turned out to be, during the century of the revolutions, the laboratory of a new political grammar and of political practices resulting in the cross-fertilization between host countries and exiled communities.

While contemporary scholars have taken a great interest in diversity or heterogeneity, this model is relatively new and literature of the past is still crying out for its place in the diversity model. This book models five different decolonizing methods to examine both indigenous writing and representations of indigenous peoples by learned elites.

Cuando Sarmiento escribió el Facundo quiso relatar a través de la biografía del caudillo riojano la historia de un pueblo, el que expresaba Juan Facundo Quiroga. Este aspecto valioso del Facundo, al considerar al caudillo como expresión del pueblo, no fue tomado en cuenta por la historiografía argentina. La influencia de Sarmiento proyectó la leyenda del Facundo como historia, a tal punto que muchos investigadores, tomaron como ciertos los datos que Sarmiento incorporaba sin ninguna base documental. *Expanding Borders* LIT Verlag Münster

"The Oxford Handbook of Comparative Political Theory provides an entry point into this burgeoning field by both synthesizing and challenging the terms that motivate it. The handbook demonstrates how mainstream political theory can and must be enriched through attention to genuinely global, rather than parochially Euro-American, contributions to political thinking. Entries emphasize exploration of substantive questions about political life-ranging from domination to political economy to the politics of knowledge-in a range of global contexts, with attention to whether and how those questions may be shared, contested, or reformulated across differences of time, space, and experience.

They connect comparative political theory to cognate disciplines including postcolonial theory, area studies, and comparative politics. Creative organizational tools such as tags and keywords aid in navigation of the handbook to help readers trace disruptions, thematic connections, contrasts, and geographic affinities across entries"--

Domingo Faustino Sarmiento, president of Argentina from 1868 to 1874, is best known as an educator and as the author of *Civilization and Barbarism: The Life of Juan Facundo Quiroga*, generally referred to as *El Facundo*. The contributors to this volume call attention to other facets of Sarmiento's life and to the results of the programs he encouraged. Each contributor has his or her own image of Sarmiento, but whether re-assessing him as a writer, a thinker, or as an advocate of democracy and economic development, all are aware of how the underlying theme of *El Facundo* - the clash between urban and rural worlds, between civilization and barbarism - influenced his outlook. Their essays add to our knowledge not only of Sarmiento, but also of a key transitional period in Argentina's development.

Nonfictional Romantic Prose: *Expanding Borders* surveys a broad range of expository, polemical, and analytical literary forms that came into prominence during the last two decades of the eighteenth century and the first half of the nineteenth. They stand in contrast to better-known romantic fiction in that they endeavor to address the world of daily, empirical experience rather than that of more explicitly self-referential, fanciful creation. Among them are genres that have since the nineteenth century come to characterize many aspects of modern life like the periodical or the psychological case study; others flourished and enjoyed widespread popularity during the nineteenth century but are much

less well-known today like the almanac and the diary. Travel narratives, pamphlets, religious and theological texts, familiar essays, autobiographies, literary-critical and philosophical studies, and discussions of the visual arts and music all had deep historical roots when appropriated by romantic writers but prospered in their hands and assumed distinctive contours indicative of the breadth of romantic thought. SPECIAL OFFER: 30% discount for a complete set order (5 vols.).The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration. The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived, yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World, but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism. A glance at the index of each volume quickly reveals the extraordinary richness of the series' total contents. Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of [irony] as one of the major impulses in the Romantic philosophical and artistic revolution, and by combining cross-cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams. Romantic Drama traces creative innovations that deeply altered the understanding of genre at large, fed popular imagination through vehicles like the opera, and laid the foundations for a modernist theater of the absurd. Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments. Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse, including Romanticism's own self-commentary in theoretical statements on the arts, society, life, the sciences, and more. Nor are the discursive dimensions of imaginative literature neglected in the closing volume, Romantic Prose Fiction, where the basic Romantic themes and story types (the romance, novel, novella, short story, and other narrative forms) are considered throughout Europe and the New World. This enormous realm is seen not just in terms of Romantic theorizing, but in the light of the impact of Romantic ideas and narration on later generations. As an aid to readers, the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix. No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the [Old] and [New] Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries, a heritage still very close to our age. *Theorizing Race in the Americas* Vida de Abran LincolnDecimo Sesto Presidente de Los Estados UnidosHardcover reprint of the original 1866 edition - beautifully bound in brown cloth covers featuring titles stamped in gold, 8vo - 6x9". This book provides the first English translation of Argirópolis (1850) by the Argentine Domingo F. Sarmiento, one of the most important political and cultural figures of nineteenth-century Latin America. Argirópolis proposes the union of Argentina, Paraguay, and Uruguay into the United States of South America or the United States of the Río de la Plata, with a capital on Martín García island. It anticipates some aspects of the continent's future, such as the formation of Mercosur (the Southern Common Market) in 1991. Argirópolis explores politics, modernity, and nation formation, making Sarmiento's treatise one of Argentina and Latin America's most relevant programmatic texts. Presented alongside a critical introduction that situates the essay in its historical and political contexts, this translation allows English-speaking readers to explore nineteenth-century Latin American perspectives on concepts such as the nation-state, sovereignty, progress, space, and modernity.

Most papers were published in the journal *Historiographia Linguistica*; they were complemented with a few invited papers.

"A book as fascinating as the history it relates . . . Galeano is a satirist, realist, and historian." —Los Angeles Times For centuries, Europe's imperial powers brutally exploited the peoples and resources of the New World. While soldiers of fortune marched across continents in search of El Dorado, white settlers established plantations and trading posts along the coasts, altering the land and bringing disease and slavery with them. In the midst of a bloody collision of civilizations, the West has birthed new societies out of the old. In the second book of his Memory of Fire trilogy, Eduardo Galeano forges a new understanding of the Americas, history retold from a diverse collection of viewpoints. Spanning the end of empire and the age of revolutions, *Faces and Masks* brilliantly collects the strands of the past into an iridescent work of literature.

Many scholars assert that Mexico's complex racial hierarchy, inherited from Spanish colonialism, became obsolete by the turn of the nineteenth century as class-based distinctions became more prominent and a largely mestizo population emerged. But the residues of the colonial caste system did not simply dissolve after Mexico gained independence. Rather, Ana Sabau argues, ever-present fears of racial uprising among elites and authorities led to persistent governmental techniques and ideologies designed to separate and control people based on their perceived racial status, as well as to the implementation of projects for development in fringe areas of the country. *Riot and Rebellion in Mexico* traces this race-based narrative through three historical flashpoints: the Bajío riots, the Haitian Revolution, and the Yucatan's caste war. Sabau shows how rebellions were treated as racially motivated events rather than political acts and how the racialization of popular and indigenous sectors coincided with the construction of "whiteness" in Mexico. Drawing on diverse primary sources, Sabau demonstrates how the race war paradigm was mobilized in foreign and domestic affairs and reveals the foundations of a racial state and racially stratified society that persist today.

This book traces the impact of exile in the formation of independent republics in Chile and the Río de la Plata in the decades after independence. Exile was central to state and nation formation, playing a role in the emergence of territorial borders and Romantic notions of national difference, while creating a transnational political culture that spanned the new independent nations. Analyzing the mobility of a large cohort of largely elite political émigrés from Chile and the Río de la Plata across much of South America before 1862, Edward Blumenthal reinterprets the political thought of well-known figures in a transnational context of exile. As Blumenthal shows, exile was part of a reflexive process in which elites imagined the nation from abroad while gaining experience building the same state and civil society institutions they considered integral to their republican nation-building projects.

The nations of Latin America came into being without a strong sense of national purpose and identity. In *The Invention of Argentina*, Nicholas Shumway offers a cultural history of one nation's efforts to determine its nature, its destiny, and its place among the nations of the world. His analysis is crucial to understanding not only Argentina's development but also current events in the Argentine Republic.

In *The Senses of Democracy*, Francine R. Masiello traces a history of perceptions expressed in literature, the visual arts, politics, and history from the start of the nineteenth century to the present day. A wide transnational landscape frames the book along with an original and provocative thesis: when the discourse on democracy is altered—when nations fall into crisis or the increased weight of modernity tests minds and nerves—the representation of our sensing bodies plays a crucial role in explaining order and rebellion, cultural innovation, and social change. Taking a wide arc of materials—periodicals, memoirs, political proclamations, and travel logs, along with art installations and fiction—and focusing on the technologies that supplement and enhance human perception, Masiello looks at the evolution of what she calls "sense work" in cultural texts, mainly from Latin America, that wend from the heights of romantic thought to the startling innovations of modernism in the early twentieth century and then to times of posthuman experience when cyber bodies hurtle through globalized space and human senses are reproduced by machines. Tracing the shifting debates on perceptions, *The Senses of Democracy* offers a new paradigm with which to speak of Latin American cultural history and launches a field for the comparative study of bodies, experience, pleasure, and pain over the continental divide. In the end, sense work helps us to understand how culture finds its location.
