I may not have a musical gift of my own, but I've got a nose for talent and an eye for the extraordinary. And Marlon James - Grip to his fans - is nothing short of extraordinary. Years ago, we strung together a few magical nights, but I keep those memories in a locked drawer and I've thrown away the key. All that's left is friendship and work. He's on the verge of unimaginable fame, all his dreams poised to come true. I manage his career, but I can't seem to manage my heart. It's wild, reckless, disobedient. And it remembers all the things I want to forget.

Scholastic Inc. Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates "the infinitesimal, incomplete, imperfect, yet exquisitely human details of life," in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires.

These details illuminate the lives of two remarkable young women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.

Minnow is an otherworldly story of a small boy who leaves his dying father's bedside hunting a medicine for a mysterious illness. Sent by his mother to a local druggist in their coastal town, Minnow unexpectedly takes a dark and wondrous journey deep into the ancient Sea Islands, seeking the grave dust of a long-dead hoodoo man to buy him a cure. With only a half-feral dog at his side, Minnow's odyssey is haunted at every turn by the agents of Sorry George, a witch doctor who once stirred up a fever that killed 52 men. Meanwhile, a tempest brews out at sea, threatening to bring untold devastation to the coastal way of life. Minnow is a remarkable debut novel that evokes the fiction of Karen Russell and Lauren Groff a Low Country "Heart of Darkness" about the mysteries of childhood, the sacrifices we make to preserve our families, and the ghosts that linger in

the Spanish moss of the South Carolina barrier islands.

#1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK • ONE OF GQ'S TOP 50 BOOKS OF LITERARY JOURNALISM IN THE 21st CENTURY • The heartrending story of a midcentury American family with twelve children, six of them

diagnosed with schizophrenia, that became science's great hope in the quest to understand the disease. "Reads like a medical detective journey and sheds light on a topic so many of us face: mental illness." —Oprah Winfrey Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins-- aspiration, hard work, upward mobility, domestic harmony--and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse. By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National

Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.

Once upon a time there was a war . . . and a young American who thought of himself as the Quiet American and the Ugly American, and who wished to be neither, who wanted instead to be the Wise American, or the Good American, but who eventually came to witness himself as the Real American and finally as simply the Fucking American. That's me. This is the story of Skip Sands—spy-in-training, engaged in Psychological Operations against the

Vietcong—and the disasters that befall him thanks to his famous uncle, a war hero known in intelligence circles simply as the Colonel. This is also the story of the Houston brothers, Bill and James, young men who drift out of the Arizona desert into a war in which the line between disinformation and delusion has blurred away. In its vision of human folly, and its gritty, sympathetic portraits of men and women desperate for an end to their loneliness, whether in sex or death or by the grace of God, this is a story like nothing in our literature. *Tree of Smoke* is Denis Johnson's first full-length novel in nine years, and his most gripping, beautiful, and powerful work to date. *Tree of Smoke* is the 2007 National Book Award Winner for Fiction. *Uva's Basic Grip Book* Taylor & Francis While the technology of filmmaking has changed dramatically over the last 20 years, the basics of effective studio gripping are the same—a thorough knowledge of equipment, safety, and tools remains the foundation for success.
