Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge

he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

Written by renowned data science experts Foster Provost and Tom Fawcett, *Data Science for Business* introduces the fundamental principles of data science, and walks you through the "data-analytic thinking" necessary for extracting useful knowledge and business value from the data you collect. This guide also helps you understand the many data-mining techniques in use today. Based on an MBA course Provost has taught at New York University over the past ten years, *Data Science for Business* provides examples of real-world business problems to illustrate these principles. You'll not only learn how to improve communication between business stakeholders and data scientists, but also how participate intelligently in your company's data science projects. You'll also discover how to think data-analytically, and fully appreciate how data science methods can support business decision-making. Understand how data science fits in your organization—and how you can use it for competitive advantage Treat data as a business asset that requires careful investment if you're to gain real value Approach business problems data-analytically, using the data-mining process to gather good data in the most appropriate way Learn general concepts for actually extracting knowledge from data Apply data science principles when interviewing data science job candidates Amusing Ourselves to Death Hachette UK

THE GLASS CASTLE

Penguin

The time is June 1942, the beginning of America's first summer at war. Somewhere off the coast of Massachusetts a German U-boat surfaces under cover of darkness. Aboard the U-boat are two agents of the Abwehr, Germany's military intelligence service, whom the ship's commander has been ordered to drop safely on American soil. The agents have as their mission to conduct sabotage against military and industrial installations. Hitler's intention in devising such an operation is to remind Americans he has the capability and the will to bring the war to their backyard. As the two agents are bringing their equipment ashore, they are surprised by a patrolling US Coastguardsman, who is quickly killed by one of the crewmen from the U-boat but an attack dog accompanying him badly mauls one of the agents. Desperately in need of medical attention, the wounded agent must be returned to the U-boat for treatment. As the crewmen disappear into the night Erich Stinnes, alias Karl Stoner, is left with the sudden realization he will be carrying out this operation on his own. Stoner is fortunate in not only finding a job at the local shipyard but he is able to rent an apartment from an attractive woman, who is recently widowed. It is not long before the two of them begin an affair that causes Karl, already ambivalent about the war, to question the wisdom of his mission. Before he can resolve his dilemma, an incident at the shipyard exposes him for what he is. Having no choice he is forced to flee leaving Anne to suffer the consequences of her affair with a Nazi spy.

Media has most definitely evolved, as have the ways in which we

contemplate, design, communicate and execute strategy. And rather than technological evolution, we're plainly in the midst of a technological revolution. We have no choice then but to reframe marketing and PR in the context of 21st Century technology, 21st Century media and disintermediation, and 21st Century articulation of and appreciation for business strategy. "Today, every organization is in the influence business. We influence customers to buy from us, employees to work for us, and the media to write about us. Gone are the days when you could be your own island. Now, to be successful, you need to live within the influence ecosystem and that requires a change of mindset. Fortunately, Philip Sheldrake will show you how." David Meerman Scott, bestselling author of *The New Rules of Marketing & PR* and the new hit *Real-Time Marketing & PR*

A sweeping intellectual history of the role of wealth in the church in the last days of the Roman Empire Jesus taught his followers that it is easier for a camel to go through the eye of a needle than for a rich man to enter heaven. Yet by the fall of Rome, the church was becoming rich beyond measure. *Through the Eye of a Needle* is a sweeping intellectual and social history of the vexing problem of wealth in Christianity in the waning days of the Roman Empire, written by the world's foremost scholar of late antiquity. Peter Brown examines the rise of the church through the lens of money and the challenges it posed to an institution that espoused the virtue of poverty and called avarice the root of all evil. Drawing on the writings of major Christian thinkers such as Augustine, Ambrose, and Jerome, Brown examines the controversies and changing attitudes toward money caused by the influx of new wealth into church coffers, and describes the spectacular acts of divestment by rich donors and their growing influence in an empire beset with crisis. He shows how the use of wealth for the care of the poor competed with older forms of philanthropy deeply rooted in the Roman world, and sheds light on the ordinary people who gave away their money in hopes of treasure in heaven. *Through the Eye of a Needle* challenges the

widely held notion that Christianity's growing wealth sapped Rome of its ability to resist the barbarian invasions, and offers a fresh perspective on the social history of the church in late antiquity.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as

a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."

-Jonathan Yardley, *The Washington Post Book World*

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid

use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
