BURNS HURLEY

Rang & Dale's Pharmacology Elsevier Health Sciences

This book is about the rational scientific basis and practice of drug therapy. Doctors need to understand the psychological and medical area in which they prescribe to deliver what patients have a right to expect, ie. maximum benefit with minimum risk.

Pharmacology Condensed Elsevier Health Sciences

Building on the strengths of previous editions, the Sixth Edition of *Modern Pharmacology with Clinical Applications* continues to provide an up-to-date and comprehensive textbook for students of pharmacology. Focusing on the clinical application of drugs within a context of the major principles of pharmacology, this text supplies both students and faculty with an introduction to modern pharmacotherapeutics.

A Patient-Centered Nursing Process Approach Lippincott Williams & Wilkins

For 25 years, Rang and Dale's Pharmacology has delivered the core basic and clinical science information required by students and healthcare practitioners worldwide. Authors H. P. Rang, J. M. Ritter, R. J. Flower, and G. Henderson have ensured that the 8th Edition of this easy-to-read, comprehensive text continues the tradition of excellence with new coverage of drugs affecting the skin and new components online at Student Consult.

Fundamentals of Anaesthesia Elsevier Health Sciences

Covering the essential basic science and principles of pharmacology using concise text and diagrams, *Dale's Pharmacology Condensed*, 3rd Edition, presents the key facts and concepts that are key to understanding how drugs work and their underlying pathophysiological processes. Each of the 50 short chapters provides an organized, consistent approach to efficient learning and retention of complex information. This concise text is an ideal companion volume to Rang and

Dale's Pharmacology, as well as a stand-alone condensed textbook or review book for exams. All content has been thoroughly revised and updated, with new coverage of fast-moving therapeutic areas such as cancer treatments, dermatology and immune mediated diseases, and new developments in pharmacological principles such as biased agonism. Each two-page (or less) chapter condenses key information from Rang and Dale's Pharmacology to provide the necessary core knowledge, as well as essential therapeutic information. New editors are experienced teachers who provide a clear focus on what today's students need to know. Ideal for exam preparation with explanatory diagrams throughout, important drugs identified with bold type, and 50 multiple choice questions for self-assessment and review.

Essentials of Medical Pharmacology W B Saunders Company

The ideal resource for those preparing for licensed practical nursing, medical assisting, and other allied health careers, best-selling ESSENTIALS OF PHARMACOLOGY FOR HEALTH PROFESSIONS delivers the need to know drug information that gives you the confidence to master pharmacology as well as clinical applications to help you understand the relevancy and why behind the concepts. Part I provides a comprehensive review of pharmacologic principles, while Part II covers drugs, sources, legal concerns, and medical uses. Chapters organize drugs by classifications and include each drug's purpose, side effects, interactions, and precautions or contraindications. Offering a complete pharmacology resource for allied health professionals at every experience level, ESSENTIALS OF PHARMACOLOGY FOR HEALTH PROFESSIONS, 8e also makes a great refresher and on-the-job reference. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

with STUDENT CONSULT Online Access Jaypee Brothers, Medical Publishers Pvt. Limited
Veterinary Pharmacology and Therapeutics, Tenth Edition is a fully updated and revised version of the gold-standard reference on the use of drug therapy in all major veterinary species. Provides current, detailed information on using drug therapies in all major domestic animal species

Organized logically by drug class and treatment indication, with exhaustive information on the rational use of drugs in veterinary medicine Includes extensive tables of pharmacokinetic data, products available, and dosage regimens Adds new chapters on pharmaceuticals, ophthalmic pharmacology, food animal pharmacology, and aquatic animal pharmacology Includes access to a companion website with the figures from the book in PowerPoint

The Top 100 Drugs Mosby Incorporated

Lippincott's Illustrated Q&A Review of Pharmacology offers up-to-date, clinically relevant board-style questions—perfect for course review and board prep. 1,000 multiple-choice questions with detailed answer explanations cover frequently tested topics in pharmacology, including questions related to clinical topics and divided by body systems. The book features full-color illustrations and offers flexible study options with online access to the questions and answers on a companion website.

MODERN PHARMACOLOGY WITH CLINICAL APPLICATIONS

McGraw Hill Professional

Now in its second edition, this highly successful guide to safe prescribing of the most common classes of drugs is your starting point for safe and effective practice. The first edition was a direct response to requests from students for a compendium of the 100 most important drugs in the NHS. Research led by Professor Emma Baker identified the 'top 100 drugs' by their importance and prescribing frequency. The top 100 drugs and the five most important intravenous fluids are presented using a clear, consistent layout across double-page spreads. Drugs are arranged alphabetically and also listed by organ system and clinical indication, providing multiple pathways into the information. Clinical pharmacology is discussed under the headings: common indications; mechanisms of action; important adverse effects; warnings; and important interactions. Practical prescribing is discussed under the headings: prescription; administration; communication;

monitoring; and cost. A clinical tip is presented for every drug. Single-best-answer questions are provided for self-assessment and to show how information from several drugs may be integrated. **Lippincott's Illustrated Q&A Review of Pharmacology** Oxford University Press This new edition has been fully revised to bring pharmacologists and trainees fully up to date with the latest developments in the field of medical pharmacology. Beginning with an introduction to general pharmacological principles, the following sections discuss drugs for common and less common disorders found in different regions of the body. The seventh edition includes new drugs, as well as the latest therapeutic guidelines from authoritative sources such as the World Health Organisation (WHO) and the British National Formulary (BNF). Each topic includes key point summary boxes as well as illustrations, flowcharts and tables to enhance learning. A 'problem-directed study' question at the end of each chapter helps trainees test their knowledge. An extensive appendices section includes a list of essential medicines, drugs that should/shouldn't be prescribed in pregnancy and lactation, and suggestions for further reading. Key points Fully revised, new edition presenting latest developments in medical pharmacology Includes therapeutic guidelines from WHO and BNF Problem-directed study questions and key point summary boxes enhance learning Previous edition published in 2008

NETTER'S ILLUSTRATED PHARMACOLOGY

McGraw Hill Professional

This practical reference covers assessment, diagnostic, and surgical procedures frequently performed by nurse practitioners and other health care professionals in primary care or ambulatory settings. More than 50 common procedures are included with step-by-step guidelines that focus on patient education and need-to-know information.

Volume 1: General and Molecular Pharmacology: Principles of Drug Action Macmillan International Higher Education

Focusing on the essential aspects of pharmacology you need to know, Brody's Human Pharmacology, 6th Edition, keeps you fully up to date with all that's new in the field. Streamlined content, a new organizational approach, and thoroughly updated information ensure your grasp of key concepts and prepare you for exams. Nearly 500 full-color illustrations explain important processes, while color-coded boxes for major drugs, therapeutic overviews, clinical problems, and trade names reinforce your mastery of the information. The 6th Edition of this easy-to-use text is now fully up to date with: NEW chapter devoted entirely to pharmacogenomics and personalized medicine. NEW chapter on cannabinoids and their use for pain and other disorders, in light of recent legalization in many states. NEW chapters on recent developments in the treatment of Alzheimer's disease, ADHD and the latest treatments for HIV. NEW section on pain management. NEW section in each chapter covering "Clinical Relevance for Healthcare Professionals" that provides important information specific to physical therapists, dentists and dental hygienists, and many other medical professionals. Plus these student-friendly features: A new organizational approach, focusing on integration and systems-based learning. Contributions from leading faculty who cover the most important aspects of pharmacology necessary for a basic understanding of the subject, including concepts, clinical applications, and side effects. USMLE-style self-assessment questions at the end of every chapter, answers and rationales in the Appendix. Evolve Instructor Resources, including a downloadable image and test bank, are available to instructors through their Elsevier sales rep or via request at: <https://evolve.elsevier.com>

Lippincott Illustrated Reviews: Pharmacology Churchill Livingstone

Comprehensive yet easy to use, Rang and Dale's Pharmacology has been providing core basic and clinical science information to students and healthcare practitioners worldwide for more than 25 years. The fully revised 9th Edition keeps you up to date with all that's new in the field, including new and emerging drugs and recent studies. From cover to cover, you'll progressively increase your knowledge of all relevant aspects of pharmacology, from a molecular understanding of receptors and drug actions through clinical uses of key groups of drugs. Keeps you up-to-date with new information in this fast-changing field, including significantly revised coverage of CNS drugs, cognitive enhancers, anti-infectives, biologicals/biopharmaceuticals, lifestyle drugs, and more.

Includes access to unique features online, including more than 100 brand new chapter-specific multiple-choice questions and 6 new cases for immediate self-assessment. Features a color-coded layout for faster navigation and cross-referencing. Clarifies complex concepts with Key Points boxes, Clinical Uses boxes and full-color illustrations throughout. Enhanced eBook version included with purchase. Your enhanced eBook allows you to access all of the text, figures, and references - including 68 bonus dissection videos - from the book on a variety of devices.

MCQs in Clinical Pharmacy McGraw Hill Professional

An invaluable revision aid for those preparing for multiple choice questions in clinical pharmacy. Questions in this textbook are practice-oriented and are intended to assess students' knowledge of clinical issues, evaluative and analytical skills, and ability to apply their knowledge in clinical practice. Topics covered include: * Therapeutics and rational drug use * Aetiology of disease states * Presentation of conditions * Investigations and diagnostic testing * Drug therapy including adverse drug reactions * Drug interactions * Contra-indications The questions are presented as four practice tests, each consisting of 80 MCQs presented in a variety of formats. MCQs in Clinical Pharmacy is an indispensable aid for anyone preparing to sit a multiple choice question examination in pharmacy and for those carrying out a self-evaluation exercise for continuing professional development.

Color Atlas of Pharmacology LWW

Now in its Third Edition, High-Yield™ Pharmacology provides a succinct review of pharmacology while clarifying difficult concepts. Need-to-know information is presented in a clear, concise outline format. Additional features include updated drug references, a drug index, key points in bold, and tables summarizing key facts. Whether a student is reviewing for the end-of-year exams in pharmacology or brushing up for the USMLE, this book provides a quick overview of this challenging topic.

RANG & DALE'S PHARMACOLOGY E-BOOK

Pharmaceutical Press

Organized in conjunction with Rang and Dale's Pharmacology 9th edition, Rang & Dale's Pharmacology Flashcards helps you review what you learn in class and reinforce essential information. One side of each flashcard features a diagram of the pathophysiological processes including the drug class at the top of the card. The back of the card details essential information for that drug class including actions, mechanism of action, pharmacokinetic aspects, adverse effects, the names of related drugs and important aspects of clinical use. Completely updated with the latest knowledge in pharmacology and clinical use. New chapter on drugs used for eye and skin conditions, new coverage of clinical use of biopharmaceuticals in a wide range of conditions, and a concise explanation of the rapidly growing impact of pharmacogenetics. Clinical correlations help you apply information to real-life situations. Compact and efficient size make it easy to carry selected cards with you and study on the go. A perfect study aid and complement to Rang & Dale's Pharmacology, 9th Edition—ideal for exam preparation.

Veterinary Pharmacology and Therapeutics John Wiley & Sons

The Textbook of Non-Medical Prescribing is an easy-to-read, comprehensive overview of the essential knowledge, key issues and skills relevant to non-medical prescribing. Now fully updated and linked to the National Prescribing Centre Single Competency Framework for non-medical prescribers, with activities to help you link your continuing professional development within the competences required as a prescriber. This practical title remains an ideal resource for all qualified health professionals to practice safe and effective non-medical prescribing. The section edition is structured around four core themes - public health, social and cultural issues, prescribing principles, and continuing professional development - which are threaded throughout the text. It also includes additional material on the importance on continuing professional development in prescribing, as well as the history and context of non-medical prescribing; ethical, legal and professional issues; effective consultations; essential pharmacology; clinical skills; prescribing for specific groups; and the role of the multidisciplinary team. Key Features: Accessible and study-friendly Each chapter has learning objectives and activities to support a deeper understanding of the theoretical knowledge base and its application to practice Case studies linking the topics to

real-life scenarios Companion website at www.wiley.com/go/nuttall with a range of self-assessment questions, quizzes, numeracy exercises, case studies and weblinks. The Textbook of Non-Medical Prescribing provides support to anyone studying for a prescribing qualification or looking for a refresher on the subject.

CLINICAL PHARMACOLOGY

Radcliffe Publishing

This core text offers LPN/LVN students a clear, concise introduction to pharmacology, focusing on basic principles and the nurse's responsibility in drug administration. Organized by body system, the book examines pharmacologic properties and therapeutic applications of drug classes. Summary Drug Tables present generic and trade drug names, uses, adverse reactions, and usual dosage ranges. This edition has thoroughly updated drug information, a new "Pharmacology in Practice" case study feature, Nursing Alerts, Lifespan Alerts, Chronic Care Alerts, Diversity Alerts, and additional material on the nursing process. Including a FREE copy of Lippincott's Photo Atlas of Medication Administration, a bound CD-ROM, a companion website includes an NCLEX® alternate item format tutorial, a Spanish-English audio glossary, monographs on 100 most commonly prescribed drugs, Listen and Learn, Concepts in Action animations, Watch and Learn video clips, and Dosage Calculation Quizzes. The full text is also available online. Online Tutoring powered by Smarthinking—Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Pharmacy Student Survival Guide, 3E Lippincott Williams & Wilkins

The second edition of Fundamentals of Anaesthesia builds upon the success of the first edition, and encapsulates the modern practice of anaesthesia in a single volume. Written and edited by a team of expert contributors, it provides a comprehensive but easily readable account of all of the information required by the FRCA Primary examination candidate and has been expanded to include more detail on all topics and to include new topics now covered in the examination. As with the previous edition, presentation of information is clear and concise, with the use of lists, tables, summary boxes and line illustrations where necessary to highlight important information and aid the understanding of complex topics. Great care has been taken to ensure an unrivalled consistency of style and presentation throughout.

The Textbook of Non-Medical Prescribing Elsevier Health Sciences

The book blends the essentials of basic pharmacology and clinical pharmacology so that the transition from classroom to hospital is less abrupt. Students report that the book is most effective when lecture notes are written directly on the tables and margins, providing a single, concise guide for finals and the National Boards.
