**CT5 Contingencies | Institute and Faculty of Actuaries**

One of the effects of life insurance not being a contract of indemnity is that on happening of the event insured against the insurer should pay the agreed amount irrespective of whether the assured suffers any loss or not.

**12** Life insurance is, therefore, in the nature of a contingency insurance.

**CHAPTER-II LIFE INSURANCE: CONCEPT, NATURE AND SCOPE**

CT5 can be done along with CT7 but I don't prefer this combination because CT5 is ( General Insurance, Life and Health Contingencies ) pretty tough and is very different from CT7 ( Business Economics) . But still if you want to give this then give it in April attempt because you get more time to study in April attempt.

**Principles of Insurance. 58 (b) In Motor Insurance:** The type of vehicle, the purpose of its use, its age (Model), Cubic capacity and the fact that the driver has a consistently bad driving record. (c) In Marine Insurance: Type of packing, mode of carriage, name of carrier, nature of goods, the route.

**FUNDAMENTALS/PRINCIPLES OF GENERAL INSURANCE**

The Operational Risk Working Party aims to assist actuaries and others in the modelling and management of operational risk. One of the key challenges in modelling operational risk is the modelling of dependencies between operational risks, and between operational and non-operational risks such as market, credit and insurance risk.

**Past exam papers and examiners' reports | Institute and ...**

CT5 CONTINGENCIES deals with the mathematical techniques which can be used to model and value the cash flows which are dependent on death, survival or other uncertain risks. It can be considered as an extension of the subject CT1-Financial Mathematics. Probabilities of the payments happening are accounted along with the amount of payments.

**CT5 An introductory brief and FAQs - StepUp Analytics**

Next, denote by  $m$  the number of payment-periods per year, all times being measured from the date of policy initiation. Thus, for given  $m$ , insurance will pay off at the end of the fraction  $1/m$  of a year during which death occurs, and life-annuities pay regularly  $m$  times per year until the annuitant dies.

**Actuarial Mathematics and Life-Table Statistics**

**Licentiate (Life and Non-Life) Practice of General Insurance Exam - Download Previous Years Question Papers.**

Rest questions are of 12 marks each. The paper covers the entire syllabus and questions asked in the paper are very good. The full marks for this paper are 100 and time

duration of the exam is 3 hours. Candidates won't be given any extra time, so they must keep track of the time while writing their answer script.
