This is the first book to set the development of tourism in China since 1949 in its policy context. Underpinned by a strong conceptual framework, this systematic study of China contributes to an in-depth understanding of how public policy-making for tourism works and how it affects the development of tourism in the real world. The text explores tourism policy during three distinct leadership periods since creation of the People's Republic of China in 1949. The attitudes and values of leaders and central government agencies towards tourism are considered, as well as the interactions of ideological orthodoxies, socioeconomic conditions and institutions in their influence on national policy-making and tourism development. A separate chapter is devoted to policy-making in Hong Kong and Macau, as well as Taiwan. Drawing on China's experience over 60 years the book concludes with both theoretical and practical implications for tourism policy-making. **Best of Dubai Vol 1.** Heinemann

"The City of Santa Cruz has been interested in intensifying tourist-oriented development that promotes year round activities in the Beach area since the 1990s (City of Santa Cruz, October 1998). In 1994/95, the La Bahia Apartments site and Coast Hotel parking lot site at the corner of West Cliff Drive and Bay Street were both analyzed to determine the feasibility of developing either site into a 275-300 room, group oriented conference hotel as part of the preparation of the City's Beach/South Laurel Plan (B/SOL Area Plan) ... Subsequent to the recommendations of the B/SOL Area Plan, the property owner submitted a plan to the City to develop the La Bahia site into a 118-room hotel with day spa, but without a conference facility ... Subsequent to approval of the project in 2003, the applicant decided not to pursue this permit project and has allowed the permit to expire. The current application was submitted to the City in March 2006"--Chapter 3. Project description.

One of the most important features of China's economic emergence has been the role of foreign investment and foreign companies. The importance goes well beyond the USD 1.6 trillion in foreign direct investment that China has received since it started opening its economy. Using the tools of economic impact analysis, the author estimates that around one-third of China's GDP in recent years has been generated by the investments, operations, and supply chains of foreign invested companies. In addition, foreign companies have developed industries, created suppliers and distributors, introduced modern technologies, improved business practices, modernized management training, improved sustainability performance, and helped shape China's legal and regulatory systems. These impacts have helped China become the world's second largest

ISO 14001 is the star standard among the International Organization for Standardization's ISO 14000 series of environmental management standards. It has seen spectacular growth since its launch in September 1996. Worldwide registrations are set to pass the 20,000 mark in 2000 with 20 times that number reportedly waiting in the wings. In 30 explicit but concise chapters, ISO 14001: Case Studies and Practical Experiences seeks to unravel the truth behind what can and cannot be achieved by ISO 14001 and aims to provide readers with enough knowledge to make choices about its relevance and importance not only to their worlds but also to society. Written by leading practitioners, certifiers, consultants, government and academics, the book examines both the real benefits and the shortcomings organizations have experienced with ISO 14001. We learn from both. Far more ambitious than an implementation guide, the book will provide those readers struggling with the standard first-hand experiences of the real issues they will face in implementing their EMS and, just as importantly, what certifiers look for when they visit firms. ISO 14001: Case Studies and Practical Experiences is a warts-and-all expose of ISO 14001: the issues tackled; the problems faced and overcome; and, above all, the astonishing flexibility of its uses and the diversity of its users. This important book is a must for businesses, researchers, consultants, government officials, students, NGOs and support organisations who want more than just another how-to-do-it manual; but rather the truth about how ISO 14001 is really working on the ground.

Managing Hospitality Organizations Achieving Excellence in the Guest Experience

The hotel and tourism industry is changing worldwide and is experiencing stormy times right now. On the one hand, we are dealing with the coronavirus pandemic, on the other hand with the digitalization wave and changes in tourist and guest wishes. We have taken on these great challenges and present you with sustainable and environmentally friendly quality standards for hotels and restaurants. We have divided the quality standards into three reference books to make them handier. The first part (book) contains quality standards for the management, the second part covers quality standards for the hotel area and the third part the ones for the restaurant area. This part contains the quality standards for the hotel accommodation: reception and reservations, housekeeping, and maintenance as well as spa and wellness. By implementing sustainable and environmental quality standards, energy and water consumption is demonstrably reduced. On the other hand, the efficiency and motivation of the employees increases.

Standards and regulations are an integral, if easily overlooked, part of our daily life. They determine whether a plug fits into a socket, whether food is safe for human consumption or whether a bank is allowed to take deposits. They are also an indispensable part of international trade. Using new evidence from ITC databases, this report reveals how standards and regulations are holding SME competitiveness back, but crucially, what SMEs and other stakeholders can do to make standards and regulations work for, and not against, SMEs. In this report, advice targeted at SME managers is presented, as well as how Trade and Investment Support Institutions and policymakers can influence the business environment to boost competitiveness, and integration into global markets.
