This is just one of the many downloadable dental forms available on DentistryIQ to help keep your dental practice more organized. To see all the forms available, visit downloadable dental forms. Downloadable dental form: Insurance narrative for scaling ... From the American Academy of Periodontology (AAP) Policy on Scaling and Root Planing: “Periodontal scaling is a treatment procedure involving instrumentation of the crown and root surfaces of the teeth to remove plaque, calculus, and stains from these surfaces. It is performed on patients with periodontal disease and is therapeutic, not prophylactic, in nature. Evidence Necessary for Scaling and Root Planing - eAssist ... D4341-Periodontal Scaling and Root-Planing, per quadrant, is described as involving "instrumentation of the crown and root surfaces of the teeth to remove plaque and calculus from these surfaces. It is indicated for patients with periodontal disease and is therapeutic, not prophylactic, in nature. Scaling and root-planing | Dental Economics describes periodontal scaling and root planing as: This procedure involves instrumentation of the crown and root surfaces of the teeth to remove plaque and calculus from these surfaces. Periodontal Scaling and Root Planing Policy Scaling and Root Planing Narrative should contain the condition that the patient presented at the time of clinical examination. Such as: “Patient presents with periodontal disease including BOP, exudate, (if present)

mobility, and generalized 4-6 mm periodontal probing depths.” Tips: Building Narratives for Dental Claims 1. D4341 periodontal scaling and root planing - four or more teeth per quadrant D4342 periodontal scaling and root planing - one to three teeth per quadrant Dental claims can be denied, delayed or alternate benefited for a myriad of reasons. And certain procedures, such as periodontal scaling and root planing (SRP), tend to have a “Responding to Claim Rejections” initiated included scaling and root planing and oral hygiene instruction. Based on the patient's clinical presentation, I placed PerioChip® in each of the pockets listed below: Tooth # Site Treated (MB B DB ML L DL) Probed Pocket Depth Total Treated Areas by Tooth Example/Claim Narrative Scaling and root planing, also known as conventional periodontal therapy, non-surgical periodontal therapy, or deep cleaning, is a procedure involving removal of dental plaque and calculus (scaling or debridement) and then smoothing, or planing, of the (exposed) surfaces of the roots, removing cementum or dentine that is impregnated with calculus, toxins, or microorganisms, the etiologic agents that cause inflammation. Scaling and root planing - Wikipedia Dental scaling is typically followed by a procedure known as root planing. Root planing reaches deeper to address the surface of the tooth's root. This is done in the same manner as scaling. Root planing smooths the surface of the root so the gums can reattach properly. What Is Scaling, and Why Is It Necessary? From 123Dentist.com If a patient completes nonsurgical treatment of their periodontal disease with scaling and root planing, the management of their

condition is treated and correctly identified as periodontal maintenance for each subsequent appointment. This applies to any patient whether the scaling and root planing is completed in your practice or elsewhere.

Perio and insurance | Registered Dental Hygienist (RDH ...Scaling is when your dentist removes all the plaque and tartar (hardened plaque) above and below the gumline, making sure to clean all the way down to the bottom of the pocket. Your dentist will then begin root planing, smoothing out your teeth roots to help your gums reattach to your teeth.
