Safety warning notice

WARNING! To reduce the possibility of heat-related injuries or of overheating the computer, do not place the computer directly on your lap or obstruct the computer air vents.

HP TouchSmart User Guide

I have a wireless network in my home and my desktop (HP TouchSmart 600-1350 Desktop PC) was connected to it

and now it is not. I have tried enable the wireless network (not found), I have disabled the ethernet connection (which there is no place to connect an ethernet to my desktop), and I have restarted my router and still nothing.
