Utopia as Method RastafariRoots and Ideology

The relationship between customary land tenure and 'modern' forms of landed property has been a major political issue in the 'Spearhead' states of Melanesia since the late colonial period, and is even more pressing today, as the region is subject to its own version of what is described in the international literature as a new 'land rush' or 'land grab' in developing countries. This volume aims to test the application of one particular theoretical framework to the Melanesian version of this phenomenon, which is the framework put forward by Derek Hall, Philip Hirsch and Tania Murray Li in their 2011 book, Powers of Exclusion: Land Dilemmas in Southeast Asia. Since that framework emerged from studies of the agrarian transition in Southeast Asia, the key question addressed in this volume is whether 'land transformations' in Melanesia are proceeding in a similar direction, or whether they take a somewhat different form because of the particular nature of Melanesian political economies or social institutions. The contributors to this volume all deal with this question from the point of view of their own direct engagement with different aspects of the land policy process in particular countries. Aside from discussion of the agrarian transition in Melanesia, particular attention is also paid to the growing problem of land access in urban areas and the gendered nature of landed property relations in this region.

Utopia should be understood as a method rather than a goal. This book rehabilitates utopia as a repressed dimension of the sociological and in the process produces the Imaginary Reconstitution of Society, a provisional, reflexive and dialogic method for exploring alternative possible futures.

This anthology explores Rastafari religion, culture, and politics in Jamaica and other parts of the African diaspora. An Afro-Caribbean religious and cultural movement that sprang from the streets of Kingston, Jamaica, in the 1930s, today Rastafari has close to one million adherents. The basic message of Rastafari—the dismantling of all oppressive institutions and the liberation of humankind—even has strong appeal to non-believers who are captivated by reggae music, the lyrics, and the "immortal spirit" of its enormously popular practitioner, Bob Marley. Probing into Rastafari's still evolving belief system, political goals, and cultural expression, the contributors to this volume emphasize the importance of Africana history and the Caribbean context. Most of the synagogues are gone; a temple has been converted into a Baptist church. There is little indication to the passerby that the southern New Jersey's Salem and Cumberland counties once contained active Jewish colonies—the largest and most successful in fact, of the settlement experiments undertaken by Russian-Jewish immigrants in America during the late nineteenth century.

Ellen Eisenberg's work focuses on the transformation of these colonies over a period of four decades, from agrarian, communal colonies to private mixed industrial-agricultural communities. The colonies grew out of the same "back to the land" sentiment that led to the development of the first modern Jewish agricultural settlements in Palestine. Founded in 1882, the settlements survived for over thirty years. The community of Alliance's population alone grew to nearly 1000 by 1908.Originally established as socialistic agrarian settlements by young idealists from the Russian Jewish Am Olam movement, the colonies eventually became dependent on industrial employment, based on private ownership. The early independent, ideological settlers ultimately clashed with the financial sponsors and the migrants they recruited, who did not share the settlers' communitarian and agrarian goals.

When we think of Ethiopia we tend to think in cliches: Solomon and the Queen of Sheba, the Falasha Jews, the epic reign of Emperor Haile Selassie, the Communist Revolution, famine and civil war. Among the countries of Africa it has a high profile yet is poorly known. How- ever all cliches contain within them a kernel of truth, and occlude much more. Today's Ethiopia (and its painfully liberated sister state of Eritrea) are largely obscured by these mythical views and a secondary literature that is partial or propagandist. Moreover there have been few attempts to offer readers a comprehensive overview of the country's recent history, politics and culture that goes beyond the usual guidebook fare. Understanding Contemporary Ethiopia seeks to do just that, presenting a measured, detailed and systematic analysis of the main features of this unique country, now building on the foundations of a magical and tumultuous past as it struggles to emerge in the modern world on its own terms.

This book develops a comparative study on violence in Jamaica, El Salvador, and Belize based on a theoretical approach, extensive field research, and in-depth empirical research. It combines the Caribbean and Central America into a single comparative research that explores the historical (from the conquista onwards) as well as contemporary causes of violence in these societies. The volume focuses on forms of violence such as gang violence, police violence, every day forms of violence, vigilantism, and organized crime. The analysis provides a theoretical perspective that bridges political economy as well as cultural approaches in violence research. As such, it will be of interest to readers studying development, violence, political, Central American, and Caribbean studies.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered.

Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

An Anthropology of the Enlightenment Syracuse University Press
The Caribbean has played a crucial geopolitical role in the Western pursuit of economic dominance, yet Eurocentric research usually treats the Caribbean as a peripheral region, consequently labelling the inhabitants as beings without agency. Examining asymmetrical relations of power in the Greater Caribbean in historical and contemporary perspectives, this volume explores the region's history of resistance and subversion of oppressive structures against the backdrop of the Caribbean's central role for the accumulation of wealth of European and North American actors and the respective dialectics of modernity/coloniality, through a variety of experiences inducing migration, transnational exchange and transculturation. Contributors approach the Caribbean as an empowered space of opposition and agency and focus on perspectives of the region as a place of entanglements with a long history of political and cultural practices of resistance to colonization, inequality, heteronomy, purity, invisibilization, and exploitation. An important contribution to the literature on

agency and resistance in the Caribbean, this volume offers a new perspective on the region as a geopolitically, economically and culturally crucial space, and it will interest researchers in the fields of Caribbean politics, literature and heritage, colonialism, entangled histories, global studies perspectives, ethnicity, gender, and migration.

In a time of intellectual uncertainty, the question of how we know what we do about human lives becomes ever more pressing. The essays collated in this volume argue that anthropology can be used to acknowledge, explore and interpret divergence and ideological conflict over human meaning. Using questions raised as part of the Enlightenment movement, this volume is structured around some of the key themes the Enlightenment fostered, including human nature, time, Earth and the Cosmos, beauty, order, harmony and design, moral sentiments, and the query of whether wealthy nations make for healthy publics. The volume focuses in particular on how 'moral sentiment' offered a guiding idea in Enlightenment thought. The idea of 'moral sentiment' is central to the essays' grappling with the ethical anxieties of contemporary anthropology. The essays therefore trace historical connections and fissures and focus on Adam Smith's attempts toward an understanding of what would later be called 'modernity'. With an afterword from Marilyn Strathern, this volume will be a strong addition to the Association of Social Anthropologists conference proceedings.

In the complex and multi-layered process of migration and identity-building, classical migration theories and approaches of transnationalism seem no longer able to grasp how belonging and home are to be found in movement. This ethnography leads the reader into the lives of five Jamaican women in Montreal; their daily practices and experiences, their spaces of communion, their memories and projections for the future. Lisa Johnson sheds light on the mobile biographies and migratory agency of her interlocutors by following the intricate mental and physical trajectories of their deep-rooted yearning to return home.
