The Last Man in Europe
Candlewick Press (MA)
The first short, single-volume history of the continent, from the author of the bestselling *A Short History of England* Europe is an astonishingly successful place. In this dazzling new history, bestselling author Simon Jenkins grippingly tells the story of its evolution from warring peoples to peace, wealth and freedom - a story that twists and turns from Greece and Rome, through the Dark Ages, the Reformation and the French Revolution, to the Second World War and up to the present day. Jenkins takes in leaders from Julius Caesar and Joan of Arc, to Wellington and Angela Merkel, as well as cultural figures from Aristotle to Shakespeare and Picasso. He brings together the transformative forces and dominant eras into one chronological tale - all with his usual insight, colour and authority.

Despite the importance of Europe's politics, economy and culture, there has not been - until now - a concise book to tell this story. Covering the key events, themes and individuals, Jenkins' portrait of the continent could not be more timely - or masterful. 'Full of stand-out facts ... absolutely fascinating' - Richard Bacon, BBC Radio 2, on 'A Short History of England' 'Masterly, perhaps a masterpiece' - Independent, Books of the Year on England's Thousand Best Churches 'Jenkins is, like all good guides, more than simply informative: he can be courteous and rude, nostalgic and funny, elegant, convincing and relaxed' - Adam Nicolson on 'England's Thousand Best Houses', Evening Standard 'Full of the good judgements one might hope for from such a sensible and readable commentator, and they alone are worth perusing for pleasure and food for thought' - Michael Wood on 'A Short History of England', New Statesman 'Any passably cultured

inhabitant of the British Isles should ask for, say, three or four copies of this book' - Max Hastings on 'England's Thousand Best Houses', Sunday Telegraph

History of Europe

Farrar, Straus and Giroux
History is a rich, varied and fascinating subject, so it's rare to find the whole lot in one book ... until now. The History of the World in Bite-Sized Chunks pulls it all together, from the world's earliest civilizations in 3500 BC to the founding of the United Nations in 1945, passing by the likes of Charlemagne, the Ottoman Empire and the Crimean War, to name a few. Here's your chance to introduce yourself to the full spectrum of world history, and discover just how the modern world came to be.

Future Shock The Experiment

What are the qualities at the heart of Australian culture? How did they arise? What distinguishes us from other nations beyond a fondness for calling each other 'mate'? And what do such national

quirks reveal about our society, our past and our attitudes towards it? Looking for Australia is a fascinating collection of essays by historian John Hirst. Together they form a multi-faceted portrait of Australia as a distinctive nation, with its own political culture, character and style, and particular ways of seeing itself. Among other subjects, Hirst considers the effects of convict origins on national character, what drove the bushrangers to their daring deeds, and why Australia has compulsory voting. He examines whether Aborigines played a part in the origins of Australian Rules football, and asks whether Curtin was indeed our greatest prime minister. He discusses how best to tell Australia's history, and, after reflecting on our past as a British dependency, makes a stirring case for a future, fully independent republic. "He brings a critical, discerning eye to all aspects of Australian history...incisive and compelling" - the Courier Mail "A powerful controversialist ... a brilliant historian"—Australian Book Review "This is a brilliant book." - the Mercury "Hirst's genius

and sincerity shine through, and his easy prose combined with his unorthodox views make for compelling reading." - Canberra Times "highly recommended" - Bookseller+Publisher "exceptionally subtle and meticulous" - Sydney Morning Herald From the Ancient Dynasties to a Modern SuperpowerA Retelling for Our Times Abrams The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old

Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

 "Thrilling . . . a bracing summary of what we have learned [from] 'archaeogenetics'—the study of ancient DNA . . . Krause and Trappe capture the excitement of this young field."—Kyle Harper, *The Wall Street Journal*
 Johannes Krause is the director of the Max Planck Institute for Evolutionary Anthropology and a brilliant pioneer in the field of archaeogenetics—archaeology augmented by DNA sequencing technology—which has allowed scientists to reconstruct human history reaching back hundreds of thousands of years before recorded time. In this surprising account,

Krause and journalist Thomas Trappe rewrite a fascinating chapter of this history, the peopling of Europe, that takes us from the Neanderthals and Denisovans to the present. We know now that a wave of farmers from Anatolia migrated into Europe 8,000 years ago, essentially displacing the dark-skinned, blue-eyed hunter-gatherers who preceded them. This Anatolian farmer DNA is one of the core genetic components of people with contemporary European ancestry. Archaeogenetics has also revealed that indigenous North and South Americans, though long thought to have been East Asian, also share DNA with contemporary Europeans. Krause and Trappe vividly introduce us to the prehistoric cultures of the ancient Europeans: the Aurignacians, innovative artisans who carved flutes and animal and human forms from bird bones more than 40,000 years ago; the Varna, who buried their loved ones with gold long before the Pharaohs of Egypt; and the Gravettians, big-game hunters who were Europe's most successful early settlers until they perished in the ice age.

Genetics has earned a reputation for smuggling racist ideologies into science, but cutting-edge science makes nonsense of eugenics and "pure" bloodlines. Immigration and genetic exchanges have always defined our species; who we are is a question of culture, not biological inheritance. This revelatory book offers us an entirely new way to understand ourselves, both past and present.

A Short History of England OUP Oxford

War has always been a defining feature of human society. This pacy, lively history explains why we do it - and how we can stop. Acclaimed historian and military expert Gwynne Dyer tells the story of war from its earliest origins up to the present age of atom bombs and algorithms. Gwynne Dyer chronicles the advent of warfare in the first cities; the rise of inequality and tyranny as humans multiply; the 1000-year classical era of combat until the firearm and the Thirty Years' War, which changed everything. He traces how the brief interlude of limited war before the popular revolutions of the eighteenth century ushered in total war - and

how the devastation was halted, for now, by the shock of Hiroshima. We are in the longest stretch of peace between major powers in modern history. It marks a precarious balance, as the looming threats of nuclear proliferation, climate change and superpower rivalry - evoked most recently in the war in Ukraine - threaten our world. This concise, vivid and clear-sighted book is vital reading for anyone who wants to understand the role of war in the long human story - and how we can stop it from dominating our future. London-based Gwynne Dyer is an admired journalist, columnist, broadcaster and lecturer on international affairs. 'Provocative and very well argued, with an "aha!" moment on every page.' —Kirkus 'Entirely convincing ... at once a valuable historical treatise and a fervent and compelling call toward pacifism.' —Publisher's Weekly 'Ranges over the terrain of history, sparkling with insight and digressions ... brilliant' —Seattle Times Speak For England Michael O'Mara Books If there are genuine questions about Australian history, there is

something to puzzle over. The history ceases to be predictable—and dull. From the author of *The Shortest History of Europe*, acclaimed historian John Hirst, comes this fresh and stimulating approach to understanding Australia's past and present. Hirst asks and answers questions that get to the heart of Australia's history: Why did Aborigines not become farmers? How did a penal colony change peacefully to a democracy? Why was Australia so prosperous so early? Why did the Australian colonies federate? What effect did convict origins have on national character? Why was the postwar migration programme a success? Why is Australia not a republic? Engaging and enjoyable, and written for the novice and the expert alike, *Australian History in 7 Questions* explains how we became the nation we are today. 'If you don't always agree with the answers, you will certainly acquire a renewed interest in the questions. This, surely, is the highest hope of good history.' —Saturday Paper 'An excellent tool for provoking debate' —Age 'An intriguing approach'

—West Weekend Magazine 'With trademark clarity and insight, Hirst manages to touch every cornerstone of Australia's past ... every Australian should read this book.' —Monthly 'Thought provoking' —Daily Telegraph 'Instructively provocative' —Burnie Advocate 'Australian History in 7 Questions is a lively and exciting book, showing the skills of a professional historian and social commentator ... Anyone would benefit from reading this erudite short book.' —Australian Journal of Politics and History John Hirst was a member of the History Department at La Trobe University from 1968 to 2007. He has written many books on Australian history, including *Convict Society and Its Enemies*, *The Strange Birth of Colonial Democracy*, *The Sentimental Nation*, *Sense and Nonsense in Australian History* and *The Shortest History of Europe*. *Last Days in Old Europe* Columbia University Press Following *Germania* and *Danubia*, the third installment in Simon Winder's personal history of Europe In 843 AD, the three surviving grandsons of the great emperor Charlemagne met at

Verdun. After years of bitter squabbles over who would inherit the family land, they finally decided to divide the territory and go their separate ways. In a moment of staggering significance, one grandson inherited the area we now know as France, another Germany and the third received the piece in between: Lotharingia. Lotharingia is a history of in-between Europe. It is the story of a place between places. In this beguiling, hilarious and compelling book, Simon Winder retraces the various powers that have tried to overtake the land that stretches from the mouth of the Rhine to the Alps and the might of the peoples who have lived there for centuries.

A superb history of the world's people during the last four million years, beginning before the human race moved out of Africa to explore and settle the other continents. Mr. Blainey explores the development of technology and skills, the rise of major religions, and the role of geography, considering both the larger patterns and the individual nature

of history. A delightful read, gracefully written, and full of odd and interesting pieces of information as well as thoughtful comparisons that span both time and space. —William L. O'Neill

NEW YORK TIMES BESTSELLER • The classic work that predicted the anxieties of a world upended by rapidly emerging technologies—and now provides a road map to solving many of our most pressing crises. “Explosive . . . brilliantly formulated.” —The Wall Street Journal
Future Shock is the classic that changed our view of tomorrow. Its startling insights into accelerating change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, Future Shock is the most important study of change and adaptation in our time. In many ways, Future Shock is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change affects

our products, communities, organizations—even our patterns of friendship and love. But Future Shock also illuminates the world of tomorrow by exploding countless clichés about today. It vividly describes the emerging global civilization: the rise of new businesses, subcultures, lifestyles, and human relationships—all of them temporary. Future Shock will intrigue, provoke, frighten, encourage, and, above all, change everyone who reads it.

THE GLORIOUS STORY OF A ROWDY NATION

Michael O'Mara Books

The final decade of the Cold War, through the eyes of a laconic and elegant observer In 1979 Richard Bassett set out on a series of adventures and encounters in central Europe which allowed him to savour the last embers of the cosmopolitan old Hapsburg lands and gave him a ringside seat at the fall of another ancient regime, that of communist rule. From Trieste to Prague and Vienna to Warsaw, fading aristocrats, charming gangsters, fractious diplomats and glamorous informants provided him with an unexpected

counterpoint to the austerities of life along the Iron Curtain, first as a professional musician and then as a foreign correspondent. The book shows us familiar events and places from unusual vantage points: dilapidated mansions and boarding-houses, train carriages and cafes, where the game of espionage between east and west is often set. There are unexpected encounters with Shirley Temple, Fitzroy Maclean, Lech Walesa and the last Empress of Austria. Bassett finds himself at the funeral of King Nicola of Montenegro in Cetinje, plays bridge with the last man alive to have been decorated by the Austrian Emperor Franz-Josef and watches the KGB representative in Prague bestowing the last rites on the Soviet empire in Europe. Music and painting, architecture and landscape, food and wine, friendship and history run through the book. The author is lucky, observant and leans romantically towards the values of an older age. He brilliantly conjures the time, the people he meets, and Mitteleuropa in one of the pivotal decades of its history.

Middle Ages, Fifth Edition

In this seasonal treasure, Newbery Medalist Susan Cooper's beloved poem heralds the winter solstice, illuminated by Caldecott Honoree Carson Ellis's strikingly resonant illustrations. So the shortest day came, and the year died . . . As the sun set on the shortest day of the year, early people would gather to prepare for the long night ahead. They built fires and lit candles. They played music, bringing their own light to the darkness, while wondering if the sun would ever rise again. Written for a theatrical production that has become a ritual in itself, Susan Cooper's poem "The Shortest Day" captures the magic behind the returning of the light, the yearning for traditions that connect us with generations that have gone before -- and the hope for peace that we carry into the future. Richly illustrated by Carson Ellis with a universality that spans the centuries, this beautiful book evokes the joy and community found in the ongoing mystery of life when we celebrate light, thankfulness, and festivity at a time of

rebirth. Welcome Yule!

An accessible and succinct account of the story of Europe from its ancient foundations to the twenty-first century, *The History of Europe in Bite-sized Chunks* details the events, personalities, ideas and disasters that have shaped our continent. The book is broken down into six easily digestible chapters: Classical Antiquity (2600 BCE to 600 CE); Medieval (600-1500); Reform and Enlightenment (1500-1780); Age of Revolutions (1780-1914); the Wars (1914-45); and the Making of Contemporary Europe (1945 to present). It begins with the first ancient culture to emerge in Europe: the Minoans. It then proceeds chronologically to the present day, taking in not just significant historical events but also overarching social, technological and cultural trends and their impact. Throughout the book there are mini-biographies of notable individuals (such as Julius Caesar, Catherine the Great and Napoleon Bonaparte) who have been most significant in European history. It is also packed

with amazing facts, details and maps that will give the reader a vivid understanding of Europe's past. With the prospect of Brexit looming in Spring 2019, there is no better time to get a handle on European history!

When we think of France, we tend to think of fine food and wine, the elegant boulevards of Paris or the chic beaches of St Tropez. Yet, as the largest country in Europe, France is home to extraordinary diversity. The idea of 'Frenchness' emerged through 2,000 years of history and it is this riveting story, from the Roman conquest of Gaul to the present day, that Cecil Jenkins tells: of the forging of this great nation through its significant people and events and its fascinating culture. As he unfolds this narrative, Jenkins shows why the French began to see themselves as so different from the rest of Europe, but also why, today, the French face the same problems with regard to identity as so many other European nations.
