 Box Culvert applications include water course diversions, attenuation, tunnels and subways, stormwater and foul sewers, and access shafts. Smaller sizes are also used for dry networks including cabling. Stanton Bonna supply the largest variety of culvert options in the UK with internal diameters from 500 x 3000mm up to 6000mm x 3000mm as follows:

SMALL:
 Compact Culvert for a small, rapid, economic solution - 500 x 300mm up to 1500 x 700mm.

Box Culverts - Stanton Bonna Precast Concrete Pipes
 The concrete culverts are manufactured with a smooth mould finish, which allows water to flow freely through the channel. The units interlock to ensure perfect alignment and are easily sealed. Installation of the precast units is exceptionally fast, they are placed directly onto a prepared foundation, no additional fixing is required.

Precast Concrete Box Culverts - JP Concrete
 Precast concrete box culverts fulfil the current design life requirements for buried structures. They require minimum maintenance and provide many years of service, therefore making them the most cost-effective

means of diverting watercourses. Furthermore, they are especially practical with the ever-present risk of corrosive elements in the water or soil. Benefits of using precast concrete Box Culverts include: Structural strength and long-life performance Box Culverts | Precast Concrete Box Culvert Sections | FP ...Concrete Pipe and Box Culvert Installation eBook Apple
