## AND FORWARD

You Can Still Win!: Break Through, Bounce Back, Come from Behind, and Flourish

ProphetAbility is heralded a "masterpiece" and a "must-read" for CEOs and leaders who want to run a successful customer-centric business because it provides critical insights into the human experience that show what works, what doesn't and why. You'll read stories of success, failure and bounce back from companies like Weight Watchers, Pixar, IBM, Gainsight, Xtracycle, Toys R Us, Casper Mattresses, Mylan (EpiPen), PepsiCo, General Motors (GM), and more. You will gain strategic insights and be able to take step-by-step tactical actions today. MORE ABOUT THE BOOK: Kings in ancient times governed their lands and expanded their empires while securing the future for their subjects. The kingdoms that thrived were prepared to defend against the attacks of their enemies at the borders. In order to succeed, the king had to establish harmony between two divergent forces, the first of which was the force controlled

by the priests who maintained order and stability through tradition, religion and culture. The second force was wielded by the prophets who heard and interpreted the will of the gods and called for the disruption of stale traditions and meaningless practices. Today's CEOs, like the kings of old, must guard their companies while expanding their market share. They must bring harmony between the age-old forces that maintain or disrupt their companies' products and services, culture, policies, processes and procedures. CEOs must seek out powerful C-Suite leaders who can bring order, build systems and create certainty for the future of the company, like the priests of old did through religion. But, CEOs must also find and champion those who can hear and properly interpret what the customers are saying, like the prophets of old could understand the will of the gods. Established companies typically have many executives and managers who act like priests in their attempt to maintain the status quo. There is a lack of support for true prophets. In this age of disruption, CEOs

need to hear the unfiltered voice of their customers so they can create a strategic plan for the next three to five years. ProphetAbility: The Revealing Story Why Companies Succeed, Fail, or Bounce Back, examines how successful CEOs listen and while demonstrating that unsuccessful CEOs do not. It reveals how CEOs can encourage the stability of their companies while at the same time championing the disruption required for future stability. This book will show you how to be profitable because you have ProphetAbility(tm). ENDORSEMENTS: "Tony and Betsy understand, at the deepest levels, the impact of listening on the success or failure of an organization... Their book is a C-Suite Must Read." - Tracy Hazzard, Innovation Columnist, Inc. Magazine "One of Steve Jobs' principles was to make sure you connect the dots. Tony and Betsy have done a great job in connecting the dots from Ancient Kings to modern day CEOs. One of the major failures of today's CEO is to not want to disrupt the norm. This book is filled with stories, advice, and support for

making sure today's CEO understands that sometimes disruption is the key to future success. Great advice for any CEO!"-Jay Elliot - Best-selling author of "The Steve Jobs Way," and CEO of iMedGo"Truly one of the best business strategy books I have come across and a must-read for business leaders."-David Jacques, Customer Experience Management Pioneer"This book deserves a place on every executive's desk to be read, reread, and frequently referred to. Pass up these ideas at your peril."-Mark S A Smith, podcaster, author, business growth strategist

Atria Books  
The power of resilience within organizations and can transform an average company into a powerhouse. Yet, even in times of rapid disruptive change, there is no manual for building resilient organizations. This book is that manual. Resilience, left to individuals, will only ever be built by people in the moments that require

them to dig deep and find it. The real power in building resilience before we need it, lies in what we can accomplish when our organizations become resilient. This book presents a simple framework for leaders and organizations to prepare for sustainable results in the face of rapid, disruption. The power for organizations lies in the act of methodically and collaboratively building a collective resilience framework to increase their ability to thrive in the face of complex challenges for which the answer, and often even the definition of the problem itself, may not be obvious. These challenges frequently require both the organization and the leaders within them to make trade-offs in values and loyalties. Often, an individual's resilience will 'get them through' such changes, but a more effective approach is to build organizational resilience before we need it. Building resilience involves intentional preparation to increase our ability to emerge from challenges better equipped to deal with them than we were in the past--a transformation into a stronger self. For organizations in an

environment of rapid, disruptive change, there is often no 'back' to bounce to after disruption, because by the time they right themselves things have changed. This book presents a simple framework that can be applied to both individuals and organizations. It's proven and it works. Written in our 'pull no punches' style, Resilience: It's Not About Bouncing Back begins by explaining the case for resilience, how building it is not only possible, but imperative for creating successful leaders and organizations in today's rapidly changing world. The book goes on to present the our proven, proprietary LeaderShift Resilience Framework drawing on real examples and pointed exercises to deliver a down-to-earth strategy for building resilient leaders and companies. Connecting the dots between Resilience and ground-breaking work on Adaptive Leadership from Harvard's Ron Heifetz and others, we've intertwined our own wisdom gleaned from years spent tackling these issues with leaders across the globe. The result is a candid, insightful and easily absorbed template that

helps organizations banish 'change fatigue' once and for all and instead be energized and elevated by disruption - one leader at a time. Spanning a combined five decades of corporate leadership positions and consulting work focused on organization restructuring and leadership development, Cynthia Barlow and Jennifer Eggers have seen thousands of organizations struggle in the face of change. They have seen it all -- the good and the bad - and believe that resilience is the key ingredient to building healthy, thriving leaders and organizations. Cynthia runs C3 Conversations, Inc., a boutique consulting firm out of Toronto, coaching leaders and delivering life-changing personal-growth programs for over 30 years. Jennifer runs LeaderShift Insights, a firm focused on building adaptive leadership and alignment at some of the most recognized brands in the world. She founded her firm after serving in several leadership roles for Fortune 50 companies. *ProphetAbility* Morgan James Pub

Conventional business wisdom tells you that there's always something to learn from failure. Not true, says Barry Moltz. Sometimes, failure just stinks. *Bounce!* explains how success and failure are simply normal outcomes in the regular lifecycle of a business and that process over the long term matters far more than individual outcomes. This book shows you how to build a business that can “bounce” through these cycles for long-term success. If you run a business, better make it *Bounce!*  
*From Immigrant Household to Cambridge Fellowship* Feiwel & Friends  
A street smart, inspiring,

practical and utterly honest book for renewing or resuming your career. Millions of mid- and late-career professionals are wondering why our careers are dying. We've been fired, downsized, job-eliminated, or we've left work voluntarily to raise children, care for loved ones, or go to school. Our unemployment rate is more than three times the national average. It takes twice as long to get hired, usually for far less money than we were making. Is it age discrimination? Maybe. But it's not that simple. So many of us have lagged on skills and technology, shrugged off social media, or ignored the rate of change and let younger people become the face of our profession's future. Our "track record" really doesn't matter. We want to come back, but we aren't ready. *Coming Back* offers clear advice, including: -Make yourself visible and relevant by sharing articles and information on your field with colleagues and on social media. -Use LinkedIn to build your network in your industry and identify decision makers. -Tell interviewers about what you will do—don't rely on what

you have done. -Stop grousing about "those millennials" and start working with them. - Volunteer strategically to build leadership skills and networks. *Coming Back* shows how you can save a career if still employed or get one back if cast out. Fawn Germer, one of the nation's most popular leadership experts and global motivational speakers, has personally interviewed more than 300 CEOs, senior executives, professors, lawyers, organizational experts, industry leaders and professionals. The result is a tactical, tough-love call to action: to learn, re-tool, connect, grow, and get ready to work again.

For three decades the Toronto Argonauts were a national joke: a team that not only lost most of the time, but usually did so in embarrassing fashion. The franchise bottomed out in 1981 with just two wins. But 1981 was not a complete disaster because, even while finding new and more creative ways to lose, the Argos were assembling many of the key components that helped the franchise return to excitement in 1982 and Grey Cup glory in 1983. Thirty years after that long-awaited triumph, Bouncing Back takes readers on a wild ride through the three eventful and mesmerizing years that culminated in the 1983 Grey Cup, from crushing humiliations through sensational resurgence and finally the ultimate triumph.
