Plunkett Research, Ltd. Celebrate 75 years of Ferrari with this complete, fascinating, and stunningly illustrated history highlighting the company's legendary sports cars and their worldwide influence. A

stellar combination of beauty, engineering, racing success, exclusivity, and Italian flair combine to make Ferrari the world's most legendary carmaker. All these traits coalesce in the form of Ferrari's road cars. No other sports car manufacturer has so consistently set the bar for style and performance. It's a near unbroken 75-year run of automotive hits: The 125S in 1947 The versatile 340 in the 1950s The stunning 250s and 275s of the 1960s The Daytona in the 1970s The shocking F40 in the 1990s The modern era's outrageous hypercars like the Enzo, F8, and LaFerrari Ferrari: 75 Years dives deep into Ferrari's sports car history beginning in 1947, but also examines Enzo Ferrari's early career with Alfa-Romeo before he launched his legendary company. Automotive historian and photographer Dennis Adler offers Ferrari owners and fans a full and fascinating picture of Maranello's 75 years of sports car manufacturing. Adler's detailed text is accompanied by his breathtaking photography and supplemented by important historic images. For 75 years, Ferrari has

created high-performance automotive works of art to fire the imaginations of car lovers and performance enthusiasts the world over. Ferrari: 75 Years provides an inspiring and illuminating look back at this history. *Honda Civic* Simon and Schuster Researched and written in Japan with the full co-operation of the factory, here in definitive detail is the story of the Honda S2000 - a series of open two-seaters that built on the success of the NSX, helping the company justify its on-track exploits with a proper line of sporting machinery. Successful immediately, the S2000 models defended Honda's honour on the tracks, but it was in the showrooms where the S2000 excelled. After a major face-lift, it was eventually killed off in 2009, but is as popular today as it ever was as a modern classic for enthusiasts.

BUILDING HONDA K-SERIES ENGINE PERFORMANCE

Vintage

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their

parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda

enthusiast.

urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough

technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach. Slammed CarTech Inc

The Disneyland Book of Lists offers a new way to explore six decades of Disneyland® history. Hundreds of fascinating lists cover the past and present and feature everything from the park's famous attractions, shops, restaurants, parades, and live shows to the creative artists, designers, characters, and performers who have made Disneyland® the world's most beloved theme park. Inside the pages of this fun- and

fact-filled book you will find: • 13 of Walt Disney's Disneyland® Favorites • 32 Signs and Structures Reminding of Disneyland's® Past • A Dozen Scary Moments on Disneyland® Attractions • 47 Disneyland® Parades • 18 Secrets in the Haunted Mansion • 30 Jokes from the Jungle Cruise • 25 Special Events You May Not Have Heard Of • 15 Urban Legends • 123 Celebrity Guests • 26 Attractions and Exhibits with the Longest Names • 11 Movies Based on Disneyland® Attractions • A Dozen World Records Set at Disneyland® In addition to lists created by author Chris Strodder (The Disneyland® Encyclopedia), the book will include lists from celebrities, Disneyland® experts and historians, Disneyland® Imagineers and designers, and other current and former Disneyland® employees. People have been making lists since Biblical times (think Seven Wonders of the Ancient World, compiled 2,100 years ago), and to this day various top tens, hit parades, and bucket lists chronicle every aspect of our lives. But until now, no book has used lists to categorize all the diverse elements in Disneyland®.

Fun, fascinating, factual, and sixty years in the making, The Disneyland® Book of Lists is the only Disneyland® book of its kind.

The explosive true story of fraud, embezzlement, and government betrayal. In 2000, the US Centers for Disease Control (CDC) carried out a secret mission to bury, skew, and manipulate data in six vaccine safety studies, in a coordinated effort to control the message that "vaccines do not cause autism." They did so via secret meetings and backtesting health-care data. The CDC invested tens of millions of dollars in a foreign health-care data analytics startup run by Danish scientist Poul Thorsen, a move to ensure that no link ever surfaced. But fate had other ideas. The agency soon learned it couldn't control Thorsen. In 2011, the US Justice Department indicted him for the theft of more than \$1 million of CDC grant money. Master Manipulator exposes the CDC's hidden agenda for the cover-up. Influenced by Big Pharma money, future high-paying jobs, and political lobbyists,

CDC executives charted a course different than what the findings of earlier vaccine safety studies revealed. The CDC needed an outsider to “flatten” the results of the data, while building an exit strategy: a fall guy in case the secret plan was exposed. Thorsen fit the bill nicely, conducting

studies overseas. But the CDC’s plan backfired, as Thorsen took the money to the bank and the power went to his head. It would take years for his fraud scheme—funneling CDC grant money to a Danish university and then back to a CDC bank account he controlled—to play out. Master Manipulator is a true story of fraud and

betrayal, and an insider’s view of what takes place behind the closed doors of agencies and drug companies, and with the people tasked to protect the health of American children. It’s a cautionary tale of the dangers of blind trust in the government and the health-care industry.
