Originally
published in
1978, this
volume is
divided into 3
parts. Part 1
presents an

overview of
the linguistic
situation in
Zambia: who
speaks which
languages,
where they
are spoken,
what these
languages are
like. Special
emphasis is
given to the
extensive
survey of the
languages of
the Kafue
basin, where
extensive
changes and
relocations
have taken
place. Part 2 is
on language
use: patterns

of
competence
and of
extension for
certain
languages in
urban
settings,
configurations
of
comprehensio
n across
language
boundaries,
how selected
groups of
multilinguals
employ each
of their
languages and
for what
purposes,
what
languages are
used in radio

and television broadcasting and how decisions to use or not use a language are made. Part 3 involves language and formal education: what languages, Zambian and foreign, are used at various levels in the schools, which are taught, with what curricula, methods, how teachers are trained, how issues such as adult literacy are approached and with what success.

Bemba: A

Learner's Guide to Zambia's Largest Language
African Books Collective
With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention

and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and

references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and

monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health

foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Mandinka English Dictionary Oxford University Press Originally published in 1975, the studies in this volume examine the range of factors which mediate the development of social processes in both town and country: as well as migration

there is the ebb and flow of beliefs, ideologies and educational and occupational opportunities. It considers the fundamental economic and political bases of migrations in the form of colonialism or multi-national controls of various kinds, international commodity markets of supply and demand, and the distinct development policies adopted by independent governments. The editor's introduction

discusses old and new models of migration; the origins of rural inequalities in development; the degree of continuity of language and belief systems between town and country and the persistence of rural links in urban settlements. *Bemba-English Dictionary* Walter de Gruyter Bemba for children! Lulu.com Storytelling plays an important part in the vibrant cultural life of Zambia and in many other communities across Africa. This innovative book provides a collection and analysis of oral narrative traditions as practiced by five Bemba-speaking ethnic groups in Zambia. The integration of

newly digitalised audio and video recordings into the text enables the reader to encounter the storytellers themselves and hear their narratives. Robert Cancel's thorough critical interpretation, combined with these newly digitalised audio and video materials, makes Storytelling in Northern Zambia a much needed addition to the slender corpus of African

folklore studies that deal with storytelling performance. Cancel threads his way between the complex demands of African fieldwork studies, folklore theory, narrative modes, reflexive description and simple documentation and succeeds in bringing to the reader a set of performers and their performances that are vivid, varied and instructive. He illustrates this

living narrative tradition with a wide range of examples, and highlights the social status of narrators and the complex local identities that are at play. Cancel's study tells us not only about storytelling but sheds light on the study of oral literatures throughout Africa and beyond. Its innovative format, meanwhile, explores new directions in the integration of primary source

material into scholarly texts. This book is the third volume in the World Oral Literature Series, developed in conjunction with the World Oral Literature Project. *Some Bemba Names and Their Meanings* BoD – Books on Demand This dictionary focuses on popular words and phrases, compiled to assist students of Bemba or English. **a Bemba-English dictionary of diseases and**
