With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects

and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The national income and product accounts that underlie gross domestic product (GDP), together with other key economic

data—price and employment statistics—are widely used as indicators of how well the nation is doing. GDP, however, is focused on the production of goods and services sold in markets and reveals relatively little about important production in the home and other areas outside of markets. A set of satellite accounts—in areas such as health, education, volunteer and home production, and environmental improvement or pollution—would contribute to a better understanding of major issues related to economic growth and societal well-being. *Beyond the Market: Designing Nonmarket Accounts for the United States* hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress.
