ACE Personal Trainer Manual Lippincott Williams & Wilkins

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help

students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and

share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

NASM Essentials of Corrective Exercise Training introduces the health and fitness professional to NASM's proprietary Corrective Exercise Continuum, a system of training that uses corrective exercise strategies to help improve muscle imbalances and movement efficiency to decrease the risk of injury. This textbook includes several new chapters that were not included in NASM's previous corrective exercise materials, including the rationale for corrective exercise training, assessments of health risk, static postural assessments, range of motion assessments, and strength assessments (manual muscle testing) as well as corrective exercise strategies for the cervical spine, elbow, and wrist. There are more than 100 corrective exercise techniques in the categories of self-myofascial release, static stretching, neuromuscular stretching, isolated

strength training, positional isometrics, and integrated dynamic movements included in the text. These, along with corrective exercise strategies for common movement impairments seen in each segment of the body, make this text the premier resource for learning and applying NASM's systematic approach to corrective exercise training.

The ACE Advanced Health & Fitness Specialist Manual w/DVD is designed for experienced personal trainers who want to expand their clientele beyond the restrictions of the "apparently healthy" category. The new manual and certification focus on those diseases and injuries most frequently encountered among clients in health and fitness facilities, from diabetes and low-back pain to lipid disorders and post-orthopedic rehabilitation. This manual is divided into

five parts, the first of which provides an Introduction to this ACE certification program. Part Two covers the Major Cardiovascular and Pulmonary Diseases and Disorders. Metabolic Diseases and Disorders are the focus of Part Three. With eight chapters, Part Four, which covers Musculoskeletal Disorders, is the largest section of the manual. Part Five, the final section of the manual, offers Considerations for Specialized Population Groups, including older adults, youth and pre- and postnatal women. Case studies are included in each chapter in Parts Two through Five, giving the exam candidate an example of how to apply what's been learned in a very practical way. Includes bonus 100-minute DVD.
