Relations Between Blacks & Jews in the United States

Routledge

This comprehensive text thoroughly reviews the theories and history of racism, the sociology of and the psychology of racism, intergroup relations and intergroup conflict, and how racism is manifested institutionally, between groups, and between people, providing a unique view of the connections between these multiple perspectives. Readers can then apply this knowledge to their work as helping professionals. Students learn to explore their own biases and how they influence their view of themselves and others, which strengthens their work with future clients. Fulfilling NASW and CSWE cultural competency requirements, this book teaches socially just practices to helping professionals from any discipline. Many people want to dismantle racism but they do not know how. This book gets us closer to that goal. Using critical race theory as a conceptual framework, the text analyzes all levels of racism: personal, professional, institutional, and cultural. Integrating theory, research, and practice, racism is linked to other forms of oppression with an emphasis on how helping professionals can respond. Tips on how to facilitate racial dialogues are provided. Early chapters map out the contours of racism and later chapters emphasize how to dismantle it. Readers appreciate the book's sensitive approach to this difficult topic. Examples and exercises encourage insight into understanding racism, and insightful analyses offer strategies, solutions, and hope. Readers learn to respond to racism in all contexts including working with individuals, families, groups,

organizations, and communities. NEW TO THE SECOND EDITION: Reflects recent sociopolitical changes including "Islamophobia" the Obama presidency, the murders of young men of color by police, the racialization of the criminal justice system, and current immigration issues. More cases and experiential exercises help readers explore how racism is manifested and how to incorporate the lessons learned into future working environments. More emphasis on the intersectionality of racism and other social oppressions including class, gender, sexual orientation, citizenship, immigration experiences, and disability to give readers a better understanding of the relationship between these issues. PowerPoints and Instructor's resources with sample syllabi, teaching tips, and suggested videos and related websites. An ideal text for advanced courses on racism, oppression, diversity, prejudice and discrimination, or racism and professional practice, this book also appeals to helping professionals (social workers, psychologists, counselors, and nurses) who need to understand racism to better serve their clients.

EDUCATING PEOPLE FROM PRIVILEGED GROUPS, SECOND EDITION

Duke University Press

The fight for economic justice can draw stark battle lines, with the fight portrayed simplistically as Us versus Them, with the rich in the role of "Them." So where does that leave young people with wealth who believe in social change? Afraid of being branded the enemy, yet deeply committed to social justice, they're left in a confusing no-man's land. This conflict can lead most young people with wealth to keep their privilege hidden, making it impossible for them to bring their resources, access, and connections to the struggle for social change. Coauthored by Karen Pittelman, who dissolved her \$3 million trust fund to cofound a foundation for low-income women activists, *Classified* is a resource guide for people with class privilege who are tired of cover-ups and ready to figure out how their privilege really works. Complete with comics, exercises, and personal stories, this book gives readers the tools they need to put their privilege to work for social change.

Connecting Narrative and the Arts in Antiracist Teaching

Social Change Press

Through accessible language and candid discussions, *Storytelling for Social Justice* explores the stories we tell ourselves and each other about race and racism in our society. Making sense of the racial constructions expressed through the language and images we encounter every day, this book provides strategies for developing a more critical understanding of how racism operates culturally and institutionally in our society. Using the arts in general, and storytelling in particular, the book examines ways to teach and learn about race by creating counter-storytelling communities that can promote more critical and thoughtful dialogue about racism and the remedies necessary to dismantle it in our institutions and interactions. Illustrated throughout with examples drawn from contemporary movements for change, high school and college classrooms, community building and professional development programs, the book provides tools for examining racism as well as other issues of social justice. For every facilitator and educator who has struggled with how to get the conversation on race going or who has suffered through silences and antagonism, the innovative model presented in this book offers a practical and critical framework for thinking about and acting on stories about racism and other forms of injustice. This new edition includes: Social science examples, in addition to the arts, for elucidating the storytelling model; Short essays by users that illustrate some of the ways the storytelling model has been used in teaching, training, community building and activism; Updated examples, references and resources.

IMPLICATIONS FOR THE HELPING PROFESSIONS

SAGE Publications

Case Studies on Diversity and Social Justice Education offers pre-

and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable insight for

understanding the complexities of each case.

Over a decade ago, the first edition of *City Schools and the American Dream* debuted just as reformers were gearing up to make sweeping changes in urban education. Despite the rhetoric and many reform initiatives, urban schools continue to struggle under the weight of serious challenges. What went wrong and is there hope for future change? More than a new edition, this sequel to the original bestseller has been substantially revised to include insights from new research, recent demographic trends, and emerging political realities. In addition to surveying the various limitations that urban schools face, the book also highlights programs, communities, and schools that are making good on public education's promise of equity. With renewed commitment and sense of urgency, this new edition provides a clear-eyed vision of what it will take to ensure the success of city schools and their students. "City schools continue to play one of the most important roles in our quest to restore democracy. This is a must-read . . . again!" —Gloria Ladson-Billings, University of Wisconsin–Madison "The authors provide concrete examples of innovative strategies and practices employed by urban schools that are succeeding against all odds." —Betty A. The contributors—youth, educators, activists, others—share what it is like to face discrimination, challenge unjust policy, or subvert monotony by cultivating a vibrant, equitable, revolutionary school environment.

Thirty-six major contemporary writers examine life in a deeply divided America—including Anthony Doerr, Ann Patchett, Roxane Gay, Rebecca Solnit, Hector Tobar, Joyce Carol Oates, Edwidge Danticat, Richard Russo, Eula Bliss, Karen Russell, and many more. America is broken. You don't need a fistful of statistics to know this. Visit any city, and evidence of our shattered social compact will present itself. From Appalachia to the Rust Belt and down to rural Texas, the gap between the wealthiest and the poorest stretches to unimaginable chasms. Whether the cause of this inequality is systemic injustice, the entrenchment of racism in our culture, the long war on drugs, or immigration policies, it

endangers not only the American Dream but our very lives. In *Tales of Two Americas*, some of the literary world's most exciting writers look beyond numbers and wages to convey what it feels like to live in this divided nation. Their extraordinarily powerful stories, essays, and poems demonstrate how boundaries break down when experiences are shared, and that in sharing our stories we can help to alleviate a suffering that touches so many people.

And Other Conversations in an Era of School Resegregation
Psychology Press

Professing a policy of cultural and social integration, the American settlement house movement made early progress in helping immigrants adjust to life in American cities. However, when African Americans migrating from the rural South in the early twentieth century began to replace white immigrants in settlement environs, most houses failed to redirect their efforts toward their new neighbors. Nationally, the movement did not take a concerted stand on the issue of race until after World War II. In *Black Neighbors*, Elisabeth Lasch-Quinn analyzes this reluctance of the mainstream settlement house movement to

extend its programs to African American communities, which, she argues, were assisted instead by a variety of alternative organizations. Lasch-Quinn recasts the traditional definitions, periods, and regional divisions of settlement work and uncovers a vast settlement movement among African Americans. By placing community work conducted by the YWCA, black women's clubs, religious missions, southern industrial schools, and other organizations within the settlement tradition, she highlights their significance as well as the mainstream movement's failure to recognize the enormous potential in alliances with these groups. Her analysis fundamentally revises our understanding of the role that race has played in American social reform.
