now World Scientific Shows how changes in work, family structure, women's roles, and other factors have caused people to become increasingly disconnected from family, friends, neighbors, and democratic structures--and how they may reconnect.

WIKI BRILL

Tanus is the fair-haired young lion of a warrior whom the gods have decreed will lead Egypt's army in a bold

attempt to reunite the Kingdom's shattered halves. But Tanus will have to defy the same gods to attain the reward they have forbidden him, an object more prized than battle's glory: possession of the Lady Lostris, a rare beauty with skin the color of oiled cedar--destined for the adoration of a nation, and the love of one extraordinary man.

International bestselling author Wilbur

Smith, creator of over two dozen highly acclaimed novels, draws readers into a magnificent, richly imagined Egyptian saga. Exploding with all the drama, mystery, and rage of ancient Egypt, River God is a masterpiece from a storyteller at the height of his powers.

A WALKING DEAD SHORT

IGI Global Blended learning has recently been gaining popularity within

educational fields. Examining the impact that computer-assisted techniques have on foreign language education will provide more effective ways to enhance learning techniques for educators and students alike. Applications of CALL Theory in ESL and EFL Environments is a pivotal reference source that discusses recent advances relating to online teaching and learning of

foreign languages. Highlighting relevant topics such as electronic portfolio assessments, corpus linguists, flipped learning models, and student engagement, this scholarly resource is ideal for educators, academicians, students, and researchers that are interested in staying current on the latest technologies and methodologies in foreign language

learning. **Worlding** Simon and Schuster The #1 New York Times bestselling sequel to Words of Radiance, from epic fantasy author Brandon Sanderson at the top of his game. In Oathbringer, the third volume of the New York Times bestselling Stormlight Archive, humanity faces a new Desolation with the return of the Voidbringers, a foe with numbers as

great as their
thirst for
vengeance.

sophisticated communication networks. These changes have forced a mass rethinking of the way we coordinate, collaborate, and communicate. Instead of projects coming to established teams, teams are increasingly converging around projects. These “all-edge adhocracies” are highly collaborative and mostly temporary, their edge coming from the ability to

form links both inside and outside an organization. These nimble groups come together around a specific task, recruiting personnel, assigning roles, and establishing objectives. When the work is done they disband their members and take their skills to the next project. Spinuzzi offers for the first time a comprehensive framework for understanding how these new groups

function and thrive. His rigorous analysis tackles both the pros and cons of this evolving workflow and is based in case studies of real all-edge adhocracies at work. His provocative results will challenge our long-held assumptions about how we should be doing work. *An Existential Approach to Buddhism* IGI Global The ninth edition of this textbook for hybrid introductory

communication courses provides a balanced introduction to the fundamental theories and principles of communication. The book explores communication in a variety of contexts—including interpersonal, group, organizational, and mass media—and provides students the theoretical knowledge and the research and critical thinking skills they'll need to succeed in

advanced communication courses and professions. The first section explores the history of communication study and explains basic perspectives used by scholars in the field. The second looks at how communicators decode and encode messages, while the third examines channels and contexts, from interpersonal to mass media. This edition devotes attention to how new

technologies are changing the ways we think about communication, with revised and updated examples, and gives special attention to relevant critical theory. Two appendices give users the flexibility to tailor their courses to the interests and needs of their students, offering guidelines for preparing and presenting public presentations and giving examples of major research methods.

Thinking Through Communication is an ideal textbook for Introduction to Communication courses that aim to provide a comprehensive overview of the field. A companion website for instructors containing PowerPoint slides, test questions, and an instructor's manual is available at <https://routledge.com/textbooks/9780367857011>.

As technology and technological advancements become a more prevalent and essential aspect of daily and business life, educational institutions must keep pace in order to maintain relevance and retain their ability to adequately prepare students for their lives beyond education. Such institutions and their leaders are seeking relevant strategies for

the implementation and effective use of new and upcoming technologies and leadership strategies to best serve students and educators within educational settings. As traditional education methods become more outdated, strategies to supplement and bolster them through technology and effective management become essential to the success of institutions and programs.

The Handbook of Research on Modern Educational Technologies, Applications, and Management is an all-encompassing two-volume scholarly reference comprised of 58 original and previously unpublished research articles that provide cutting-edge, multidisciplinary research and expert insights on advancing technologies used in educational settings as well as current strategies for administrative and leadership roles in education. Covering a wide range of topics including but not limited to community engagement, educational games, data management, and mobile learning, this publication provides insights into technological advancements with educational applications and examines forthcoming implementation strategies. These strategies are ideal for teachers, instructional designers, curriculum developers, educational software developers, and information technology specialists looking to promote effective learning in the classroom through cutting-edge learning technologies, new learning theories, and successful leadership tactics. Administrators, educational leaders, educational policymakers, and other education

professionals will also benefit from this publication by utilizing the extensive research on managing educational institutions and providing valuable training and professional development initiatives as well as implementing the latest administrative technologies. Additionally, academicians, researchers, and students in areas that include but are not limited to educational technology, academic

leadership, mentorship, learning environments, and educational support systems will benefit from the extensive research compiled within this publication. An Introduction to the Study of Human Communication Idea & Design Works Llc This book provides an example of the capitalization of computer and wiki technology to support collaborative

writing among Mainland Chinese upper primary school students. It presents the results of a study showing the application of the Design-Based Research (DBR) methodology to design a Wiki-based Collaborative Process Writing Pedagogy (WCPWP) to help students with their writing in the Chinese context. The WCPWP is designed and developed based on social

constructivist theory and the social view of writing process theory, as well as in consideration of the Technological, Pedagogical, and Content Knowledge (TPACK) framework. Primarily aimed at researchers and practitioners in the fields of collaborative learning, TPACK, and Chinese writing, as well as Chinese language educators, this book will also deepen primary

educators' understanding of the links among technology, pedagogy and content, and guide educators in the integration of social media, as well as the design of effective matching pedagogic strategies, in their teaching of writing. Gen Z Effect IGI Global Just Another Day at the Office reveals the never-before-known details of how Philip Blake (aka The Governor) took full

control of Woodbury. In this exciting story that takes place between The Walking Dead: Rise of the Governor and The Walking Dead: The Road to Woodbury, Philip unleashes his full fury on the previous leaders of the small walled-off town. This one-man-army, a man on his way to becoming the fearsome Governor who will eventually go up against Rick Grimes and company, single-handedly

takes on all foes, both zombie and human alike. Robert Kirkman and Jay Bonansinga's story was originally published in issue 1 of *The Walking Dead* magazine and contains approximately 3,500 words, along with an extended excerpt for *The Walking Dead: The Road to Woodbury*.  The boundaries of citizenship have been blurred by global information systems—while the public and private spheres have been reshaped through globalization (and colonialism and capitalism). This collection of new essays explores

information and citizenship in the digital age from a range of perspectives, presenting cautionary tales along with possibilities for “decolonizing” digital information and literacy. Topics include Wikileaks and the dissolution of information; ethical issues for teachers, policy makers and librarians; and creating safe spaces through ethical librarianship. **New Romantic**

When God comes into our lives, we change. Our new identity in Christ comes into tension with our old identity in ourselves as the Holy Spirit works in our hearts and minds. This tension arises between who we were and who God created us to be, between us and God, and between us and those around us. The Apostle Paul calls the work of the Holy Spirit in our lives sanctification.

Life in Tension reflects on Jesus' Beatitudes in the context of scripture. The Beatitudes serve as an introduction to the Sermon on the Mount and lay out Jesus' priorities in teaching his disciples. Because the sermon serves as a kind of ordination service for the Apostles, the importance of the Beatitudes for the early church, Christian spirituality, and discipleship today cannot be overstated. Life in Tension

is organized as a devotional. Each chapter offers a reflection, a prayer, and discussion questions. Chapters are organized around the nine Beatitudes in Matthew. This revised edition facilitates ease of reading. It has an updated cover, fewer Greek and Hebrew references, and fewer footnotes than the original edition. Some editing to enhance clarity has also been

done. Hear the words; Walk the steps; Experience the joy! Key words for this book include: Beatitudes, Christianity, spirituality, Jesus, Bible, devotion, faith. prayer, spiritual growth, discipling, Christian spirituality, devotional, sanctification, and faith. Author Stephen W. Hiemstra (MDiv, PhD) is a slave of Christ, husband, father, tentmaker, writer, and

speaker. He lives with Maryam, his wife of 30+ years, in Centreville, VA and they have three grown children. *Papers from CELDA 2014* Bloomsbury Publishing Command-and-control may have once been an effective model in managing the large numbers of cookie-cutter clones that business programs were producing faster than anyone could say "MBA," but the rapid change and

increasing complexity of the twenty-first century have rendered that model obsolete. For the most part, today's managers who were trained in the old ways are not adept to succeed in the current work environment that has evolved from take-it-or-leave-it hierarchies to collaborative networks of workers and managers feeding off of each other's ideas to build the business together. The new age of

mass collaboration demands a new and extremely different model to manage by today--wiki management. Featuring enlightening examples from forward-thinking companies including Google, Whole Foods, Linux, and Wikipedia, Wiki Management outlines the revolutionary, necessary steps companies must take to:

- Leverage their collective intelligence • Effectively

integrate diverse points of view • Transition leaders from the role of “boss” to that of facilitator • Make “delighting customers” more important than pleasing superiors • Achieve a shared and actionable understanding of the key drivers of business successIt’s a different world today than the one you were educated in, trained in, and found great success in. This “wiki” world has

reshaped both the work we do and the way we do it, making mass collaboration not only possible but usually the best solution. This groundbreaking book reveals what it takes for managers of any generation to succeed in this fast-paced and exciting new environment. **Book Three of the Stormlight Archive** Oxford University Press Now in paperback and with an

update about pets during COVID. In the last 20 years pets have gone from the backyard to sleeping on our beds, then showing up in every corner of America. Pet Nation tells the story of this seismic shift and the economic, media, legal, political, and social dramas springing from this cultural transformation . Since 1998 the pet population in the U.S. has almost doubled -- about two-thirds of the country now

owns a pet. No longer left to wander the neighborhood, dogs and cats eat special food, get individualized medical attention, and even fly in the cabin. As founder of the Animal Policy Group, Mark Cushing provides an inside look at the rise of Pet Nation, tracking the myriad ways pets are acquired (a "Canine Freedom Train" runs south to north), reporting on pet rights legislation

(and the unseen problems that come with elevating their status), pet healthcare (revealing the truth and myths about large scale breeders), and discovering that despite what many organizations would have us believe, there is a shortage of dogs. Insightful, surprising, and full of great stories, Pet Nation opens our eyes to the big changes happening in front of us right now. It shows us not

only what our love of animals says about pets, it shows us what it says about ourselves.
