THE SECRET TO CREATING AN INSPIRED AND FULFILLING LIFE

Springer Nature It has been ten years since Rachael Keogh was catapulted into the public consciousness, when a shocking image of her needle-ravaged arms - skin burnt from injecting heroin into her wasted veins - made front pages around the country. Desperate for help, she made a public appeal to get one of 27 detox beds in Ireland so that she could reclaim her life from the drugs that had ravaged it. What followed was an extraordinary story of grit and determination as she embarked on her recovery journey. Her story became an instant bestseller and has resonated with readers ever since. This edition contains a new introduction from Rachael where she reflects on her story and considers what has

changed for her and in the drugs culture in Ireland over the last decade. 'The best book by far about the drugs explosion in Dublin' Irish Independent 'This book should be on the school curriculum' Evening Echo

The Lean Startup ReadHowYouWant.com

Service Design and Delivery provides a comprehensive overview of the increasingly important role played by the service industry. Focusing on the development of different processes employed by service organizations, the book emphasizes management of service in relation to products. It not only explores the complexity of this relationship, but also introduces strategies used in the design and management of service across various sectors, highlighting where tools, techniques and processes applicable to one sector may prove useful in another. The implementation methods introduced in the book also illustrate how and why companies can transform themselves into service organizations. While the book is primarily intended as a text for advanced-level courses in service design and delivery, it also contains theoretical and practical knowledge beneficial to both practitioners in the service sector and those in manufacturing contemplating moving towards service delivery.

Mining and Community in South Africa Edinburgh University Press South Africa's Suspended Revolution tells the story of South Africa's democratic transition and the prospects for the country to develop a truly inclusive political system. Beginning with an account of the transition in the leadership of the African National Congress from Thabo Mbeki to Jacob Zuma, the book then broadens its lens to examine the relationship of South Africa's

political elite to its citizens. It also examines the evolution of economic and social policies through the democratic transition, as well as the development of a postapartheid business community and a foreign policy designed to re-engage South Africa with the world community. Written by one of South Africa's leading scholars and political commentators, the book combines historical and contemporary analysis with strategies for an alternative political agenda. Adam Habib connects the lessons of the South African experience with theories of democratic transition, social change, and conflict resolution. Political leaders, scholars, students, and activists will all find material here to deepen their understanding of the challenges and opportunities of contemporary South Africa.

Land Redistribution for Agricultural Development Bookdash

Fostering inclusive green growth in Africa means addressing existing and emerging development challenges, while efficiently managing Africa's natural capital and building resilience to environmental, social and economic risks. Although this new paradigm for development has the potential to create tremendous business opportunities, there are also challenges. This book provides empirical evidence on the conditions for the emergence of green businesses in Africa. It includes 13 case studies, which identify the determinants of small and medium-size enterprises' engagement in inclusive and sustainable growth in rural Africa, and the factors that hinder eco-innovation in business and entrepreneurial activities. Furthermore it discusses appropriate regulations and policies to stimulate the development of green business in Africa. Offering insights into the relationship between eco-innovation, labor productivity and business competitiveness in rural Africa, this book appeals to scholars, policy makers and practitioners interested in a green economy for Africa.

Social entrepreneurship explained Social entrepreneurship is a hot topic in public and non-profit management. Organizations everywhere are looking for innovative ways to respond to financial, social, and regulatory pressures. The next generation of transformative leaders will be risk takers who know how to face even the biggest challenges using market-driven strategies that get results. This book contains everything students and professionals need to know about the cutting-edge practice of social entrepreneurship. In *Social Entrepreneurship*, you'll learn how to read markets and environments to identify opportunities for entrepreneurial activity. Then, the authors show to convert opportunities into successful ventures: one-time initiatives, ongoing programs and new, mission-driven organizations are all covered. Sector-specific strategies and recommendations guide readers directly to the techniques that will have the biggest impact. Employs an evidence-based approach to help organizations achieve goals more efficiently Offers advice on taking advantage of new technologies and untapped resources using the most current approaches Written by renowned experts in the field of social entrepreneurship Authors Guo and Bielefeld have been instrumental in advancing the study of social entrepreneurship, and they understand the trends and currents in the field. They bring readers up to date and ready them to begin implementing changes that really make a difference. In non-profits and government, leadership is already becoming synonymous with social entrepreneurship, and this book is its foundation.

An Evidence-Based Approach to Creating Social Value Routledge Applied Linguistics

A small but influential group of mainstream global industry leaders are now reinventing the role of business in society. They are shifting the focus away from minimizing negative impacts to

offering new solutions to global problems that the public sector has been unable to tackle alone. In this new competitive environment, societal challenges such as climate change or the alleviation of global poverty are not only risks, but huge business opportunities, not only for niche players, but for mainstream business. These leaders are creating "Sustainable Value". They are creating it through the provision of value to both their shareholders and their stakeholders - an ever-growing list of diverse constituents impacted by the social, environmental, and financial performance of global business. In short, they are doing well by doing good. In this outstanding book, Chris Laszlo defines, illustrates, and shows how business can action 'Sustainable Value' in three profoundly different ways. First, a management fable looks at the experiences of a dynamic business leader as she grapples with the new business realities of managing stakeholder, as well as shareholder pressures. Second, with the real thing - inside stories from some of the largest corporations in the world that are successfully integrating sustainability into their core activities, not only from a sense of moral correctness, but because it makes good business sense. And, finally, with frameworks, tools, and methods that will make sustainable value creation concrete for business practitioners everywhere. This book is a masterful synthesis - part novel and part executive briefing - a refreshing kind of prophetic pragmatism, helping leaders anticipate and see the future in the context of the actual. In *Sustainable Value* Chris Laszlo speaks with resounding clarity to the living challenges, the real dilemmas, and haunting questions of CEOs everywhere.

The World Atlas of Language Structures Cambridge University Press

NEW YORK TIMES BESTSELLER! Part how-to, part girl-empowerment, and all fun, from the leader of the movement championed by Sheryl Sandberg, Malala Yousafzai, and John Legend. Since 2012, the organization Girls Who Code has taught computing skills to and inspired over 40,000 girls across America. Now its founder, and author *Brave Not Perfect*, Reshma Saujani, wants to inspire you to be a girl who codes! Bursting with dynamic artwork, down-to-earth explanations of coding principles, and real-life stories of girls and women working at places like Pixar and NASA, this graphically animated book shows what a huge role computer science plays in our lives and how much fun it can be. No matter your interest—sports, the arts, baking, student government, social justice—coding can help you do what you love and make your dreams come true. Whether you're a girl who's never coded before, a girl who codes, or a parent raising one, this entertaining book, printed in bold two-color and featuring art on every page, will have you itching to create your own apps, games, and robots to make the world a better place.

helps you stay on track. You'll see how simple it really is to make things happen as you follow these steps. It's time to discover ... the riches within!

Challenges and Opportunities for Green Business in Rural Africa
Gateway Books

Featuring brilliant art, engaging new case studies, and dynamic new teaching and learning resources, this 9th edition of Porth's *Pathophysiology: Concepts of Altered Health States* is captivating, accessible, and student-friendly while retaining the comprehensive, nursing-focused coverage that has made it a market leader. The book's unique emphasis on "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and psychological aspects of altered health. Drawing on the expertise of new co-author Sheila Grossman, the Ninth Edition maintains its comprehensive depth, while paring down content where appropriate and replacing descriptive content with striking art. (Approximately 600 illustrations are new or have been re-rendered in a consistent modern style.) Also new to this edition are advanced 3D narrated animations that address the most clinically relevant and difficult to understand disorders, engaging unit-opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now, for the first time, Porth's *Pathophysiology* is supported by PrepU, an adaptive learning system that help students learn more, while giving instructors the data they need to monitor each student's progress, strengths, and weaknesses.

Sheep will never rule the world John Wiley & Sons

An internationally renowned self-help speaker draws on his research and teachings to outline an inspiring plan for fulfilling goals and dreams, explaining how to identify one's most meaningful values while aligning priorities to promote loving relationships, a fulfilling career, financial autonomy and a rich spiritual life. Original. 75,000 first printing.

Porth's Pathophysiology Multilingual Matters

The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications, through a biopsychosocial approach. The multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses, and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters, putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such, it is an excellent resource for researchers, policy makers, and practitioners - in fact, anyone and everyone who wishes to understand and rediscover, in a single opera, the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

CAN NEUROSCIENCE CHANGE OUR MINDS?

Penguin

After over a decade of Bitcoin, which has now moved beyond lore and hype into an increasingly robust star in the firmament of global assets, a new and more important question has arisen. What happens beyond Bitcoin? The answer is decentralised finance - 'DeFi'. Tech and finance experts Steven Boykey Sidley and Simon Dingle argue that DeFi - which enables all manner of financial transactions to take place directly, person to person, without the involvement of financial institutions - will redesign the cogs and wheels in the engines of trust, and make the remarkable rise of Bitcoin look quaint by comparison. It will

disrupt and displace fine and respectable companies, if not entire industries. Sidley and Dingle explain how DeFi works, introduce the organisations and individuals that comprise the new industry, and identify the likely winners and losers in the coming revolution.

The Riches Within Springer Science & Business Media

"Each of these essays is a sharpened weapon for the battles looming large on the horizon." -George Ciccariello-Maher, author of *Building the Commune* "Combining the most creative thought from the global North and South, *Why Don't the Poor Rise Up?* promises to be an indispensable resource for understanding why the new revolutionary movement of the 21st century will emerge from the ranks of the most marginalized by capitalism and colonialism." -Ajamu Baraka, editor of *Black Agenda Report* Even mainstream media like the *New York Times* and *The Economist* have recently posed the question: *Why don't the poor rise up?*, uneasily amazed that capitalism hasn't met with greater resistance. In the context of unparalleled global wealth disparity, ecological catastrophe, and myriad forms of structural oppression, this vibrant collection offers a reassessment of contemporary obstacles to mass mobilization, as well as examples from around the world of poor people overcoming those obstacles in inspiring and instructive new ways. With contributions from Idle No More cofounder Alex Wilson, noted Italian theorist Franco "Bifo" Berardi, and nineteen other scholars and activists from around the world, *Why Don't the Poor Rise Up?* presents a truly global range of perspectives that explore the question of revolution, its objective and subjective prerequisites, and its increasing likelihood in our time. Ajamu Nangwaya, Ph.D., is an educator at Seneca College with over twenty-five years of experience in community organizing and advocacy. Michael Truscello, Ph.D., is an educator at Mount Royal University and author of the forthcoming book- *The Infrastructure Society*.

SERVICE DESIGN AND DELIVERY

Quivertree Publications

A longer-range purpose is to collect comparable information on as many polities as possible in order to facilitate the development of a richer theory to guide language policy and planning in other polities that undertake the development of a national policy on languages. This volume is part of an areal series which is committed to providing descriptions of language planning and policy in countries around the world."--BOOK JACKET.

Social Entrepreneurship Icon Books

An introduction to language and gender, with work from a range of cultural - including non-Western - contexts and methodological approaches. With readings of, among others, Deborah Cameron and Mary Haas. An accompanying website can be found at <http://www.routledge.com/textbooks/0415311047>.

THE SESOTHO-SPEAKING PEOPLE

AK Press

The *World Atlas of Language Structures* is a book and CD combination displaying the structural properties of the world's languages. Its 142 world maps and numerous regional maps are all in full colour. Each world map shows an average of 400 languages and is accompanied by a fully referenced description. The CD provides an interactive version of the database which allows the user to customize the maps and find and test correlations. The Atlas is an indispensable source of information for linguists, anthropologists, and geographers. It will be especially valuable for typologists, grammatical theorists, historical linguists, and those interested in a particular region. It sets new standards in comparative linguistics. No institution involved in language research can afford to be without it.

An Advanced Resource Book Berkley

Bonang Mohale is a highly respected South African businessman, who is known as much for his patriotism and his active role in seeking to advance his country's interests as for the leading role he has played in companies like Otis Elevators, Shell South Africa and South African Airways, among others. Developed over 30 years of business experience, his insights have motivated change in organisations and individuals alike. As CEO of Business Leadership South Africa, he frequently shares his insights through speeches and articles on the role of business in South Africa and the core tenets of leadership. *Lift As You Rise* is a compilation of some of his spoken and written words in which Mohale reveals the issues he is passionate about, among them transformation, people development, constructive collaboration and integrity, and how they came to define his career and his life. He looks into the ideas behind his words and offers fresh thoughts on the subjects they cover. This well-balanced compilation is enhanced by contributions from others he has mentored or met on his journey

which underscore who Mohale the man is, a fearless and energetic leader whose compassion, humanity and eternal optimism promote hope and encourage action. There is value in this book for leaders in all walks of life, but it is Mohale's hope that young people specifically, those rising through the ranks, will find his insights and experience inspiring, for they are the country's future leaders.

LANGUAGE PLANNING AND POLICY IN AFRICA

Oxford University Press

Neuroscience, with its astounding new technologies, is uncovering the workings of the brain and with this perhaps the mind. The 'neuro' prefix spills out into every area of life, from neuroaesthetics to neuroeconomics, neurogastronomy and neuroeducation. With its promise to cure physical and social ills, government sees neuroscience as a tool to increase the 'mental capital' of the children of the deprived and workless. It sets aside intensifying poverty and inequality, instead claiming that basing children's rearing and education on brain science will transform both the child's and the nation's health and wealth. Leading critic of such neuropretensions, neuroscientist Steven Rose and sociologist of science Hilary Rose take a sceptical look at these claims and the science underlying them, sifting out the sensible from the snake oil. Examining the ways in which science is shaped by and shapes the political economy of neoliberalism, they argue that neuroscience on its own is not able to bear the weight of these hopes.
