A Memoir Simon and Schuster

Thomas Chase wakes up from cryosleep to his first day at a new job — as a pilot for a contraband drug company dropping a shipment on Fantasia, a rock-planet terraformed to hide an elaborate drug manufacturing operation. Everything from synthetic heroin to MX7 is cooked here, in protected caves guarded by the savage Aliens. When Chase's craft touches down on Fantasia, a chain of events begins that can not be stopped. As criminals and competitors try to take over the drug-empire from the dangerous kingpin, Chase and his brother Pete are caught in the crossfire...with the Aliens adding blood to the mix.

Strangers From The Sky Random House

How do people come up with truly original ideas? The answer is to think outside the box—way outside. For the past decade, Cyril Bouquet, Jean-Louis Barsoux, and Michael Wade, professors of innovation and strategy at IMD Business School, have studied inventors, scientists, doctors, entrepreneurs, and artists. These people, or “aliens,” as the authors call them, are able to make leaps of creativity, and use five patterns of thinking that distinguish them from the rest of us. These five patterns—Attention, Levitation, Imagination, Experimentation, and Navigation—lead to a fresh and flexible approach to problem-solving. Alien thinkers know how to free the imagination so it can detect hard-to-observe patterns. They practice deliberate ways to retreat from the world in order to see the big picture underlying a problem. And they approach ideas in systematic ways that reflect the constraints of reality. Through surprising and compelling stories, the authors show how readers can use this method to develop out-of-this-world ideas. ALIEN Thinking can help any of us find innovative solutions to the most difficult problems.

STAR TREK, HISTORY AND US

Rosetta Books

The planets Earth and Vulcan experience a mysterious first contact in this fascinating Star Trek novel featuring the crew of the U.S.S. Enterprise. Years before the formal first contact between Earth and another planet's inhabitants, a Vulcan space vessel crash landed in the South Pacific, forcing humanity to decide whether to offer the hand of friendship, or the fist of war.

Complicating matters is a second visitation: a group of people from two hundred years in the future, who serve on a starship called Enterprise. Discover the astonishing truth about this heretofore unknown first contact and the nightmares that plague Admiral James T. Kirk. Dreams of his dead comrades, of his earliest days aboard the U.S.S. Enterprise, and of a forgotten past in which he somehow changed the course of history and destroyed the Federation before it began.

A Need to Know Macmillan

A sequel to “Above Top Secret” which alleged a worldwide cover-up of UFO sightings. The main theme of this book is the threat of extra-terrestrial beings to the Earth.

Alien Base Simon and Schuster

In the vein of Randall Munroe's What If? meets Brian Green's Elegant Universe, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really "out there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In OUT THERE Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? OUT THERE is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.

THE CONTACT PARADOX

Crown

Unearthly Disclosure is a story of alien bases, alien contacts and abductions, genetic mutants, animal mutilations, and government paranoia. Here, Timothy Good, one of the world's most respected authorities on the alien phenomenon, reveals for the first time sensational information provided to him by high-level military and scientific sources, who confirm that aliens have established subterranean and submarine bases on Earth and that extra-terrestrial contact has been made with a select group in the US military and scientific intelligence community. Among numerous revelations in this book are those involving the alien creature photographed by Filiberto Caponi in Italy. The author spent several years investigating this controversial case and commissioned an Expert Witness checked by the Law Society to analyse Caponi's astonishing photographs. Published for the first time, this unique story forms the central section of Unearthly Disclosure.

LOS ANGELES TIMES BOOK PRIZE WINNER • An MIT astrophysicist reinvents herself in the wake of tragedy and discovers the power of connection on this planet, even as she searches our galaxy for another Earth, in this “bewitching” (Anthony Doerr, The New York Times Book Review) memoir. “Sara Seager’s exploration of outer and inner space makes for a stunningly original memoir.”—Abraham Verghese, author of Cutting for Stone Sara Seager has always been in love with the stars: so many lights in the sky, so much possibility. Now a pioneering planetary scientist, she searches for exoplanets—especially that distant, elusive world that sustains life. But with the unexpected death of Seager’s husband, the purpose of her own life becomes hard for her to see. Suddenly, at forty, she is a widow and the single mother of two young boys. For the first time, she feels alone in the universe. As she struggles to navigate her life after loss, Seager takes solace in the alien beauty of exoplanets and the technical challenges of exploration. At the same time, she discovers earthbound connections that feel every bit as wondrous, when strangers and loved ones alike reach out to her across the space of her grief. Among them are the Widows of Concord, a group of women offering advice on everything from

home maintenance to dating, and her beloved sons, Max and Alex. Most unexpected of all, there is another kind of one-in-a-billion match, not in the stars but here at home. Probing and invigoratingly honest, *The Smallest Lights in the Universe* is its own kind of light in the dark.

A Novel Simon and Schuster

"Earth is being visited by a number of different alien species - some of which have established bases here on Earth. Written by a researcher recognised internationally for his objective and unsensational approach, *Alien Base* is the first book to make sense of the bewildering diversity of reports from around the world. Culminating with an analysis of the disquieting stories of alien bases now coming from the Puerto Rico area, Timothy Good shows that there is a hard core of such cases which cannot easily be dismissed."

Panini, Bruschetta, Crostini Simon and Schuster

The Arthur C. Clarke award-winning author of *Children of Time* brings us an extraordinary space opera about humanity on the brink of extinction, and how one man's discovery will save or destroy us all. The war is over. Its heroes forgotten. Until one chance discovery . . . Idris has neither aged nor slept since they remade him in the war. And one of humanity's heroes now scrapes by on a freelance salvage vessel, to avoid the attention of greater powers. After earth was destroyed, mankind created a fighting elite to save their species, enhanced humans such as Idris. In the silence of space they could communicate, mind-to-mind, with the enemy. Then their alien aggressors, the Architects, simply disappeared—and Idris and his kind became obsolete. Now, fifty years later, Idris and his crew have discovered something strange abandoned in space. It's clearly the work of the Architects—but are they returning? And if so, why? Hunted by gangsters, cults and governments, Idris and his crew race across the galaxy hunting for answers. For they now possess something of incalculable value, that many would kill to obtain.

The Unconventional Path to Breakthrough Ideas Titan Books (US, CA)

Planetary atmospheres are complex and evolving entities, as mankind is rapidly coming to realise whilst attempting to understand, forecast and mitigate human-induced climate change. In the Solar System, our neighbours Venus and Mars provide striking examples of two endpoints of planetary evolution,

runaway greenhouse and loss of atmosphere to space. The variety of extra-solar planets brings a wider angle to the issue: from scorching "hot jupiters" to ocean worlds, exo-atmospheres explore many configurations unknown in the Solar System, such as iron clouds, silicate rains, extreme plate tectonics, and steam volcanoes. Exoplanetary atmospheres have recently become accessible to observations. This book puts our own climate in the wider context of the trials and tribulations of planetary atmospheres. Based on cutting-edge research, it uses a grand tour of the atmospheres of other planets to shine a new light on our own atmosphere, and its relation with life.

From History's Shadow Harper Collins

Shares new documents to expose the sinister alien influence in world governments, financial systems, and scientific institutions throughout history • Shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens authority to abduct humans for "research" • Reveals how Reptilian-influenced ex-Nazis infiltrated the U.S. government • Explains how the Reptilians have created alien-human hybrids under their control to replace the human population Long ago, the Galactic Federation sent the Atlans, a fierce group of humans from the Pleiades, to Earth to confront the newest colony of the combative ever-spreading alien race known as the Reptilians. The ensuing battle sank the continent of Lemuria and drove the Reptilians underground beneath the Indian subcontinent as well as to Antarctica. Able to shapeshift to appear human, the Reptilians then infiltrated the Atlantean civilization, abducting humans and creating Reptilian hybrids. As Len Kasten shows, this technique of infiltration and hybridization prior to an all-out attack has been the hallmark of Reptilian conquest throughout the galaxy. Chronicling the history of the Reptilian Empire's influence on Earth and their conquest of 21 star systems, Kasten reveals how the human race is enmeshed in a skillfully concealed plot to enslave humanity and exploit our planet's physical and biological resources. Revealing Hitler's pact with extraterrestrials and the Reptilian influence on the Nazi state, he shares new documents that disclose the rescue and rehabilitation of Nazi war criminals to assist in the Cold War, which then corrupted many U.S. government institutions. Focusing on crucial events in the decade after World War II, he examines the Reptilians' human allies, the Illuminati, who control the levers of financial, technological, and

military power throughout the world through various secret societies. He shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens permission to take humans up to their spaceships, ostensibly for genetic study--in return for alien technology--and how these abductions led to the creation of a hybrid race under Reptilian mind control. He also explains how Kennedy was assassinated by the CIA because of his plans to rout out this Nazi-Reptilian presence. Contrasting the Reptilians with the benevolent Ebens, the aliens from Zeta Reticuli who crashed at Roswell, Kasten exposes the stealthy tactics of the Reptilians, their relationship with the Greys, and their advanced genetic bio-technology and teleportation abilities--as well as what we need to do to defeat their plans.

The Star Trek: Enterprise: The Expanse Simon and Schuster

Someone on Earth had known about the xenomorphs. Before Ripley (from the "Alien" film series), there had been a first encounter. When a human spaceship discovers a vast egg-shaped vessel in Saturn's orbit, the crew powers in to investigate. The first of all the battles unfolds in this original novel.

UFOs remain essentially a military and intelligence problem - and one demanding unprecedented security and deception, with

access to information on a strictly 'need to know' basis. As early as 1960 former CIA director Admiral Hillenkoetter confirmed that, 'Behind the scenes, high-ranking air force officers are soberly concerned about the UFOs. But through official secrecy and ridicule, many citizens are led to believe the unknown flying objects are nonsense.' The same could be said today. Based on many years of research by one of the world's most respected authorities on alien phenomena, Need to Know draws on top-secret documents, reports of encounters with large craft of unknown origin from pilots and personnel aboard aircraft carriers and destroyers and interviews with high-ranking military insiders. It is full of revelations, including the alarming escalation of aircraft accidents and the disappearance of hundreds of military aircraft during UFO encounters and recent near-misses with UFOs. The evidence is clear, balanced - and irrefutable.

PROJECT BLUE BOOK

Pan

In Above Top Secret, Timothy Good examined evidence of US government research into alien visitations to Earth. In this book he investigates what he describes as top-secret UFO units in Britain, Canada and the USA, in which captured spacecraft are said to be tested and aliens subjected to medical examination. The book includes interviews with RAF and USAF personnel, scientists and doctors, as well as personal stories of alleged alien contact.

The Shocking Truth Behind the Greatest Cover-Up in Human History Pegasus Books

High above the planet Earth, an alien probe appears -- and in an unspeakably horrific instant, releases a deadly blast that strafes the planet's surface, leaving a miles-wide, smoldering crater of destruction in its wake. Millions die in Florida, Cuba, and Venezuela, their lives blotted out in a blazing millisecond. Just as swiftly, the probe implodes and crashes on the planet surface, but the remnants provide no clue as to its origin. Who are the attackers, and what provoked them? Aboard the Starship Enterprise™, Captain Jonathan Archer learns of the destruction. His ship is called home; it is uncertain whether its mission of space exploration will continue. But before Enterprise reaches Earth, Archer is abruptly kidnaped from the bridge by the time-traveling enemies he has encountered before. He finds himself

aboard a Suliban vessel, face-to-face with his old nemesis, Silik, a high-ranking individual in a battle known only as the Temporal Cold War. Silik leads him to his master, a mysterious humanoid from the far future. The humanoid claims that the attack on Earth was just a test; and the next attack will destroy Archer's home planet...unless he and the Enterprise crew stop it. To do so, they must enter a region of space called The Expanse - an area so dangerous that no ship has ever emerged from it unscathed. Vulcan crews were driven to bloodthirsty madness, Klingon crews were anatomically inverted, their internal organs exposed outside their bodies...while they still lived. Many vessels were lost, never to be heard from again. Archer faces the greatest crisis of his career: Should he believe Silik's time-traveling master, and expose his ship and crew to the perils of The Expanse, in hopes of saving Earth from destruction? And can he convince Starfleet Command and the Vulcan High Council to let Enterprise go to face her biggest challenge?

The Eerie Silence Grand Central Publishing

A devastating examination of how collapsing insect populations worldwide threaten everything from wild birds to the food on our plate. From ants scurrying under leaf litter to bees able to fly higher than Mount Kilimanjaro, insects are everywhere. Three out of every four of our planet's known animal species are insects. In *The Insect Crisis*, acclaimed journalist Oliver Milman dives into the torrent of recent evidence that suggests this kaleidoscopic group of creatures is suffering the greatest existential crisis in its remarkable 400-million-year history. What is causing the collapse of the insect world? Why does this alarming decline pose such a threat to us? And what can be done to stem the loss of the miniature empires that hold aloft life as we know it? With urgency and great clarity, Milman explores this hidden emergency, arguing that its consequences could even rival climate change. He joins the scientists tracking the decline of insect populations across the globe, including the soaring mountains of Mexico that host an epic, yet dwindling, migration of monarch butterflies; the verdant countryside of England that has been emptied of insect life; the gargantuan fields of U.S. agriculture that have proved a killing ground for bees; and an offbeat experiment in Denmark that shows there aren't that many bugs splattering into your car windshield these days. These losses not only further tear at the tapestry of life on our degraded planet; they imperil everything we hold dear, from the food on our supermarket shelves to the medicines in our cabinets to the riot of nature that thrills and enlivens us. Even insects we may dread, including the hated cockroach, or the stinging wasp, play crucial ecological roles, and their decline would profoundly shape our own story. By connecting butterfly and bee, moth and beetle from across the globe, the full scope of loss renders a portrait of a crisis that threatens to upend the workings of our collective history. Part

warning, part celebration of the incredible variety of insects, The Insect Crisis is a wake-up call for us all.

[The Worldwide UFO Security Threat](#) Random House (UK)

A worldwide history of alien contact from one of the most respected authorities on the phenomenon: "A bible for UFO watchers" (The Wall Street Journal). This fascinating new volume tells the story of contact between aliens and humans from all

across the globe, dating back to 1932, including meetings with military personnel and American presidents such as Eisenhower and Kennedy. For the first time, a former member of MI6 reveals her conversation with Neil Armstrong at a NASA conference, when she confirmed that there were "other" spacecraft on the moon when Apollo 11 landed in 1969. Armstrong also confirmed that the CIA was behind the cover-up. In a further admission in

December 2012, Russian Prime Minister Dmitry Medvedev revealed "the president of Russia is given a special top secret folder [that] in its entirety contains information about aliens who have visited our planet. Along with this, the president is given a report of the Special Service that exercises control over aliens in our country. I will not tell you how many of them are among us because it may cause panic."
