This textbook provides a comprehensive and thematically structured vocabulary for students of German. Designed for all but the very beginning levels of undergraduate study, it offers a broad

range of vocabulary, and is divided into 20 manageable units dealing with the physical, social, cultural, economic, and political world. The word lists are graded into three levels that reflect difficulty and likely usefulness, and are accompanied by extensive exercises and activities, designed to reinforce work done with the lists, and to increase students' competence in using the vocabulary. Suitable for both classroom teaching and private study, the exercises also make use of authentic German texts, enabling students to work with the vocabulary in context. The Romantic period was one of the most creative, intense and turbulent periods of English literature, an age marked by revolution, reaction, and reform in politics, and by the invention of imaginative literature in its distinctively modern form. This History presents an engaging account of six decades of literary production around the turn of the nineteenth century. Reflecting the most up-to-date research, the essays are designed both to provide a narrative of Romantic literature, and to offer new and stimulating readings of the key texts. One group of essays addresses the various locations of literary activity - both in England and, as writers developed their interests in travel and foreign cultures, across the world. A second set of essays traces how texts

responded to great historical and social change. With a comprehensive bibliography, timeline and index, this volume will be an important resource for research and teaching in the field.

Cambridge English

The last century was characterised by an extraordinary flowering of the art of poetry in Britain. These specially commissioned essays by some of the

most highly regarded poetry critics offer a stimulating and reliable overview of English poetry of the twentieth century. The opening section on contexts will both orientate readers relatively new to the field and provide provocative syntheses for those already familiar with it. Following the terms introduced by this section, individual chapters cover many ways of looking at the 'modern', the 'modernist' and the 'postmodern'. The core of the volume is made up of extensive discussions of individual poets, from W. B. Yeats and W. H. Auden to contemporary poets such as Simon Armitage and Carol Ann Duffy. In its coverage of the development, themes and contexts of modern poetry, this Companion is the most useful guide available for students, lecturers and

readers.
