Relationship management (RM) is an essential part of business, but its success as a business model can be hard to measure, with some firms embracing a model that is truly relationship-orientated, while others claim to be relationship-orientated but in fact prefer transactional short-term gain. This open access book aims to develop a mid-range theory of relationship management, examining truly relationship-orientated firms to discover not only what qualities these firms have that make them successful at the RM model, but also what benefits this model has for the firm. It addresses questions like how RM-mature companies achieve and sustain competitive advantage, and what determines the scale and scope of these firms, illustrating with case studies. This book will be of interest to scholars studying leadership and strategy, especially those interested in relationship management, business ethics and corporate social responsibility. It will also be of interest to professionals looking to develop their understanding of relationship management.

PRINCIPLES AND PRACTICE

IJER Vol 16-N4

Supposing you walked across to your bank and give your bank cashier (teller clerk) your cash for deposit, but while the cashier was counting the cash, an armed gang swooped in and carted away all monies on the counter, including your cash. Do you know that your bank will not be liable? Yes, your bank will not be liable. The bank will only be liable if the bank cashier had received the cash, checked it, and stamped "Paid" on your deposit teller receipt! Do you know that you have no duty, as a bank customer, to ascertain or check the correctness of the figures entered in your passbook or current account statement? If you relied on the accuracy of the statement sent to you and in good faith spent the money stated in your account, the bank may find it difficult to recover such money from you. Do you know that on the death of one party in a joint account, any credit balance, security or property is transferred to the surviving party and the survivor will be the one to account to the representative of the deceased party? Again, do you know that a minor (that is, a person below 18 years of age), can run a company account, but cannot repay any loan granted him? Any lending to

him, by law, is void, and he cannot be expected to repay such loan! Do you know that where a signature on your cheque is forged or unauthorized, the forged or unauthorized signature is wholly inoperative, and your bank cannot debit your account with such a cheque, unless you facilitated the forgery? This is just the icing on the cake. Bank Instruments & Accounts Management: Detecting and Preventing Fraud is a recipe for making the soup of banking practice sweet. It is, therefore, an essential work tool for all discerning bankers, a reference partner for all bank customers and the last line of defense for passing the professional banking examination.
