Gravitoelectromagnetism A Brief Review
GRAVITOELECTROMAGNETISM: A BRIEF REVIEW
The canonical momentum of the particle is given in this case by $p + (-2m/c)A$. Let us now discuss the gauge freedom of the GEM potentials. Under a coordinate transformation $x^\mu \rightarrow x'^\mu = x^\mu - \varphi^\mu$, $h_{\mu\nu} \rightarrow h'_{\mu\nu} = h_{\mu\nu} + \varphi_{\mu,\nu} + \varphi_{\nu,\mu}$ to linear order in φ^μ . Therefore, $\bar{h}'_{\mu\nu} = \bar{h}_{\mu\nu} - 2\varphi_{(\mu,\nu)}$...
