Global Perspective On Islamic Banking Insurance

OMB No. 8239011575876 edited by

O'CONNELL KIDD

Risk Management for Islamic Banks John Wiley & Sons

This work is a practical and commercial guide to the fundamental principles of Islamic finance and their application to Islamic finance transactions. Islamic finance is a rapidly expanding, global industry and this book is designed to provide a practical treatment of the subject. It includes discussion and analysis of the negotiation and structure involved in Islamic finance transactions, with relevant case studies, structure diagrams and precedent material supporting the commentary throughout. An introductory section describes the theoretical background and explains the principles (and their sources) of Islamic law which underpin Islamic finance practices, providing an important backdrop to the work as a whole. The work also considers the role of Shariah supervisory boards, Islamic financial institutions and the relevance of accounting approaches. The work adopts an international perspective to reflect the pan-global nature of the industry and accepted practices, with the aim to bring together different schools of thought applied in international Islamic finance transactions. It also highlights any regional differences in accepted practice by reviewing the position in the Gulf states, Asia, the UK and Europe and the USA. The second part of the book concentrates on Islamic financial law in practice and begins with a section on financial techniques. This section explains the basic requirements for Islamic finance contracts both in terms of the underlying asset types and also both the applicability and acceptability of the underlying asset. There is a full discussion of the various types of contractual models such as Mudaraba (trustee finance), Musharaka (partnership or joint venture), Murabaha (sale of goods), and Sukuk (participation securities: coupons etc). The nascent area of Takaful (insurance) is also covered as are matters specific to the important field of project and asset finance.

CONCEPTS AND STRATEGIES

Routledge

This is an extremely valuable book written by three highly qualified scholars whose credentials for writing such a book are difficult to match. The timing of the book is also perfect, having come at a time when the worst financial crisis in living memory has intensified the quest for reform of the international architecture. The proposals made by the authors should go a long way in not only reforming the system but also in accelerating the move towards financial globalization and convergence of the conventional and Islamic financial systems. Dr. Umer Chapra Prominent Scholar of Islamic Economics and currently Research Advisor Islamic Research and Training Institute (IRTI), Islamic Development Bank (IDB) Globalization and Islamic Finance, by three well-respected authors in Islamic finance, provides a thought-provoking analysis of an important and topical issue, particularly, given the global impact of the current financial and economic crises. The book is the first attempt to make a compelling case of convergence between globalization and Islamic finance. Askari, Iqbal and Mirakhor should be praised for this serious effort, which is a must-read for academics and practitioners interested in Islamic finance. Professor Rifaat Ahmed Abdel Karim Secretary General Islamic Financial Services Board (IFSB) This book has a robust discussion of the growth and spread

of Islamic finance within the umbrella of globalization. The book provides a unique view of Islamic finance, not only from the perspective of how Islamic finance fits within globalization in general, but globalization of finance in particular. This is a must-read for anyone interested in the complex and complicated world of Islamic finance. Scheherazade S. Rehman, Ph.D. Director, European Union Research Center Professor of International Finance, School of Business The George Washington University I have not come across any literature that has delved so intensely in financial globalization, in particular Islamic finance. Due to this reason, I would encourage all interested in this area to read this book. Hajjah Salma Latiff Managing Director, Crescent Sdn. Bhd. Former Director, Centre for Islamic Banking, Finance and Management (CIBFM), Universiti Brunei Darussalam The recent crisis has evoked wide interest in Islamic finance publications. Globalization and Islamic Finance is both timely and needed. Sani Hamid Director, Wealth Management Financial Alliance (Singapore)

A Modern Approach to Islamic Banking John Wiley & Sons
 The world's leading financial thinkers share their insights into the latest developments in credit derivatives In The Credit Derivatives Handbook, some of the world's sharpest financial and legal minds come together to discuss how credit derivatives have evolved from tools restricted to the banking industry into flexible and customizable instruments used by investors of all kinds. You will come away with the knowledge and insight needed to measure and value risk, as well as the ability to put credit derivatives to work. Over fifteen contributors provide in-depth analyses of subjects in their respective areas of expertise, such as: Key products, applications, and typical trades, hedging and credit structuring Pricing of credit default swaps and synthetic CDOs Design of synthetic CDOs Copula models, with illustrative examples Credit derivatives in investment portfolios Opportunities for structuring credit derivatives in accordance with Islamic finance Comprehensive in scope but executed in meticulous detail, The Credit Derivatives Handbook provides a complete, global perspective of what the editors consider "one of the most important financial innovations of recent times."

4th International Conference on Banking and Finance Perspectives John Wiley & Sons

The phenomenal growth of Islamic finance in the last few decades has been accompanied by a host of interesting questions and challenges. One of the critical challenges is how Islamic financial institutions can be motivated to participate in the 'equity-like' profit-and-loss sharing (PLS) contracts. It is observed that Islamic banks are reluctant to participate in the pure PLS scheme which is manifested by the rising concentration of investment on murabaha or mark-up financing. This phenomenon has been the hotbed of academic criticism on the contemporary practice of Islamic banking. This book explains the 'murabaha syndrome' in light of the incentive provided by the current institutional framework and what are the changes required in the governance structure to mend this anomaly.

CENTRAL BANK INDEPENDENCE, ACCOUNTABILITY, AND TRANSPARENCY

Routledge

As an ever-growing international business, Islamic banking has changed the face of economics in recent years. As more and more industries embrace Islamic principles, the industry will

unquestionably influence modern economic practices and techniques across the globe. Growth and Emerging Prospects of International Islamic Banking is a collection of innovative research on the methods and applications of Islamic banking interests on a global economic scale. While highlighting topics including asset diversification, profit sharing, and financial reporting, this book is ideally designed for bankers, banking analysts, international business managers, financiers, industry professionals, economists, government officials, academicians, students, and researchers seeking current research on Islamic banking perspectives and approaches to finances.

POLITICS OF ISLAMIC FINANCE

World Bank Publications

How the Islamic finance approach to risk can serve as a model for global reform The recent U.S. financial debacle has affected the entire world and led to major reviews of risk management in financial institutions. Perhaps a simpler alternative is just to adopt the systems used for centuries in Islamic finance. Risk Sharing in Finance expounds upon this novel idea, suggesting that the Islamic financial system can be developed for use around the world by providing a helpful paradigm for crafting global financial reforms. Demonstrating how Islamic finance can successfully expand its array of risk sharing instruments, for example issuing government shares to finance development projects and placing limits on short sales and leveraging, the book makes a compelling case for thinking outside the box to redevelop a vibrant stock market. Provides analysis of the comparative historical, theoretical, and empirical investigation of risk management in both the conventional and the Islamic-type financial systems Explores the benefits and the implications of introducing Islamic finance around the world and explains how wider reliance on risk sharing can be implemented Establishes a connection between the flawed contemporary Western system of capitalist finance and the ancient, traditional forms of risk-sharing prevalent in Islamic finance Offering a timely look at financial reform, Risk Sharing in Finance draws on the expertise of author Zamir Iqbal of the World Bank, along with a host of co-authors Abbas Mirakhor, Hossein Askari, and Nouredine Krichene to present a new form of financial reform.

HOW TO MANAGE RISK AND IMPROVE PROFITABILITY

Springer

Can Islamic finance save the global system? Islamic Finance and the New Financial System describes how the adoption of Islamic finance principles in future regulatory decisions could help prevent future shocks in the global financial system. Using illustrations and examples to highlight key points in recent history, this book discusses the causes of financial crises, why they are becoming more frequent and increasingly severe, and how the new financial system will incorporate elements of Islamic finance - whether deliberately or not. With an introspective look at the system and an examination of the misconceptions and deficiencies in theory vs. practice, readers will learn why Islamic finance has not been as influential as it should be on the larger global system. Solutions to these crises are thoroughly detailed, and the author puts forth a compelling argument about what can be expected in the future. Despite international intervention and global policy changes, the financial system remains in a fragile state. There is an argument to be made about integrating Islamic finance into the new system to facilitate stronger resilience, and this book explains the nuts

and bolts of the idea while providing the reader with a general understanding of Islamic finance. Understand the key principles of Islamic finance. Examine the history of the current financial system. Discover how Islamic finance can help build a new debt-free economy. Learn how Islamic finance theory doesn't always dictate practice. Although Islamic finance is a growing market, it is still a foreign concept to many. Those within the Islamic finance circles wonder why the system has yet to gain broader appeal despite its ability to create a strong and well-balanced economy. Islamic Finance and the New Financial System provides a clever analysis and historical background to put the issues into perspective.

[Shari'ah Financial Law in the Global Perspective](#) McGraw Hill Professional

Examines the resilience of Islamic banking during the global financial crisis and lessons for risk management. Do Islamic financial institutions perform better than their conventional counterparts during periods of financial stress? To what extent do systems for managing risk have to be adapted for Islamic financial institutions, given the unique characteristics of their assets and liabilities and the need for shari'ah compliance? These issues have come to prominence since the global financial crisis of 2007-8 and the subsequent recession, and are addressed in this book. The challenges for Islamic financial institutions are explored in an international post Basel II system where banks are required to have more capital and liquidity. Governance issues are also examined, given their influence on client and investor perceptions and their ultimate implications for institutional stability and sustainability. Offers an in-depth assessment of how Islamic banks weathered the financial crisis and what lessons can be learnt. Asks whether Islamic banks are inherently more stable than conventional banks during periods of economic stress. Examines how Islamic banks manage risk, focusing on liquidity risk and the use of forward contracts to mitigate currency risk. Appraises the work of internal shari'ah audit units and the use of shari'ah reports to reduce non-compliance risks. Features case studies from the Gulf, Malaysia, the UK, Pakistan, Turkey and GCC countries.

NEW CHALLENGES IN BANKING AND FINANCE

NewHorizonglobal perspective on Islamic banking & insuranceCase-law on Islamic BankingA Global PerspectiveGlobal Report on Islamic Finance 2016A Catalyst for Shared Prosperity? Despite noticeable growth in Islamic banking and finance literature in recent years, very few published books in this area deal with supervisory and regulatory issues in Islamic banking - theoretically or empirically - and none with the critical issue of risks involved in liquidity management of Islamic banks. This unique book is the first of its kind in dealing with challenges these financial institutions face in the absence of interest rate mechanism and debt-based financial instruments. The book examines critically issues involve in managing the risk of liquidity management for these types of institutions, including those stemming from Basel requirements. It then offers an alternative regulatory framework more appropriately suited for such banks without compromising safety and security. The book's unique features and innovative dimensions diagnostically differentiate between Islamic banks and conventional banks as related to liquidity management risks. It proposes a risk-sharing regulatory framework that, once implemented, would mitigate risks posed by balance-sheet mismatches. The book aims to assist regulators, supervisors, Islamic finance practitioners, academicians and other relevant stakeholders.

[Islamic Finance and the New Financial System](#) World Bank Publications

Entrepreneurs exist in every country but the nature and level of entrepreneurial activity differs remarkably. Why is this? What shapes the level of entrepreneurial activity in each country? What defines entrepreneurial activity? As more and more teaching and research into entrepreneurship reflects its often international nature, the need for literature reflecting this grows. This concise new textbook provides an introduction to topics in entrepreneurship in a global context; focusing on how enterprise works across the world. Important topics such as financing, innovation and (anti) social enterprise are discussed in detail throughout the text and examples and case studies are used to illustrate the application of different theoretical and conceptual approaches to entrepreneurship and the role it plays in developed, emerging and transitional economies.

Entrepreneurship: A Global Perspective is suitable for both final year undergraduate and postgraduate courses in enterprise and is likely to appeal particularly to student groups with a strong international element.

[A Global Perspective](#) Routledge

Income inequality has increased considerably in the aftermath of the financial crisis of 2007+08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development community is unanimous to tackle growing inequality and imbalance in the distribution of wealth, there is a difference of opinion as to the approaches to achieve this goal. This report presents a perspective from Islamic finance on how shared prosperity can be enhanced. The theoretical

framework for economic development by Islamic economics and finance is based on four fundamental pillars: (i) an institutional framework and public policy oriented to the development objectives of Islam; (ii) prudent governance and accountable leadership; (iii) promotion of the economic and financial system based on risk sharing; and (iv) financial and social inclusion for all, promoting development, growth, and shared prosperity. There is evidence that Islamic finance is experiencing high growth with the banking sector leading the way. Several countries are working seriously towards developing standards, regulation and legal frameworks for the development of Islamic finance. However, there are a number of aspects where policy interventions or improvements in policy effectiveness are needed to develop Islamic finance to promote shared prosperity. Without the enabling environment, Islamic finance may not be able to attain the potential expected of it. With adequate policy interventions and enabling financial infrastructure, Islamic finance could become a catalyst for alleviating poverty and inclusive prosperity.

[An Alternative Approach to Liquidity Risk Management of Islamic Banks](#) Palgrave Macmillan

The book is a collection of chapters discussing the Sustainable Development Goals in the broader context of Islamic finance along with mapping the SDGs with Maqasid Al-Shariah. It provides a framework for both Muslim and non-Muslim countries to develop a sustainable economy which encompasses not only the concept of the welfare state but also supports development-related activities, ensures financial inclusion through equal distribution of wealth and alleviation of poverty, and protects the overall environmental and ecological system. More specifically, this book explores various aspects of Islamic finance in relation to parameters of SDGs; restructuring of Islamic finance and connecting its dots in the light of SDGs; Islamic perspective on ESG and ecological quality; interest-free tools and modernization of Islamic financial institutions for sustainable development and economic stability; and the role of Islamic finance in infrastructure-related development activities. Consistent with the view that SDGs are embedded within the theme of Islamic finance, this book is specifically designed to meet the needs of key regulatory institutions, academic scholars, and industry practitioners both in the field of Islamic finance and sustainable finance.

[Islamic Insurance](#) United Nations

A detailed look at the fast-growing field of Islamic finance and banking. The guiding principle of Islamic finance has existed throughout Islamic history, yet modern Islamic banking has been around for a relatively short period of time. Author Amr Mohamed El Tiby is an expert in this field, and with this new book, he reveals how you can benefit from the use of Islamic banking strategies in your financial endeavors. Engaging and accessible, Islamic Banking shows the impact this approach has made on conventional banking since the 1950s, and why it's such a big player in the current market. It offers a unique look at various aspects of this field, including the salient features of Islamic banking that distinguishes it from non-Islamic banking, the development of the regulatory bodies and supervisory agencies that support the Islamic banking system, and much more. It also explores the nature of risk in Islamic banking and the issues of capital adequacy, corporate governance, transparency, and risk associated with Islamic banking. Discusses the history and development of Islamic finance. Offers straightforward strategies for implementing Islamic finance into your business activities. Sheds light on the effect of the global economic crisis on Islamic banks versus conventional banks. Filled with in-depth insights and expert advice, this detailed analysis of Islamic finance will help you gain a firm understanding of how effective this proven approach can be.

[Islamic Fintech](#) Springer

Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

CONTEMPORARY ISLAMIC FINANCE

John Wiley & Sons

The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting

sustainability. The social vision of welfare improvement and justice is already embedded in Sharia's economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering ('AML') in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.

[Corporate Governance in Institutions Offering Islamic Financial Services](#) Edinburgh University Press

This essential textbook provides a comprehensive introduction to the Islamic business environment, exploring core concepts and practices in business administration from an Islamic perspective. Thorough and accessible, it covers the full range of Islamic business, including entrepreneurship, ethics, organizational culture, marketing, finance and decision making. Taking an integrated approach that aligns contemporary business practice with traditional Islamic literature, the book offers an engaging exploration of the key ways in which business activities can be organised to align with Islamic norms, rules and regulation. Developed from the teaching practice of an international range of leading scholars in the field, Islamic Business Administration includes topical case studies, practical business scenarios and comparative features, encouraging students to place their understanding of Islamic business within the wider global business context and to understand its practical implementation. This is an invaluable companion for students studying a module in Islamic business or management at undergraduate, postgraduate and MBA level. It is also suitable for students of Islamic finance or banking looking to place their learning in the wider context of Islamic business.

[Islamic Finance and Economic Development](#) John Wiley & Sons

A second edition of Islamic Finance in the Global Economy, substantially revised and updated to take into account the recent developments in the field.

[Islamic Finance in the Global Economy](#) Springer

Can the contemporary Islamic finance movement be shown to meet the requirements of modern commerce? In the wake of the terrorist attacks on America the UN Security Council passed a resolution targeting transnational sources of terrorist funds. The United States and the International Monetary Fund are encouraging the governments of the Middle East to adopt policies of economic liberalism and a new type of capitalism, based on Islamic values and beliefs, is emerging. The aims of the book are: to explore the political implications of the slow but steady accumulation of Islamic capital* to analyse the connections between Islamic finance and Islamic political movements in Middle Eastern and North African countries* to show that the commonly-perceived connection between Islamic finance and money laundering and terrorism is by no means the complete picture. Readers will learn to appreciate the various political contexts in which Islamic finance operates in the Middle East and North Africa and will acquire some understanding of its political as well as economic constraints. Hopefully possible

misunderstandings about Islamic banking and finance will be corrected. The book is divided into two parts - part one is thematic and lays the ground for the country-specific case studies in part two (covering the Sudan, Kuwait, Jordan, Turkey, Tunisia and Egypt). The contributors include political scientists, economists and historians. Key Features: A major topical issue* Written by the world's leading experts on Islamic Political Economy* Explores the connections between Islamic finance and Islamic political movements* Includes country-specific case studies

[A Guide for Small and Medium-sized Enterprises](#) Springer

"The principal objective of this intermediate book on Islamic finance is to address selected issues in the theory and practice of Islamic finance that typical fall beyond the contents of classic introductory text books on the subject matter. These topics are often discussed at very basic level. The list of special topics includes the stability of Islamic finance, the role of ethics, the scope of financial engineering and derivatives, the function of Islamic capital markets, as well as perspectives on Islamic structured finance, corporate finance, and financial inclusion. The book can serve as a guide to hitherto unexplored avenues of research in Islamic finance for graduate and post-graduate students. This book includes: - some reference to case studies and specific problems in the practice of Islamic finance as well as conventional finance - a list of suggested further readings per chapter - appendices that include details of advanced analysis for the purpose of simplifying the level of discussion for advanced

undergraduate students - graphs, figures, tables on financial and economic data"--
