HOOD SIDNEY

CLIMATE MIGRATION AND SECURITY

Routledge

This volume provides the first major systematic and timely analysis of the security consequences of international population movements. Whereas other studies have considered refugee flows as a result of conflict, and migration as a result of changes in the international political economy, the contributors to this pioneering volume consider the consequences of these population movements - including ethnic population movements in the former Yugoslavia - and examine the security and internal stability of the societies, states, and regimes involved.

The Securitization of Migration Springer

The act of violence of 9/11 changed the global security agenda, catapulting terrorism to the top of the agenda. Weapons of mass destruction grabbed public interest and controlling the free movement of people became a national security priority. In this volume, Jef Huysmans critically engages with theoretical developments in international relations and security studies to develop a conceptual framework for studying security. He argues that security policies and responses do not appear out of the blue, but are part of a continuous and gradual process, pre-structured by previous developments. He examines this process of securitization and explores how an issue, on the basis of the distribution and administration of fear, becomes a security policy. Huysmans then applies this theory to provide a detailed analysis of migration, asylum and refuge in the European Union. This theoretically sophisticated, yet accessible volume, makes an important contribution to the study of security, migration and European politics.

Migration, Security, and Citizenship in the Middle East John Wiley & Sons

Focuses on the changing nature of the security agenda in post-Cold War Europe. This text analyzes the various conflicting trends of Europeanization and migration and considers the wider implications of these processes for security in the former Soviet Union and the Middle East.

INTERNATIONAL MIGRATION AND SECURITY

Routledge

Every year, millions of people from around the world grapple with the European Union's emerging migration management apparatus. Through border controls, biometric information technology, and circular migration programs, this amorphous system combines a whirlwind of disparate policies. The Migration Apparatus examines the daily practices of migration policy officials as they attempt to harmonize legal channels for labor migrants while simultaneously cracking down on illegal migration. Working in the crosshairs of debates surrounding national security and labor, officials have limited individual influence, few ties to each other, and no serious contact with the people whose movements they regulate. As Feldman reveals, this complex construction creates a world of indirect human relations that enables the violence of social indifference as much as the targeted brutality of collective hatred. Employing an innovative "nonlocal" ethnographic methodology, Feldman illuminates the danger of allowing indifference to govern how we regulate population—and

people's lives—in the world today.

Rethinking Security in the Age of Migration BRILL

Across East Asia, intra-regional migration is more prevalent than inter-regional movements, and the region's diverse histories, geopolitics, economic development, ethnic communities, and natural environments make it an excellent case study for examining the relationship between irregular migration and human security. Irregular migration can be broadly defined as people's mobility that is unauthorised or forced, and this book expands on the existing migration-security nexus by moving away from the traditional state security lens, and instead, shifting the focus to human security. With in-depth empirical country case studies from the region, including China, Japan, North Korea, the Philippines, Burma/Myanmar, Cambodia, Thailand and Singapore, the contributors to this book develop a human security approach to the study of irregular migration. In cases of irregular migration, such as undocumented labour migrants, asylum seekers, internally displaced people, trafficked persons, and smuggled people, human security is the cause and/or effect of migration in both sending and receiving countries. By adopting a human security lens, the chapters provide striking insights into the motivations, vulnerabilities and insecurities of migrants; the risks, dangers and illegality they are exposed to during their journeys; as well as the potential or imagined threats they pose to the new host countries. This multidisciplinary book is based on extensive fieldwork and interviews with migrants, aid workers, NGO activists and immigration officers. As such, it will appeal to students and scholars of Asian politics and security, as well as those with interests in international relations, social policy, law, geography and migration.

SECURITY, INSECURITY AND MIGRATION IN EUROPE

Studies in Politics, Security and Society

Drawing on the concept of the 'politics of compassion', this Handbook interrogates the political, geopolitical, social and anthropological processes which produce and govern borders and give rise to contemporary border violence.

Immigration Policy and Security Stanford University Press

This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world, migrants have become key actors, living in the spaces between states, as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses a number of case studies, including Palestinian, Sri Lankan, Irish and Somali diaspora communities, to explore the different ways that such groups intersect with issues of security, and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case-specific and, while rich in local detail, lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important

roles in helping us understand the actual (and potential) roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist, for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

Identity, Migration, and the New Security Agenda in Europe Routledge

Through an interdisciplinary analytic lens that combines debates emerged in the fields of international relations, political science and sociology, Valeria Bello reveals how transnational dynamics have increased extremism, prejudiced attitudes towards others and international xenophobia. Bello begins her analysis by tracing similarities between Europe today and Europe before World War II to explain why prejudice is a global security threat and why it is arising as a current global concern within International Organizations. In such a light, Bello shows how changes in the International System and the attack on the UN practice of Intercultural Dialogue have become sources of new perceived threats and the reasons for which new exclusionary patterns have arisen. She argues that both those outcomes have been exacerbating the perceived clash of civilizations and the root causes of different fashions of extremisms. Bello concludes by portraying alternative ways to deal with these instabilities through a partnership of the different stakeholders involved, including both state and non-state actors at global, regional, national and local levels. *International Migration and International Security* provides a unique crosscutting angle from which to analyze the current socio-political crisis connected to the theme of international migration that the world is currently witnessing. Bello expertly shows that different paths for the world are possible and suggest ways to further promote Global Human Security through local, national, regional and global practices of Intercultural Dialogue.

Handbook on Migration and Security Migration, Security, and Resistance

This book examines the management of migratory flows in the Mediterranean within an international security perspective. The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union's immigration and asylum policies and its ability to respond to humanitarian crises. Moreover, these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states. By using Spain and Italy as case studies, the author theorizes that the EU, given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border, uses a deterrence strategy based on minimum common denominators.

HANDBOOK ON HUMAN SECURITY, BORDERS AND MIGRATION

ASP / VUBPRESS / UPA

Migration, Security, and Resistance Routledge

The Securitization of Migration Longo Angelo

The volume places the migration-development-security nexus in the field of transnational studies. Rather than treating these three categories as self-evident, the essays excavate aspects of power and privilege built into their governing frameworks and conflicting rationales apparent in practices of control. Bringing together diverse experiences and case studies, the volume highlights the

problematic nature of maintaining distinct and disconnected frameworks of governance. It argues for a new approach that demonstrates the significance and usefulness of comparative ethics in conceptualising migration from a human-centered and gendered perspective in order to address the multi-faceted and multi-dimensional nature and meanings of "security".

International Migration And Security Routledge

This volume addresses new tendencies related to migration from a Middle Eastern and Mediterranean perspective and with an emphasis on security and citizenship. Contributors aim not only to intervene in scholarly debates surrounding citizenship and migration but also to contribute to policy-oriented discussions related to migration.

Migration, Globalisation and Human Security Cambridge Scholars Publishing

The articles included in this book deal with various aspects of international migration analyzed from different methodological perspectives. What unites this collection of articles is that they deal with peripheral borders, separating rich and poor regions of our globe. They analyze the challenges and problems faced by the European Union and its member states, including Spain and Poland - states with external sea and land borders of the EU. The position of a peripheral country causes a number of problems related to illegal immigration, experienced by Poland and Spain alike. The United States face a similar problem on the border with Mexico. Undoubtedly, as a result of migration pressure, both the European Union and the United States increasingly resemble a besieged fortress.

THE MAZE OF FEAR

Routledge

The conflict in Eastern Ukraine and the European refugee crisis have led to a dramatic increase in forced displacement across Europe. Fleeing war and violence, millions of refugees and internally displaced people face the social and political cultures of the predominantly Christian Orthodox countries in the post-Soviet space and Southeastern Europe. This book examines the ambivalence of Orthodox churches and other religious communities, some of which have provided support to migrants and displaced populations while others have condemned their arrival. How have religious communities and state institutions engaged with forced migration? How has forced migration impacted upon religious practices, values and political structures in the region? In which ways do Orthodox churches promote human security in relation to violence and 'the other'? The book explores these questions by bringing together an international team of scholars to examine extensive material in the former Soviet states (Ukraine, Russia, Georgia and Belarus), Southeastern Europe (Turkey, Greece, Serbia, Bulgaria and Romania), Western Europe and the United States.

Springer

This Handbook provides a state-of-the-art analysis of the critically important links between migration and security in a globalising world, and presents original contributions suggesting innovative and emerging frontiers in the study of the securitization of migration. Experts from different fields reflect on their respective conceptualisations of the migration-security nexus, and consider how an interdisciplinary and multifaceted dialogue can stimulate and enrich our understanding of the securitisation of migration in the contemporary world.

National Security and Policy in America Routledge

Minorities in European Cities examines the issues pertaining to the dynamics of social integration and social exclusion of immigrant minorities at the neighbourhood level. The book looks at the question of the participation and exclusion of migrants in the field of economics. The study focuses on social relations at the neighbourhood level and their impact on the exclusion/inclusion process as well as forms of political exclusion of migrant origin population in the local politics and policy-making processes. Finally, Minorities in European Cities examines the ways in which conceptions of law and order and security, as well as the local institutional praxis they engender, effect exclusion/inclusion opportunities.

RETHINKING (IN)SECURITY IN THE EUROPEAN UNION

Routledge

This volume explores the digitization, privatization, and spatial displacement of border security and the effects these have on political accountability and migrant rights. The governance of security and migration is unfolding in new political spaces. Cooperation and competition among immigration officials, border guards, transnational security corporations, IT companies, local police, and international organizations has decoupled migration governance from national political structures. The chapters in the volume examine how these dynamics affect the deployment and constraint of sovereign power in the United States, Canada, the United Kingdom, and the EU. Contributors trace this process from the disciplinary perspectives of law, political science, sociology, criminology, and geography. Part I of the book explores the reconfiguration of security and migration governance through historical processes of privatization, digitization, and the rescaling of border control

technologies to local and global spaces. Part II explores how migrant rights actors have responded by rescaling resistance to global and local levels. This book will be of much interest to students of critical security studies, global governance, migration studies, and international relations.

[Irregular Migration and Human Security in East Asia](#) Routledge

In *Blurring Boundaries* scholars from law and social sciences offer a critical account of the main topics of forced migration and advance a much-needed fresh view on forced migration through the lens of human security.

Migration, Citizenship and the Challenge for Security Westview Press

This book is the result of a series of studies devoted to assessing the consequences of migration from the perspective of the migration-identity-(in)security causality, with a specific focus on the Roma issue in France. It demonstrates that, in the context of the new European agenda on security, following the events of 9/11, immigrants, in general and the Roma, in particular, have found themselves trapped in a spiral of insecurity through which migration has been raised to the level of 'meta-problem' and they have become scapegoats. The book argues that these issues reflect a broader political discussion on the EU's identity and social policy. It shows that the socio-economic and security dimension of the 'Roma dossier' is a case that may require policymakers in Brussels to rethink the EU's social responsibilities towards its citizens, thus giving up their ambiguous attitude regarding migration.
