Meyler's Side Effects of Drugs: The International Encyclopedia of Adverse Drug Reactions and Interactions, Sixteenth Edition, Seven Volume Set builds on the success of the 15 previous editions, providing an extensively reorganized and expanded resource that now comprises more than 1,500 individual drug articles with the most complete coverage of adverse reactions and interactions found anywhere. Each article contains detailed and authoritative information about the adverse effects of each drug, with comprehensive references to the primary literature, making this a must-have reference work for any academic or medical library, pharmacologist, regulatory organization, hospital dispensary, or pharmaceutical company. The online version of the book provides an unparalleled depth of coverage and functionality by offering convenient desktop access and enhanced features such as increased searchability, extensive internal cross-linking, and fully downloadable and printable full-text, HTML or PDF articles. Enhanced encyclopedic format with drug monographs now organized alphabetically Completely expanded coverage of each drug, with more than 1,500 drug articles and information on adverse reactions and interactions Clearer, systematic organization of information for easier reading, including case histories to provide perspective on each listing Extensive bibliography with over 40,000 references A must-have reference work for any academic or medical library, pharmacologist, regulatory organization, hospital dispensary, or pharmaceutical company

This volume is a collection of papers presented at the International Symposium held in Montreal August 1988 as part of the 27th Annual Conference of

Metallurgists, co-sponsored by the Canadian Steel Industry Research Association, the Canadian Continuous Steel Casting Research Group and the Canadian Institute of Mining and Metallurgy. Four topic areas are covered in the presentations: (1) casting practice and billet quality for direct rolling and hot charging; (2) temperature equalization methods and equipment; (3) surface quality and sensors and (4) mechanical handling of billets for direct rolling and charging.

The Side Effects of Drugs Annual was first published in 1977. It has been published continuously since then, as a yearly update to the encyclopaedic volume Meyler's Side Effects of Drugs. Each new Annual provides clinicians and medical investigators with a reliable and critical yearly survey of new data and trends in the area of Adverse Drug Reactions and Interactions. An international team of specialists have contributed to the Annuals by selecting critically from each year's publications all that is truly new and informative, by critically interpreting it, and by pointing out whatever is misleading. The use of the book is enhanced by separate indexes, allowing the reader to enter the text via the drug name, adverse effect, or drug interaction. Special features of the Annuals are the Side Effects of Drugs Essay, usually written by a guest author, and the special reviews: short articles, within the different chapters, that give extra attention to topics of current interest. The Essay in Annual 26 is entitled 'How safe is cannabis?' (by Professor L.L. Iversen) and there is a Historical Essay entitled 'From thalidomide to pharmacovigilance: a personal account' (by Professor D.J. Finney). The special reviews in this volume include, among others: The cognitive effects of Ecstasy Antipsychotic drugs and weight gain Vigabatrin-related visual abnormalities Managing the adverse effects of morphine The cardiotoxic effects of antihistamines Inhaled corticosteroids and growth inhibition in children Bioterrorism and its prevention through immunization

THE MEDICAL TIMES AND GAZETTE

Harper Collins

The solute strengthening effect of oxygen in commercial-purity Zircaloy-2 was investigated over the temperature range 1023 to 1873 K, strain rate range 10⁻⁴ to 10^{-1s}-1, and oxygen concentration range 1260 to 12 360 ppm. The flow parameters were determined in the fully ? and fully ? as well as (? + ?) phase domains. In the two-phase region, the flow curves were characterized by significant yield drops as long as the ? volume fraction was

over about 50 percent. This effect is ascribed to the enrichment of the β -phase in the substitutional solutes iron and possibly chromium. The flow curves were otherwise normal. For the single-phase β and β' structures, the yield and steady-state stresses obeyed the general relation $\sigma = \sigma_0 \exp(kc)$ (kc), where σ_0 and k are constants, and c represents the oxygen concentration (weight percent). The average values of k_1 and k_2 were determined to be 0.57 ± 0.06 and 0.34 ± 0.10 , respectively. The strain rate sensitivities fell in the following ranges, depending on the phases present: 0.15 to 0.20, 0.27 to 0.32, and 0.22 to 0.25 for the β , β' , and ($\beta + \beta'$) materials, respectively. The experimental activation energies decreased with stress in the ranges 450 to 330 kJ/mol (50 to 150 MPa) and 150 to 120 kJ/mol (1 to 5 MPa) for the β - and β' -Zircaloy-2, respectively. The extrapolated zero stress values of Q were 530 and 170 kJ/mol, and are associated with the dominant dynamic recovery mechanism in each phase. The observed steady-state as well as yield stresses correspond closely to the rule-of-mixtures predictions but lie considerably above the values interpolated from the fully β -phase and fully β' -phase. This is ascribed to the very powerful strengthening effect of oxygen on the β -phase when it is enriched during the formation of two phases from either single-phase region.

The Shubert name has been synonymous with Broadway for almost as long as Broadway entertainment itself. In *The Shuberts and Their Passing Shows: The Untold Tale of Ziegfeld's Rivals*, author Jonas Westover investigates beyond the Shuberts' business empire into their early revues and the centrifugal role they played in developing American theatre as an art form.

American State Papers Jonas Mekas

Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.

NUCLEAR SCIENCE ABSTRACTS

Houghton Mifflin Harcourt

Building on the success of the 14 previous editions, this remarkable reference has been extensively reorganized and expanded and now comprises almost 1,500 individual drug articles providing the most complete coverage of adverse reactions and interactions found anywhere. Each article contains detailed and authoritative information about the adverse effects of each drug, with comprehensive references to the primary literature making this a must have for any academic or medical library, pharmacologist, regulatory organization, hospital dispensary or pharmaceutical company. Now available online for all academic, corporate or government institution as well as individuals via Science Direct! The online version provides an unparalleled depth of coverage and functionality by offering convenient desktop access and enhanced features such as increased searchability, extensive internal cross-linking and fully downloadable and printable full-text, HTML or PDF articles. Enhanced encyclopedic format with drug monographs now organised alphabetically Completely expanded coverage of each drug - thalidomide warranted three sentences in Meyler's 14th edition, but is now a 13 page extensive monograph Clearer, systematic organization of information for easier reading including case histories to provide perspective on each listing Extensive bibliography with over 40,000 references - Meyler's 15th edition incorporates all relevant citations from Meyler's 14th, but also includes relevant citations from previous editions of Meyler's and Side Effects of Drugs Annuals to give a historical perspective on the use and safety of drugs

"The heroic quest is about saying 'yes' to yourself and in so doing, becoming more fully alive and more effective in the world. . . . The quest is replete with dangers and pitfalls, but it offers great rewards: the capacity to be successful in the world, knowledge of the mysteries of the human soul, and

the opportunity to find and express your unique gifts in the world." In this bold and original work, Carol S. Pearson shows that the heroic quest isn't just for certain people under special circumstances. Exploring the many heroic paths available to each of us, at every point in our lives, her innovative program enables us to live heroically by activating and applying twelve archetypes in our lives. This companion to the bestselling *The Hero Within* outlines twelve archetypal patterns that can aid inner development and the quest for wholeness. These archetypes are inner guides that can help us prepare for the journey, by learning how to become successful members of society; embark upon the quest, by becoming initiated into the mysteries of the human soul; and return to transform our lives as a result of claiming our uniqueness and personal power. Writing for individuals seeking to realize their full potential and professionals engaged in empowering others, Pearson shows how journeys differ by the age, gender, and cultural background of the seeker, and how archetypes help awaken the capacities of our psyches. A unique diagnostic test, the Heroic Myth Index, and exercise are included to help us understand and awaken our inner guides.

The Economist

In this new and refreshing approach to the story, Ben Zvi starts with the premise that Jonah, like most books, was written to be read. He therefore concentrates on intended and unintended readership(s) of Jonah and the network of messages that they were likely to derive through their reading and rereading. He starts with the historical and social matrix of the production and reading of the book in antiquity, analyzes its self-critical approach and its metaphoric character as a comment on the genre of prophetic books and on prophets. How does the historical fact of Nineveh's destruction actually shape the reading? Or the perception of Jonah as a runaway slave? Ben Zvi demonstrates the malleability of interpretation of the Book of Jonah and its limitations, as attested in different communities of readers. He asks why certain messages are easily accepted by particular historical communities, whereas others are not raised at all.

THE SATURDAY REVIEW OF POLITICS, LITERATURE, SCIENCE, ART, AND FINANCE

A refugee from post-World War II Europe who immigrated to the US in 1949, Jonas Mekas (1922-2019) became one of America's foremost champions of independent cinema and one of its most innovative filmmakers. An admired poet in his native Lithuania, Mekas began recording his life on film shortly after his arrival in New York. Through his work as the author of the Village Voice's "Movie Journal" column, editor of Film Culture magazine, and founder of Anthology Film Archives and the Film-Makers' Cooperative, Mekas played a vital role in the promotion of avant-garde and independent films. His early films, *Guns of the Trees* and *The Brig*, challenged the structure of traditional narrative filmmaking. He is best known for his "diary films," including *Walden (Diaries, Notes, and Sketches)*; *Reminiscences of a Journey to Lithuania*; and *As I Was Moving Ahead Occasionally I Saw Brief Glimpses of Beauty*. His films, writings, and the institutions he built have influenced generations of filmmakers, poets, artists, musicians, critics, and scholars. In *Jonas Mekas: Interviews*, volume editor Gregory R. Smulewicz-Zucker collects eighteen interviews covering almost sixty years of the filmmaker's career. Mekas discusses his remarkable life as a refugee from Nazi- and Soviet-occupied Lithuania, his role as one of the major figures in the development of the American avant-garde, and his thoughts about his own work. In conversation with scholars, journalists, and other prominent artists, Mekas speaks of his passion for artistic expression and uncompromising vision for a liberated cinema. These interviews preserve Mekas's voice so that it might speak to future generations of artists and intellectuals.

The Saturday Review of Politics, Literature, Science and Art

This book assists in the exchange of research and progress outcomes concerned with the latest issues in thermophysical properties (TPPs) of complex liquids research, development, and production. Topics cover the control of transport properties of metallic alloys, thermal analysis of complex plasmas and instabilities in plasma devices, thermophysical properties at nanolevel, theoretical background of viscosities of hydrocarbons at varying temperature and pressure ranges, molecular modeling, and experimental investigations based on nanofluids and ionic conduction in solid-state electrolytes for thermodynamic data. This book enables global researchers to tackle the challenges that continue to generate cost-effective TPPs and the latest understanding in the development of complex materials and the collaboration of modern thermophysical generating technologies.

Moreover, it provides a platform for different regional authors to exchange scientific knowledge and generate enthusiasm for science and technology.
