In Day One, automotive journalist Marty Schorr recalls life on the front line in the classic muscle car era, thrashing brand-new cars that would become collector vehicles. Most muscle-car books celebrate beautifully-restored vehicles surrounded by hard facts; Day One tells the real story from the point-of-view of one of the period's most respected automotive journalists, Marty Schorr. For the first time in print, you'll get a unique perspective on what it was like to actually drive, race, and otherwise thrash what are some of today's most valuable collector cars. CARS, the iconic magazine Marty wrote and edited didn't rely on industry advertising for revenue. Instead, the magazine made money the old fashioned way, from newsstand sales, leaving it able to be honest and frank in its coverage of high-performance street cars. CARS magazine reported on both Day stock and modified cars, cars the traditional magazines wouldn't touch, like the ultra-high-

performance vehicles from companies like Baldwin-Motion, Yenka Chevrolet, Nickey Chevrolet, Royal Pontiac, and Tasca Ford.

Prepare yourself for Day One to cover the most important cars of a given year, including: Pontiac's 1962-1963 lightweight Super-Duty 421 street and Swiss Cheese models Chevrolet's 1963 big-block 427 Mystery Motor and ZL-1 Impala. Ford 1963 1/2 427/425 Galaxie fastback The 1964 Ramchargers The first 426 Street Hemi Cotton-Owens prepared Hemi Coronet A 1966 Olds Twin-Engined (850 cubic inches) Grant Toronado, currently owned by Jay Leno A prototype 1966 Plymouth 426 Street Hemi Satellite One of two 427 SOHC Galaxies prototypes A '67 Royal Bobcat GTO Plymouth's original '68 Hemi Road Runner Hurst-built Plymouth & Dodge 1968 Hemi-Darts and Hemi-Cudas

How Great Companies Get Their Mojo from Maslow Revised and Updated Independently Published

Part historical essay, part scientific article, and part enthralling diary-Roald Amundsen's (1872-1928) book presents intriguing documentation about how his expedition reached the South Pole on December 14, 1911, just one month ahead of his rival, Robert Scott. Amundsen organized his gripping account using what is referred to in the film industry as the zooming technique. It starts in the past, examining the history of Antarctic exploration in different eras, and then moves ahead to describe how his own expedition was created, its organization, the slow stages involved in preparing for departure and, finally, the heart-stopping excitement of the race to the South Pole. Supplementing the vivid first-person text are black-and-white archival photographs illustrating the actual expedition, and color photographs depicting the landscape of Antarctica.

Proven principles for sustainable success, with new leadership insight PEAK is the popular, transformative guide to doing business better, written by a seasoned entrepreneur/CEO who has disrupted his favorite industry not once, but twice. Author Chip Conley, founder and former CEO of one of the world's largest boutique hotel companies, turned to psychologist Abraham Maslow's Hierarchy of Needs at a time when his company was in dire need. And years later, when the young founders of Airbnb asked him to help turn their start-up home sharing company into a world-class hospitality giant, Conley once again used the principles he'd developed in PEAK. In the decade since this book's first edition, Conley's PEAK strategy has been developed on six continents in organizations in virtually every industry. The author's foundational premise is that great leaders become amateur psychologists by understanding the unique needs of three key relationships—with employees, customers, and investors—and this message has resonated with every kind of leader and company including some of the world's best-known, from Apple to Facebook. Avid users of PEAK have found that the principles create greater loyalty and differentiation with their key

stakeholders. This new second edition includes in-depth examples of real-world PEAK companies, including the author's own at Airbnb, and exclusive PEAK leadership practices that will take you—and your company's performance—to new heights. Whether you're at a startup or a Fortune 500 company, at a for-profit, nonprofit, or governmental organization, this book can help you and your people reach potential you never realized you had. Understand how Maslow's hierarchy makes for winning business practices Learn how PEAK drove some of today's top businesses to success Help employees reach their full potential—and beyond Transform the customer experience and keep investors happy The PEAK framework succeeds because it elevates the business from the inside out. These same principles apply in the boardroom, the breakroom, and your living room at home, and have proven to be the foundation of healthy, fulfilled lives. Even if you think you're doing great, you could always be doing better—and PEAK gives you a roadmap to the next level.

There are lots of books about the classic BMW Boxers; their history, performance, lineage, and the minutiae of its specification. But none of them concentrate entirely on telling you what to look for when buying one secondhand. That's what this book is about - it is a straightforward, practical guide to buying a used Boxer twin. It doesn't list all the correct colour combinations for each year or analyse the bike's design philosophy - there are excellent books listed at the end of this

one that do all of that - but it will help you avoid buying a dud. Point by point, it takes the reader through everything that needs looking at when buying a Boxer, plus spares prices, which is the best model to buy for your needs, and a look at auctions, restorations and paperwork The last of the 'classic' air-cooled Boxer twins, these bikes are now collector's items, and many have been saved, restored and continue to be ridden - this book tells the reader how to be part of the Boxer's ongoing story.
