While much has been written on environmental politics on the one hand, and animal ethics and welfare on the other, animal politics is underexamined. There are key political implications in the increase of animal protection laws, the rights of nature, and political parties dedicated to animals.

The cat has been occupying a prominent place in our homes and at our sides for many years. It is

normal to come across him at any time in our literature or when visiting a website. Sometimes he occupies the central place and there are many books that have been devoted to him, sometimes by writers less well known than their companions... Other times, he is just making the scene more lively, more truthful, because without him, where would be the soul of our home? Through these quotes, you will first travel in time, across regions religions and cultures: the Bible, Einstein, Mahomet, Queen Elisabeth II, Shakespeare, Agatha Christie and many others. This little journey into the heart of wisdom or in the company of famous personalities will give you all the delights that our fourlegged friends deserve. And at the heart of all these treasures, I'm sure you will find valuable thoughts to illuminate your every day.

China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. *Frontier Encounters* presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

As the creator of Tintin, Hergé (1907-1983) remains one of the most important and influential figures in the history of comics. When Hergé, born Georges Prosper Remi in Belgium, emerged from the controversy surrounding his actions after World War II, his most famous work leapt to international fame and set the standard for European comics. While his style popularized what became known as the "clear line" in cartooning, this edited volume shows how his life and art turned out much more complicated than his method. The book opens with Hergé's aesthetic techniques, including analyses of his efforts to comprehend and represent absence and the rhythm of mundaneness between panels of action. Broad views of his career describe how Hergé navigated changing ideas of air travel, while precise accounts of his life during Nazi occupation explain how the demands of the occupied press transformed his understanding of what a comics page could do. The next section considers a subject with which Hergé was himself consumed: the fraught lines between high and low art. By reading the late masterpieces of the Tintin series, these chapters situate his artistic legacy. A final section considers how the clear line style has been reinterpreted around the world, from contemporary Francophone writers to a Chinese American cartoonist and on to Turkey, where Tintin has been reinvented into something meaningful to an audience Hergé probably never anticipated. Despite the attention already devoted to Hergé, no multi-author critical treatment of his work exists in English, the majority of the scholarship being in French. With contributors from five continents drawing on a variety of critical methods, this volume's range will shape the study of Hergé for many years to come.

Parmi les gags récurrents il y a le Gaffophone, les contrats non signés avec M. De Mesmaeker, les appeaux ou encore la chimie amusante. Bricoleur et inventeur, Gaston fabrique de nombreuses inventions qui échouent la plupart du temps suite à une gaffe.
