LIZETH MIDDLETON

The Unpromised Land Grand Central Publishing

Nicholas Frankel presents a revisionary account of Oscar Wilde's final years, spent in poverty and exile in Europe following his release from an English prison for the crime of gross indecency between men. Despite repeated setbacks and open hostility, Wilde—unapologetic and even defiant—attempted to rebuild himself as a man, and a man of letters.

Selendang pelangi Oxford University Press

This is a revised edition of a seminal work on the nature of underdevelopment. It includes a new foreword and appendixes on the significance of plantations to Third World economies and the contribution that George Beckford made to Caribbean economic thought.

LAND REFORM AND ECONOMIC DEVELOPMENT

UNC Press Books

The classic collaboration from the internationally bestselling authors Neil Gaiman and Terry Pratchett, soon to be an original series starring Michael Sheen and David Tennant. ?Season 2 of Good Omens coming soon! "Good Omens . . . is something like what would have happened if Thomas Pynchon, Tom Robbins and Don DeLillo had collaborated. Lots of literary inventiveness in the plotting and chunks of very good writing and characterization. It's a wow. It would make one hell of a movie. Or a heavenly one. Take your pick." —Washington Post According to The Nice and Accurate Prophecies of Agnes Nutter, Witch (the world's only completely accurate book of prophecies, written in 1655, before she exploded), the world will end on a Saturday. Next Saturday, in fact. Just before dinner. So the armies of Good and Evil are amassing, Atlantis is rising, frogs are falling, tempers are flaring. Everything appears to be going according to Divine Plan. Except a somewhat fussy angel and a fast-living demon—both of whom have lived amongst Earth's mortals since The Beginning and have grown rather fond of the lifestyle—are not actually looking forward to the coming Rapture. And someone seems to have misplaced the Antichrist . . .

Pachinko (National Book Award Finalist) Forgotten Books

Information theory and inference, taught together in this exciting textbook, lie at the heart of many important areas of modern technology - communication, signal processing, data mining, machine learning, pattern recognition, computational neuroscience, bioinformatics and cryptography. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse-graph codes for error-correction. Inference techniques, including message-passing algorithms, Monte Carlo methods and variational approximations, are developed alongside applications to clustering, convolutional codes, independent component analysis, and neural networks. Uniquely, the book covers state-of-the-art error-correcting codes, including low-density-parity-check codes, turbo codes, and digital fountain codes - the twenty-first-century standards for satellite communications, disk drives, and data

broadcast. Richly illustrated, filled with worked examples and over 400 exercises, some with detailed solutions, the book is ideal for self-learning, and for undergraduate or graduate courses. It also provides an unparalleled entry point for professionals in areas as diverse as computational biology, financial engineering and machine learning.

A fascinating persuasive history of how sugar has shaped the world, from European colonies to our modern diets In this eye-opening study, Sidney Mintz shows how Europeans and Americans transformed sugar from a rare foreign luxury to a commonplace necessity of modern life, and how it changed the history of capitalism and industry. He discusses the production and consumption of sugar, and reveals how closely interwoven are sugar's origins as a "slave" crop grown in Europe's tropical colonies with its use first as an extravagant luxury for the aristocracy, then as a staple of the diet of the new industrial proletariat. Finally, he considers how sugar has altered work patterns, eating habits, and our diet in modern times. "Like sugar, Mintz is persuasive, and his detailed history is a real treat." -San Francisco Chronicle

Powers of Exclusion Transaction Publishers

The current ecological crisis is a matter of urgent global concern, with solutions being sought on many fronts. In this book, Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated, if not actually caused, by the reductionist view of nature that has been advanced by modern secular science. What is needed, he believes, is the recovery of the truth to which the great, enduring religions all attest; namely that nature is sacred. Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans. His goal is to negate the totalitarian claims of modern science and to re-open the way to the religious view of the order of nature, developed over centuries in the cosmologies and sacred sciences of the great traditions. Each tradition, Nasr shows, has a wealth of knowledge and experience concerning the order of nature. The resuscitation of this knowledge, he argues, would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth.

Women Migrant Workers Island Press

A comprehensive analysis of the Japanese occupation of Java. The book explores the human drama that cannot be simply explained in terms of nationalism and fascism. The totality of Indonesian society is addressed, including the politics and daily lives of peasants.

Shadow is a man with a past. But now he wants nothing more than to live a quiet life with his wife and stay out of trouble. Until he learns that she's been killed in a terrible accident. Flying home

for the funeral, as a violent storm rocks the plane, a strange man in the seat next to him introduces himself. The man calls himself Mr. Wednesday, and he knows more about Shadow than is possible. He warns Shadow that a far bigger storm is coming. And from that moment on, nothing will ever be the same...

Oxford University Press

With her virtuoso translation, classicist and bestselling author Caroline Alexander brings to life Homer's timeless epic of the Trojan War Composed around 730 B.C., Homer's Iliad recounts the events of a few momentous weeks in the protracted ten-year war between the invading Achaeans, or Greeks, and the Trojans in their besieged city of Ilium. From the explosive confrontation between Achilles, the greatest warrior at Troy, and Agamemnon, the inept leader of the Greeks, through to its tragic conclusion, The Iliad explores the abiding, blighting facts of war. Soldier and civilian, victor and vanquished, hero and coward, men, women, young, old—The Iliad evokes in poignant, searing detail the fate of every life ravaged by the Trojan War. And, as told by Homer, this ancient tale of a particular Bronze Age conflict becomes a sublime and sweeping evocation of the destruction of war throughout the ages. Carved close to the original Greek, acclaimed classicist Caroline Alexander's new translation is swift and lean, with the driving cadence of its source—a translation epic in scale and yet devastating in its precision and power.

Catch-22 University of West Indies Press

Listen to a short interview with Sarah McFarland TaylorHost: Chris Gondek | Producer: Heron & Cranell is perhaps the critical issue of our time: How can we, as human beings, find ethical and sustainable ways to live with one another and with other living beings on this planet? Inviting us into the world of green sisters, this book provides compelling answers from a variety of religious communities. Green sisters are environmentally active Catholic nuns who are working to heal the earth as they cultivate new forms of religious culture. Sarah Taylor approaches this world as an "intimate outsider." Neither Roman Catholic nor member of a religious order, she is a scholar well versed in both ethnography and American religious history who has also spent time shucking garlic and digging vegetable beds with the sisters. With her we encounter sisters in North America who are sod-busting the manicured lawns around their motherhouses to create community-supported organic gardens; building alternative housing structures and hermitages from renewable materials; adopting the "green" technology of composting toilets, solar panels, fluorescent lighting, and hybrid vehicles; and turning their community properties into land trusts with wildlife sanctuaries. Green Sisters gives us a firsthand understanding of the practice and experience of women whose lives bring together Catholicism and ecology, orthodoxy and activism, traditional theology and a passionate mission to save the planet. As green sisters explore ways of living a meaningful religious life in the face of increased cultural diversity and ecological crisis, their story offers hope for the future—and for a deeper understanding of the connections between women, religion, ecology, and culture.

Our Struggle Cambridge University Press

This volume makes the case for the fair treatment of female migrant workers from the global South who are employed in wealthy liberal democracies as care workers, domestic workers, home health workers, and farm workers. An international panel of contributors provide analyses of the ethical, political, and legal harms suffered by female migrant workers, based on empirical data and case studies, along with original and sophisticated analyses of the complex of systemic, structural factors responsible for the harms experienced by women migrant workers. The book also proposes realistic and original solutions to the problem of the unjust treatment of women migrant workers, such as social security systems that are transnational and tailored to meet the particular needs of different groups of international migrant workers.

Mission at the Crossroads Arkose Press

From the Psalms in the Bible to the sacred rivers in Hinduism, the natural world has been integral to the world's religions. John Grim and Mary Evelyn Tucker contend that today's growing environmental challenges make the relationship ever more vital. This primer explores the history of religious traditions and the environment, illustrating how religious teachings and practices both promoted and at times subverted sustainability. Subsequent chapters examine the emergence of religious ecology, as views of nature changed in religious traditions and the ecological sciences. Yet the authors argue that religion and ecology are not the province of institutions or disciplines alone. They describe four fundamental aspects of religious life: orienting, grounding, nurturing, and transforming. Readers then see how these phenomena are experienced in a Native American religion, Orthodox Christianity, Confucianism, and Hinduism. Ultimately, Grim and Tucker argue that the engagement of religious communities is necessary if humanity is to sustain itself and the planet. Students of environmental ethics, theology and ecology, world religions, and environmental studies will receive a solid grounding in the burgeoning field of religious ecology.

FairTax: The Truth NYU Press

The volume consists of 20 original papers by linguists from different European universities on the subject of dialogue forms in selected discourse areas. The broad title *Discourse and Dialogue* takes into account the heterogeneity of approaches typical of modern European discourse research, which is also reflected in this volume. In diesem Band wurden 20 Originalbeiträge von Linguisten verschiedener europäischer Universitäten über Dialogformen in ausgewählten Diskursbereichen zusammengestellt. Der breit gehaltene Titel *Diskurs und Dialog* soll der Heterogenität der Ansätze Rechnung tragen, die die moderne europäische Diskursforschung charakterisiert und auch in diesem Band manifest wird.

Discourse and Dialogue Harvard University Press

"Covers the origins of Sufism and early influences, particularly from Christianity; the rise of the great Sufi organizations; the thought of Sufism's main theorist and systemizer, Ibn Arabi; Rumi

and the Whirling Dervishes; relations with Shi'ism in Iran; Sufism in the heyday of the great empires in Iran, India, and Turkey; and relations with Turkey and Egypt during the nineteenth century as well as Sufi practices in the twentieth century."--Page 4 of cover.

Joanna Trollope's much-anticipated contemporary reworking of Jane Austen's *Sense and Sensibility* launches *The Austen Project* and is already one of the most talked about books of the year.

GREEN SISTERS

Routledge

The author of the #1 New York Times bestseller *The FairTax Book* offers a new look at the fast-growing populist tax reform movement that's poised to become a key campaign issue for 2008. In 2005, firebrand radio talk show host Neal Boortz and Georgia congressman John Linder teamed up to create *The FairTax Book*, the first book devoted to the FairTax movement they had been promoting for years. Riding the growing groundswell of popular support for the tax reform measure, *The FairTax Book* became an overnight sensation. As the election season heats up, Boortz and Linder return to add fuel to the fire with this radical follow-up. Talking back to the critics who have grossly misrepresented the simple principles behind the tax reform measure—which would abolish the IRS and replace it with a 23 percent retail sales tax on all new goods and services—Boortz and Linder: • Debunk myths about the tax and answer critical charges—that it would bankrupt the economy, that it would leave poor people in the lurch, that the math doesn't work • Offer new insights into aspects of the plan not originally covered • Show the American voter that there's still hope of

replacing our currently outdated, corrupt, and punitive income tax system with a simple plan that will revolutionize the way American pays for itself.

Colonialism, 1870-1945 M.E. Sharpe

Excerpt from *Class and Class Conflict in Industrial Society* Generalizing theoretical formulation and its empirical test are balanced in the present investigation. With R. K. Merton I regard theories of the middle range as the immediate task of sociological research: generalizations that are inspired by or oriented towards concrete observations. However, the exposition of the theory of social classes and class conflict stands in the center of this investigation. The resume of Marx's theory of class, the largely descriptive account of some historical changes of the past century, and the critical examination of some earlier theories of class, including that of Marx, lead up to the central theoretical chapters; with the analysis of post-capitalist society in terms of class theory a first empirical test of my theoretical position is intended. The whole investigation remains in the middle range also in that it is, as its title indicates, confined to industrial society. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. The Verbal Communication of Emotions Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

This book pulls together new research and theory on the verbal communication of emotions by an international, cross-disciplinary group of recognized experts in affective communication. The book's goal is to provide readers with a comprehensive view of current research and encourage cross-disciplinary interaction. Topics include analyses of literal and figurative expressions for emotions, studies of the use of metaphor and other figurative expressions for emotion, analysis of the role of conversational partners in creating emotional meaning, and the effects of culture on emotional communication. The chapters are organized into three broad areas: background theory, figurative language use, and social/cultural aspects of emotional communication. Part I reviews fundamental issues in the verbal communication of emotion. Part II examines the role of metaphor and other figures of speech in emotional communication in both everyday language and psychotherapeutic contexts. Part III looks at ways emotions are embedded in larger socio-culture processes. Taken as a whole, the chapters provide a comprehensive look at the current state of research on the use of language in affective communication and suggest a number of interesting directions for future research.
