LETICIA KELLEY

THE JOURNAL OF THE NATIONAL ARCHIVES

Oxford University Press

Corporate social responsibility codes are guidelines that companies voluntarily develop and publish with the objective of showing the public their commitment to respect human rights, to improve fundamental workplace standards worldwide and to protect the natural environment. These corporate codes have become a crucial element in the regulatory architecture for globally operating companies. By focusing on the characteristics of the codes, their effects on society and their legal consequences, this book seeks to provide a comprehensive analysis of corporate codes and the law. Enforcing Corporate Social Responsibility Codes develops proposals on the relationship between global corporate self-regulation and the national private law systems. It uses methods of comparative law

and sociological jurisprudence to argue that national private law can, and in fact should, enforce these codes as genuine legal obligations. The author formulates legal policy recommendations for English and German private law that indicate how the proposed legal enforcement could be realised in practice. The dissertation on which this book is based was awarded the second prize in the humanities category of the Deutscher Studienpreis (German Thesis Award) by the Koerber Foundation in November 2015.

The aim of EUROPEAN RETAIL RESEARCH is to publish interesting manuscripts of high quality and innovativeness with a focus on retail researchers, retail lecturers, retail students and retail executives. As it has always been, retail executives are part of the target group and the knowledge transfer between retail research and retail management remains a part of the publication's concept. EUROPEAN RETAIL RESEARCH welcomes manuscripts on original theoretical or conceptual contributions as

well as empirical research – based either on large-scale empirical data or on the case-study method. Following the state of the art in retail research, articles on any major issues that concern the general field of retailing and distribution are welcome.

BUSINESS MANAGEMENT CASE STUDIES

John Wiley & Sons

This Global Edition has been developed specifically to meet the needs of international finance students. It continues to offer substantial coverage of the recession and liquidity crisis that engulfed the global economies in the last few years and pays special attention to the banking sector and the critical need for funding that most businesses face. The emphasis on analytical approaches to international financial problems is intended to make the content more relevant and improve learning outcomes for the international student. Corporate Finance Foundations' thorough treatment of concepts and application combines with a complete digital solution to help your students achieve higher outcomes in the course.

Annual Report Springer

This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.

Importantly, this stimulating text:

On Global Self-Regulation and National Private Law BoD – Books on Demand

This book provides a comprehensive and detailed introduction to the ISO 26000 standard for social responsibility (SR) in businesses and corporations. In addition to discussing the standard's focus on various stakeholders and seven core topics, the book underscores its key aspects and most debatable issues, with a focus on its connection to sustainable business practices. It presents numerous cases and practical examples of the ISO 26000's implementation and discusses the outcomes and lessons learned, in terms of the extent to which organizations can envision practicing CSR in ways that fit their activities, stakeholders and environment. Lately, the ISO 26000 has proved to offer an interesting and important approach to the standardization of (corporate) social responsibility. Approached and perceived as a voluntary standard that does not include any specific requirements, determining the best way to implement and work with it involved a considerable amount of experimentation. This book showcases the current state of application and discusses how different countries have developed their own specific versions of the standard, which organizations can use to certify their SR processes.

The aim of EUROPEAN RETAIL RESEARCH is to publish interesting manuscripts of high quality and innovativeness with a focus on retail researchers, retail lecturers, retail students and retail executives. As it has always been, retail executives are part of the target group and the knowledge transfer between retail research and retail management remains a part of the publication's concept.

Germany Real Estate Yearbook 2009 Bloomsbury Publishing

This book is devoted to the dynamic development of retailing.

The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

Strategy, Analysis, Decision, Implementation Springer

In this book, the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of "price theory" and "price policy," the authors coined the term "price management" to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, pretium, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research, consulting, and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a "bible" for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students alike. Praise for Price Management "This book is truly state of the art and the most comprehensive work in price management." - Prof. Philip Kotler, Kellogg School of Management, Northwestern University "This

very important book builds an outstanding bridge between science and practice." - Kasper Rorsted, CEO, Adidas "This book provides practical guidelines on value creation, communication and management, which is an imperative for businesses to survive in the coming era of uncertainty." - Dr. Chang-Gyu Hwang, Chairman and CEO, KT Corporation (Korea Telecom)
Annual Report Springer

The retail industry, with which we have all grown up, has been devastated by the twin effects of the internet and the Coronavirus lockdown. Huge numbers of prestigious brands have gone under, or are a shadow of their former selves. The world economy has gone into deep recession, with reduced employment and incomes across broad swaths of society. Many discretionary products have simply become too expensive for ordinary people to buy on a regular basis. High streets and shopping malls lie half empty, causing a vacuum at the core of our societies. There is an urgent need to regenerate our local shopping centres, in order to create new hope in depressed areas. So how can retailers and brands respond to this crisis? Fortunately, new shoots of recovery are emerging from the wreckage of the old order - new brands, new ways of providing value, and new and innovative methods of creating excitement to draw in consumers, and kick-start the retail economy. Technology is re-shaping almost every aspect of the supply chain, and is lowering barriers to entry to new and innovative start-ups, which are re-making sector after sector. In addition, some incumbent brands and retailers are experimenting with novel ways of doing things - from turning mere shopping into an immersive 'theatre', to creative ways to measure and retain loyalty. This book offers a comprehensive analysis of these new forces which are changing the way in which we buy products and experience brands. It includes in-depth interviews with some of the most innovative players - from John Lewis in the UK, to Nike and Patagonia in the US - in the hope of drawing out key learning points for the rest of the industry, across the globe. It also provides essential guidelines for governments, as they strive to rebuild society in the wake of recent catastrophes - from the death of Main Street to the impact of coronavirus.

ANNUAL REPORT

University of Wales Press

Seminar paper from the year 2021 in the subject Business economics - Business Management, Corporate Governance, grade: 2.0, University of Geneva (Paul Bairoch Institute of Economic History), language: English, abstract: Global retail business is known for rough competition, low salaries, bad working conditions and big players. Two of these big players, Aldi and Lidl, entered the Swiss market in the last two decades, but Migros and Coop notably still made up about 77% of the retail market share in 2018. They though lost more market share over time when the food market is considered independently. The author of this paper was interested how Migros and Coop with the legal form of cooperatives behave in this competitive market. The methodology of this research was limited by the availability of data (and the scope of the work). For Aldi and Lidl for example, the two main capitalist competitors of Migros, there is basically no data available; except for minimum wages where they are leading in Switzerland. This research only delivers pieces to the role of profit for Migros. It focuses on the head organisation, while the 10 regional cooperatives can attribute a different role to profit. It considers what priority Migros attributes to different revenue and cost factors, where qualitative or quantitative data are available. It additionally includes some major critiques of Migros.

This research monograph is the first authoritative work on the office of the Welsh Language Commissioner and the associated Welsh language regulatory and statutory regime. In setting the Commissioner in context - in Wales, the UK and internationally - the work draws upon a rich variety of source material arising from fieldwork conducted in a number of jurisdictions. The research data includes, for example, an extensive series of documents obtained under a number of Freedom of Information applications, in-depth interviews with key actors from pertinent legislatures, governments, regulatory offices, interest groups and civic society. The linguistic coverage of source material includes English and Welsh, as well as, where relevant, Irish, German, Catalan, Spanish, French and Basque, in a publication which is multi-disciplinary in approach, engaging with the scholarly and professional literature in language policy and planning, socio-legal studies and the politics of language.

What people are saying about Discount Business Strategy: "Michael Andersen and Flemming Poulfelt provide a provocative discussion of the rapidly growing role of discounters across numerous industries: how they operate; how they create uniqueness; and how they can destroy value for incumbents. Understanding the specific moves and tools that the authors analyze will be valuable for attackers and incumbents alike." —Adrian J. Slywotzky, Director, Mercer Management Consulting USA "This book is very timely, dealing with today's most critical strategic issue: how to provide more value to the consumer through aggressive discounting. Those players in manufacturing and distribution who master this will be the winners; many established firms will fall by the wayside. A similar set of issues are facing many nations today - Europe vs. Asia!" —Peter Lorange, President, IMD, Switzerland "Andersen and Poulfelt have researched one of the most important themes in today's business world - how fundamentally new business models have wiped out establishments not with new products or technologies, but by creating new rules for conventional industries. Read this book and learn how to recognize the disruption of your industry before it is too late!" —Sigurd Liljenfeldt, Senior Partner, Monitor Group, France "This book asks if a firm can have its cake and eat it too - that is, maintain high quality at low prices. My favourite example and shopping place is big box Costco. Ikea is another. A must read for a broad audience concerned about corporate survival!" —Professor Larry E. Greiner, Marshall School of Business, University of Southern California, USA The aspiration to adopt the right strategy still prevails over the business world. But is there a single 'best' strategy for a company? Can an organization create sustainable competitive advantage from an 'off-the-peg' strategy? And are most companies likely to craft a strategy that genuinely creates uncontested market space and makes the competition irrelevant? The answer to all these questions is probably 'No'. And the rising tide of companies like Dell, CostCo, Skype and Linux means that asking them at all may soon be futile. While strategists have foundered in old paradigms, a new breed of competitors has emerged. Value destroyers. Old-style thinking understood value destruction when it was confined to an

industry and driven by a new product or technology. But what are the implications when the destruction stems from a new way of thinking - from a strategy that simultaneously creates value? The implications are enormous. Every company in every industry is potentially at risk. This risk - or opportunity - is precisely the reason for this book and its focus on exploring why and how some companies have bridged the gap between differentiator and cost leader strategies to emerge as winners in hypercompetitive markets, and what this entails in terms of value destruction and creation. Discounting organizations are here to stay - are you?
