## **THE POLITICS OF SOCIAL MEDIA MANIPULATION**

Amsterdam University Press  
 This book presents definitions, key concepts and projects in landscape research and related areas, such as landscape science and landscape ecology, addressing and characterising the international role, status, challenges,

future and tools of landscape research in the globalised world of the 21st century. The book brings together views on landscapes from leading international teams and emerging authors from different scientific disciplines and regions of the globe. It describes approaches for achieving sustainability and for handling the multifunctionality of landscapes and includes international case studies demonstrating the great potential of landscape research to provide partial sustainable solutions while developing cultural landscapes and

protecting semi-natural landscapes. It is intended for scientists from various disciplines as well as informed readers dealing with landscape policies, planning, evolution, management, stewardship and conservation.

**Water Communication** Springer Nature

This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series. Digital Humanism deals with the complex relationships between people and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset. The book argues for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life while fully respecting universal human rights. It is a call to shaping technologies in accordance with human values and needs.

**The Psychology of Fake News** Springer Nature

Advances in Biomolecular Medicine contains the selected papers presented at the 4th BIBMC (Bandung International Biomolecular Medicine Conference) and

the 2nd ACMM (ASEAN Congress on Medical Biotechnology and Molecular Biosciences), hosted by the Faculty of Medicine, Padjadjaran University, Bandung, West Java, Indonesia, 4-6 October 2016. In line with the United Nations Sustainable Development Goals, the theme of the joint scientific meeting is 'Medical innovation & translational research to ensure healthy lives & promote well-being for all at all ages'. Authors include scientists, academics, practitioners, regulators and other key individuals with expertise and experience relevant to biomolecular medicine, medical biotechnology and molecular biosciences. Topics of the papers cover various aspects of infection, oncology, tuberculosis, genetics, thalassemia, nutrition, cardiovascular, wound healing and endocrinology. This book is essential reading for academics, scientist, practitioners and regulators involved in the area of biomolecular medicine, medical biotechnology and molecular biosciences.

*Perspectives on Digital Humanism* Springer Nature

The hope and hype about African digital entrepreneurship, contrasted with the reality on the ground in local ecosystems. In recent years, Africa has seen a digital entrepreneurship boom, with hundreds of millions of dollars poured into tech cities, entrepreneurship trainings, coworking spaces, innovation prizes, and investment funds. Politicians and technologists have offered Silicon Valley-influenced narratives of boundless opportunity and exponential growth, in which internet-enabled entrepreneurship allows Africa to "leapfrog" developmental stages to take a leading role in the digital revolution. This book contrasts these aspirations with

empirical research about what is actually happening on the ground. The authors find that although the digital revolution has empowered local entrepreneurs, it does not untether local economies from the continent's structural legacies.

**Religion and Medicine** The Ocean Challenge Badge

Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

**TWELVE YEARS A SLAVE,**

## ILLUSTRATED EDITION

Harper Collins

Gradual and sudden environmental changes are resulting in substantial human movement and displacement, and the scale of such flows, both internal and cross-border, is expected to rise with unprecedented impacts on lives and livelihoods. Despite the potential challenge, there has been a lack of strategic thinking about this policy area partly due to a lack of data and empirical research on this topic. Adequately planning for and managing environmentally induced migration will be critical for human security. The papers in this volume were first presented at the Research Workshop on Migration and the Environment: Developing a Global Research Agenda held in Munich, Germany in April 2008. One of the key objectives of the Munich workshop was to address the need for more sound empirical research and identify priority areas of research for policy makers in the field of migration and the environment.

## DIGITAL ENTREPRENEURSHIP IN AFRICA

Cambridge University Press

Public health thrives on high-quality evidence, yet acquiring meaningful data on a population remains a central challenge of public health research and practice. Social monitoring, the analysis of social media and other user-generated web data, has brought advances in the way we leverage population data to understand health. Social media offers advantages over traditional data sources, including real-time data availability, ease of access, and reduced cost. Social media allows us to ask, and answer, questions we never

thought possible. This book presents an overview of the progress on uses of social monitoring to study public health over the past decade. We explain available data sources, common methods, and survey research on social monitoring in a wide range of public health areas. Our examples come from topics such as disease surveillance, behavioral medicine, and mental health, among others. We explore the limitations and concerns of these methods. Our survey of this exciting new field of data-driven research lays out future research directions.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright

on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

## **THE DESCENT OF MONSTERS**

Baker Books

Nation-building as a process is never complete and issues related to identity, nation, state and regime-building are recurrent in the post-Soviet region. This comparative, inter-disciplinary volume explores how nation-building tools emerged and evolved over the last twenty years. Featuring in-depth case studies from countries throughout the post-Soviet space it compares various aspects of nation-building and identity formation projects. Approaching the issue from a variety of disciplines, and geographical areas, contributors illustrate chapter by chapter how different state and non-state actors utilise traditional instruments of nation-construction in new ways while also developing non-traditional tools and strategies to provide a contemporary account of how nation-formation efforts evolve and diverge.

**Central Asia** Cambridge University Press

Before the first appearance of the Atlas of the World's Languages in 1993, all the world's languages had never been accurately and completely mapped. The Atlas depicts the location of every known living language, including languages on the point of extinction. This fully revised edition of the Atlas offers: up-to-date research, some from fieldwork in early 2006 a general linguistic history of each

section an overview of the genetic relations of the languages in each section statistical and sociolinguistic information a large number of new or completely updated maps further reading and a bibliography for each section a cross-referenced language index of over 6,000 languages. Presenting contributions from international scholars, covering over 6,000 languages and containing over 150 full-colour maps, the Atlas of the World's Languages is the definitive reference resource for every linguistic and reference library.

*Migration, Environment and Climate Change* Astra Publishing House

Introduction -- Ideology as narrative -- When skepticism became public -- Skeptics without borders -- Unpacking the genetic meta-narrative -- The social construction of climate science -- Ideological narratives and beyond in a post-truth world.

**The Amber Crown** Routledge

Over the last five years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. This book is the first of its kind to take stock of this emerging multi-disciplinary field by synthesizing what we know, identifying what we do not know and obstacles to future research, and charting a course for the future inquiry. Chapters by leading scholars cover major topics – from disinformation to hate speech to political advertising – and situate recent developments in the context of key policy questions. In addition, the book canvasses existing reform proposals in order to address widely perceived threats that social media poses to democracy. This title is also available as Open Access on Cambridge Core.

*Flying Couch* Anvil Publishing, Inc.

The study aims at finding an explanation to the economic development of Southeast Asia. To achieve this end, Indonesia, Malaysia, Thailand and the Philippines have been chosen as the foci of the study. To explain the region's recent success, the study is guided by the hypothesis that overseas Chinese entrepreneurship, exercised by a group belonging to a discriminated ethnic minority, is an indispensable component of the capitalist development of Southeast Asia. Overseas Chinese businesses dominate nearly all branches of the economy of their respective countries of residence. On a regional scale, they are acknowledged to control two-thirds of the region's retail trade. The hypothesis of the study is validated by the empirical findings. Furthermore, the study has arrived at the conclusion that Southeast Asia is host to a type of entrepreneurship - Overseas Chinese entrepreneurship - that evolved and developed throughout the centuries and proven for its resiliency and risk-taking abilities. It did not create the boom in the region, however. Liberal government policies, the inflow of huge foreign capital, and the availability of cheap and skilled labor among the indigenous population are among the more crucial factors that facilitated this transformation.

*Lineage, Life, and Labors of José Rizal, Philippine Patriot* MDPI

Water Communication aims at setting a first general outlook at what communication on water means, who communicates and on what topics. Through different examples and based on different research and contributions, this book presents an original first overview of “water communication”. It sets its academic value as one distinct

scientific domain and provides tips and practical tools to professionals. The book contributes to avoid mixing messages, targets and discourses when setting communication related to water issues. The book facilitates coordination within the water sector and its organizations as water is a wide field of applications where inadequate words and language understanding between its stakeholders is one of the main obstacles today. Water Communication provides and describes: a general outlook and retrospective of the history of the water sector in terms of communication the landscape of organizations communicating on water and classification of topics the differences between communication, information, mediation, raising awareness examples of communication campaigns on water Water Communication is a vital resource for communication managers, utility managers, policy makers involved in water management and students in water sciences and environment. Colour figures from the book are available to view on the WaterWiki at: <http://www.iwawaterwiki.org/xwiki/bin/view/Articles/WaterCommunicationAnalysisofStrategiesandCampaignsfromtheWaterSector> Editor: Celine Herve-Bazin, Celsa - Sorbonne University, Paris, France

## UNRULY WATERS

Routledge  
A New York Times Book Review Editors' Choice • A Kirkus Reviews Best Nonfiction Book of 2016 • A Junior Library Guild Fall 2016 Selection *Flying Couch*, Amy Kurzweil's debut, tells the stories of three unforgettable women. Amy weaves her own coming-of-age as a young Jewish artist into the narrative of her mother, a psychologist, and Bubbe, her grandmother, a World War II

survivor who escaped from the Warsaw Ghetto by disguising herself as a gentile. Captivated by Bubbe's story, Amy turns to her sketchbooks, teaching herself to draw as a way to cope with what she discovers. Entwining the voices and histories of these three wise, hilarious, and very different women, Amy creates a portrait not only of what it means to be part of a family, but also of how each generation bears the imprint of the past. A retelling of the inherited Holocaust narrative now two generations removed, *Flying Couch* uses Bubbe's real testimony to investigate the legacy of trauma, the magic of family stories, and the meaning of home. With her playful, idiosyncratic sensibility, Amy traces the way our memories and our families shape who we become. The result is this bold illustrated memoir, both an original coming-of-age story and an important entry into the literature of the Holocaust. *Language Learning Motivation* John Wiley & Sons

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than

from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

Atlas of the World's Languages in Danger  
Tordotcom

In this thought-provoking book, Ema Ushioda asks why we research language learning motivation, whose interests the research serves, and who ultimately benefits. Examining the major theoretical and research developments in this vibrant field from its origins to the present day, the author interrogates the goals and values driving academic inquiry, and argues for a more socially conscious and socially responsive orientation to researching language learning motivation. The book challenges this research field to contribute to critical movements in applied linguistics to address globally and locally relevant societal issues where language and motivation matter. "Ema Ushioda's

compelling, authoritative and timely book re-writes the story of L2 motivation research through the ethical lens. Her probing reflection is not meant to soothe but to ask difficult questions about why we research and for whom. It is impossible to imagine future L2 motivation scholarship that does not treat them seriously." Maggie Kubanyiova, Professor of Language Education, University of Leeds Ema Ushioda is a Professor and Head of the Department of Applied Linguistics at the University of Warwick Oxford Applied Linguistics Series Advisers: Anne Burns and Diane Larsen-Freeman

### **ADVANCES IN BIOMOLECULAR MEDICINE**

Oxford University Press

A finalist for the 2019 Lammy Award for best LGBTQ SF/F/Horror and the Locus Award for Best Novella Neon Yang continues to redefine the limits of silkpunk fantasy with their Tensorate novellas, which the New York Times lauded as "joyously wild." In this third volume, an investigation into atrocities committed at a classified research facility threaten to expose secrets that the Protectorate will do anything to keep hidden. You are reading this because I am dead. Something terrible happened at the Rewar Teng Institute of Experimental Methods. When the Tensorate's investigators arrived, they found a sea of blood and bones as far as the eye could see. One of the institute's experiments got loose, and its rage left no survivors. The investigators returned to the capital with few clues and two prisoners: the terrorist leader Sanao Akeha and a companion known only as Rider. Investigator Chuwan faces a puzzle. What really happened at the institute? What drew the Machinists

there? What are her superiors trying to cover up? And why does she feel as if her strange dreams are forcing her down a narrowing path she cannot escape?

The Tensorate Series Book 1: The Black Tides of Heaven Book 2: The Red Threads of Fortune Book 3: The Descent of Monsters Book 4: The Ascent to Godhood At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Eurasian Disunion** HarperCollins

From ampapagot (Cebuano for triggerfish) to ligaya (bread with red filling from Bicol) to ukuh ukuh (a Tausug dish resembling a sea urchin risotto), this dictionary gathers more than 8,000 terms relating to food ingredients, dishes, cooking styles, preparation techniques, and utensils, among others. For anyone who cooks or simply loves Filipino food, this book is a vital reference and an excellent cookbook supplement.
