Illustrated by in-depth empirical research from six country studies, Gendered Electoral Financing:

Money, Power and Representation in Comparative Perspective is the first cross-regional examination

of the nexus between money, gender and political recruitment across the world. Money is

assumingly one of the greatest barriers to women in the political recruitment process. The financial

disadvantage of women is expected to constitute an obstacle for women's entry into politics

everywhere and especially in developing countries where women's socio-economic status is

disproportionately low relative to men's. This line of reasoning has caused a global upswing in both

candidate- and party-directed financial schemes introduced to enhance gender balance in political

office. This book develops a typology of different kinds of gendered electoral financing schemes and

builds theories about its causes and consequences. By comparing how gendered electoral financing

affects political recruitment processes in both established and emerging democracies, the authors

identify whether and how the funding mechanisms incentivize a shift in political behavior. Gendered

Electoral Financing is a timely, informative and well-written book that does an excellent job of

explaining, in language accessible to students and researchers alike, the cost of elections, gender

imbalance in political office and the effects of financial incentive mechanisms to increase women's

representation in politics.

AUTO REPAIR FOR DUMMIES

Termination of the Activity of the Sequestration Commissions Routledge

Motor trikes have been around since the dawn of motoring, with many starting out as utility vehicles

or prototypes of cars. But trikes haven't died out or become mere relics of motoring history –

companies all over the world still produce them today, and many will convert a motorcycle into a

trike. Trikes are not only huge fun, but can also be a lifestyle choice. They are as diverse as the

people who ride them, and this book illustrates the vast range of machines available. The reader will

discover a plethora of trike designs and layouts from the late 19th century to the present day. Some

influential designs include Piaggio's three wheeled vehicles, the Morgan three wheeler, and the

Harley-Davidson Servicar. The book also features the products of companies that convert

motorcycles into trikes, and shows some mass-produced examples that you can buy today. Then

there are the weird and wonderful machines built by individual enthusiasts – a testament to their

engineering skills and true eccentricity ...

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair

For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and

design, the content is the same as the prior release and should not be considered a new or updated

product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and

updated Forty-eight percent of U.S. households perform at least some automobile maintenance on

their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself

market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a

must and now it's even better. A complete reorganization now puts relevant repair and maintenance

information directly after each automotive system overview, making it much easier to find hands-on

fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout,

eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles.

She's also revised schedules for tune-ups and oil changes, included driving tips that can save on

maintenance and repair costs, and added new advice on troubleshooting problems and determining

when to call in a professional mechanic. For anyone who wants to save money on car repairs and

maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto

repair expert and consumer advocate, has contributed to the Los Angeles Times and has been

interviewed on the Today show, NBC Nightly News, and other television programs.
