 Inhaltsangabe: Einleitung: Die optimale
 Ausgestaltung des Absatz- und
 Produktionsprogramms, von der ersten
 Produktidee bis zur endgültigen
 Herausnahme eines Produkts aus dem
 Programm, stellt eine wesentliche Aufgabe
 im Unternehmen dar. Das Produkt als
 Grundlage der Geschäftstätigkeit will
 verkauft werden, den
 Konsumentenwünschen entsprechen,
 besser als das Konkurrenzprodukt sein und
 überdies Gewinne für das Unternehmen
 erwirtschaften. Um all dieses zu
 gewährleisten, muss es Ziel einer jeden
 Unternehmung sein, alle angebotenen
 Produkte, d.h. Waren und
 Dienstleistungen, laufend den sich
 ändernden Rahmenbedingungen des
 Absatzmarktes anzupassen. Dabei kommt
 dem Produktmanagement neben den
 Entscheidungen zur Einführung neuer und
 der Pflege etablierter Produkte

insbesondere die Aufgabe der Erkennung
 von Schwächen im Absatz- und
 Produktionsprogramm, und der damit
 verbundenen Frage nach der
 Produkteliminierung, zu. Der Fortbestand
 defizitärer Produkte und die Verzögerung
 der Eliminierungsentscheidung kann ein
 Unternehmen schnell in eine nachhaltige
 Krise führen. Daher müssen defizitäre
 Produkte bzw. Produktlinien rechtzeitig
 erkannt werden, um geeignete
 Handlungsmaßnahmen treffen zu können.
 Dabei gehört die Maßnahme der
 Produkteliminierung zu den produkt- und
 programmbezogenen Aktivitäten, welche
 in den klassischen Bereich des Marketings
 fallen. Eines der vier P's im Marketing-Mix,
 mit denen das absatzpolitische
 Instrumentarium in der Literatur und auch
 der vorliegenden Arbeit synonym
 bezeichnet wird, steht dementsprechend
 für product. Darüber hinaus betrachtet
 der Marketing-Mix die Preis- und
 Konditionenpolitik (price), die
 Distributionspolitik (place) und die
 Kommunikationspolitik (promotion). In den
 Bereich der Produkt- und Programmpolitik

fallen sämtliche Entscheidungen, die die
 Gestaltung des Leistungsprogramms
 betreffen. Dazu gehören die physische
 Gestaltung des Kernprodukts, die optische
 Gestaltung, die Verpackung sowie
 produktbezogene Dienstleistungen. Über
 die Gestaltung des Produkts hinaus
 befasst sich die Produkt- und
 Programmpolitik mit allen, das Programm
 betreffenden Entscheidungen. Dazu
 gehören die laufende Betrachtung der
 Produktpalette, die Entwicklung und
 Einführung neuer Produkte, die
 Differenzierung und Variation vorhandener
 Produkte und eben die Frage, ob und wann
 vorhandene Produkte und Produktlinien
 aus dem Produktions- und/oder
 Absatzprogramm genommen werden. Zur
 Sicherung der Unternehmensziele müssen
 diese Aufgaben im [...]

Institutional and technological change is a highly topical subject. At the theoretical level, there is much debate in the field of institutional economics about the role of technological change in endogenous growth theory. At a practical policy level, arguments rage about how Japan and the Japanese economy should plan for the future. In this book, leading economists and economic historians of Japan examine a range of key issues concerning institutional and technological change in Japan, rigorously using discipline-based tools of analysis, and drawing important conclusions as to how the process of change in these areas actually works. In applying these ideas to Japan, the writers in this volume are focusing on an issue which is currently being much debated in the country itself, and are helping our understanding of the world's second-largest economy.

The Great Race recounts the exciting story of a century-long battle among automakers for market share, profit, and technological dominance—and the thrilling race to build the car of the future. The world's great manufacturing juggernaut—the \$3 trillion automotive industry—is in the throes of a revolution.

Its future will include cars Henry Ford and Karl Benz could scarcely imagine. They will drive themselves, won't consume oil, and will come in radical shapes and sizes. But the path to that future is fraught. The top contenders are two traditional manufacturing giants, the US and Japan, and a newcomer, China. Team America has a powerful and little-known weapon in its arsenal: a small group of technology buffs and regulators from California. The story of why and how these men and women could shape the future—how you move, how you work, how you live on Earth—is an unexpected tale filled with unforgettable characters: a scorned chemistry professor, a South African visionary who went for broke, an ambitious Chinese ex-pat, a quixotic Japanese nuclear engineer, and a string of billion-dollar wagers by governments and corporations. "To explain the scramble for the next-generation auto—and the roles played in that race by governments, auto makers, venture capitalists, environmentalists, and private inventors—comes Levi Tillemann's *The Great Race*...Mr. Tillemann seems ideally cast to guide us through the big ideas percolating in the world's far-flung workshops and labs" (*The Wall Street Journal*). His account is incisive and riveting, explaining how America bounced back in this global contest and what it will take to command the industrial future.

It is widely accepted that technology is one of the forces driving economic growth. Although more and more new technologies have emerged, various evidence shows that their performances were not as high as expected. In both academia and practice, there are still many questions about what technologies to adopt and how to manage these technologies. The 15 articles in this book aim to look into these questions. There are quite many features in this book. Firstly, the articles are from both developed countries and developing countries in Asia, Africa and South and Middle America. Secondly, the articles cover a wide range of industries including telecommunication, sanitation, healthcare, entertainment, education, manufacturing, and financial. Thirdly, the analytical approaches are multi-disciplinary, ranging from mathematical, economic, analytical, empirical and strategic. Finally, the articles study both public and private organizations, including the service industry, manufacturing industry, and governmental organizations. Given its wide coverage and multi-disciplines, the book may be useful for both academic research and practical management.

Formal decision and evaluation models are so widespread that almost no one can pretend not to have used or suffered the consequences of one of them. This book is a guide aimed at helping the analyst to choose a model and use it consistently. A sound analysis of techniques is proposed and the presentation can be extended to most decision and evaluation models as a "decision aiding methodology".

This book addresses different aspects of green biocomposite manufacture from natural fibres and bioplastics, including the manufacturing procedures and the physical, mechanical, thermal and electrical properties of green biocomposites. Featuring illustrations and tables that maximize reader insights into

the current research on biocomposites, it emphasises the role of green technology in the manufacture of biocomposites and analysis of properties of biocomposites for different applications. It is a valuable resource for researchers and scientists in industry wanting to understand the need for biocomposites in the development of green, biodegradable and sustainable products for different applications.

The Emily Post Institute, the most trusted brand in etiquette, tackles the latest issues regarding how we interact along with classic etiquette and manners advice in this updated and gorgeously packaged edition. Today's world is in a state of constant change. But one thing remains year after year: the necessity for good etiquette. This 19th edition of Emily Post's Etiquette offers insight and wisdom on a variety of new topics and fresh advice on classic conundrums, including: Social media Living with neighbors Networking and job seeking Office issues Sports and recreation Entertaining at home and celebrations Weddings Invitations Loss, grieving, and condolences Table manners While they offer useful information on the practical—from table settings and introductions to thank-you notes and condolences—the Posts make it clear why good etiquette matters. Etiquette is a sensitive awareness of the feelings of others, they remind us. Ultimately, being considerate, respectful, and honest is what's really important in building positive relationships. "Please" and "thank you" do go a long way, and whether it's a handshake, a hug, or a friend request, it's the underlying sincerity and good intentions behind any action that matter most.

Boudica, or Boadicea, queen of the Iceni, led a famous revolt against Roman rule in Britain in AD 60, sacking London, Colchester and St Albans and throwing the province into chaos. Although then defeated by the governor, Suetonius Paulinus, her rebellion sent a shock wave across the empire. Who was this woman who defied Rome? Boudica: Iron Age Warrior Queen is an account of what we know about the real woman, from classical literature, written for the consumption of readers in Rome, and from the archaeological evidence. It also traces her extraordinary posthumous career as the earliest famous woman in British history. Since the Renaissance she has been seen as harridan, patriot, freedom fighter and feminist, written about in plays and novels, painted and sculpted, and recruited to many causes. She remains a tragic, yet inspirational, figure of unending interest.
